OVERVIEW

The Zetron Model 4010 Dispatch Console is a self-contained, multichannel, radio control console which is available in both desktop or rackmount styles. It provides dispatchers with an efficient means of monitoring and dispatching for a system comprised of up to twelve radio channels. The M4010 presents the operator with both aural and visual cues to simplify the task of supervising a multichannel communications system.

The Model 4010 Dispatch Console offers a cost-effective high-performance solution for a wide range of public safety, utility, and private land-mobile radio applications. It is specifically designed for police, fire, EMS, railroad, and plant security operations. Attractive enough for office environments, the Model 4010 is rugged enough for sustained, "24/7" communications center use.

The Model 4010 can be configured with as few as two channels and grow to twelve channels with the addition of modular channel cards. Channel cards may be specified to be compatible with all common local and remote control standards. The rackmount 4010 may be equipped with an optional 60 button-expansion panel (if required).

OPERATION

The Model 4010 has been designed to simplify the task of operating a multichannel system, allowing operators to concentrate on the content of their dispatching activities.

MultFunction LCD — The backlit, wide-viewing angle LCD serves several purposes. It normally shows the time and the audio level. During paging, it indicates the pager code being sent. In the event of a self-diagnosed problem, the display spells out the problem in plain English. ANI codes may be displayed as well.

Buttons — Button functions are clearly labeled and color-coded on the key's surface to provide easy function association. All primary functions are performed by a single keystroke.

Indicators — The indicators for the button's function are located next to the button for clear association. For dual functions, the adjacent LED indicators use different colors to ensure positive identification. The wide viewing angle ensures excellent visibility even across the room.

Select/Unselect Speakers — Two speakers provide a left/right audio effect, making it easy to distinguish whether the call was from the primary (Selected) channel or some other channel. Selecting a channel moves its monitor audio to the Select speaker.
