Optics Protocols for Satellite Ocean Color Sensor Validation, 2002 *Light Scattering Reviews* 5 Alexander A. Kokhanovsky, 2010-08-05 Light scattering by densely packed inhomogeneous media is a particularly challenging optics problem In most cases only approximate methods are used for the calculations However in the case where only a small number of macroscopic scattering particles are in contact clusters or aggregates it is possible to obtain exact results solving Maxwell's equations Simulations are possible however only for a relatively small number of particles especially if their sizes are larger than the wavelength of incident light The first review chapter in Part I of this volume prepared by Yasuhiko Okada presents modern numerical techniques used for the simulation of optical characteristics of densely packed

groups of spherical particles In this case Mie theory cannot provide accurate results because particles are located in the near field of each other and strongly interact As a matter of fact Maxwell's equations must be solved not for each particle separately but for the ensemble as a whole in this case The author describes techniques for the generation of shapes of aggregates The orientation averaging is performed by a numerical integration with respect to Euler angles The numerical aspects of various techniques such as the T matrix method discrete dipole approximation the finite difference time domain method effective medium theory and generalized multi particle Mie solution are presented Recent advances in numerical techniques such as the grouping and adding method and also numerical orientation averaging using a Monte Carlo method are discussed in great depth Modern Electronics ,1989 Popular Mechanics ,1987-02 Popular Mechanics inspires, instructs and influences readers to help them master the modern world Whether it's practical DIY home improvement tips, gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle *Photosynthesis and Production in a Changing Environment* D.O.
