Leadership or Chaos Norman Schofield, Maria Gallego, 2011-08-03

Combining elements of economic reasoning and political science has proven to be very useful for understanding the broad variation in economic development around the world. In a sense, research in this field goes back to the Scottish Enlightenment and Adam Smith's original plan in his *Theory of Moral Sentiments* and *Wealth of Nations*. *Leadership or Chaos* by Norman Schofield and Maria Gallego is intended as an advanced self-contained text in political economy dealing with social choice. The theory and empirical analysis are used to examine democratic institutions and elections in the developed world and the success or failure of moves to democratization in the less developed world. The book closes with a consideration of current quandaries with regard to political and economic stability and climate change and a discussion of the moral foundations of our society.

Russian National Strategy and ROK-Russian Strategic Partnership in the 21st Century Korea Institute for National Unification (South Korea), 2011-10-13. This study aims to strengthen trust between Korea and Russia through promoting mutual understanding and improving the quality of policy network. The study is the outcome of the joint research of KINU and IMEMO. As the editor of this volume, I hope this study may help experts, students, and readers in Korea and in the countries surrounding the Korean Peninsula to have a clearer understanding of Russia's national strategy, Northeast strategy, Far East and Siberia strategy, and the importance of the strategic cooperation partnership between Korea and Russia. Sustainable Program Management

Gregory T. Haugan, 2013-10-07. The world is undergoing major transitions due to three driving forces: population changes, climate changes, and energy resource constraints, making it essential for us to move toward sustainability in the implementation of projects and programs as well as our everyday life. Real sustainability exists where there is a balance between population and energy usage and a stable climate/global equilibrium. Designed for program and portfolio managers and senior planners, *Sustainable Program Management* provides essential information on the three major driving forces of the coming decades and presents options to assist us in moving toward a sustainable future. This book offers a unique approach to accommodating the three new constraints of population change, climate change, and energy resources as impacts on programs and portfolios. It presents

them in the form of overlays which facilitate planning by considering the effects of these additional constraints on a program along with schedule budget and performance constraints The overlays summarize the book's extensive analyses of these global challenges The book is divided into sections on population change climate change and energy resource constraints and provides background information and overlays for each one The author discusses scenarios possible solutions and probable outcomes which provide the basis for evaluating the risks and the sustainability considerations involved The final section of the text addresses planning for real sustainability and describes six pathways toward a sustainable system This practical book familiarizes readers with these new global challenges to program management and provides a basis for developing sustainable and successful programs

War! What Is It Good For? Ian Morris, 2014-04-15 A powerful and provocative exploration of how war has changed our society for the better War What is it good for Absolutely nothing says the famous song but archaeology history and biology show that war in fact has been good for something Surprising as it sounds war has made humanity safer and richer In *War What Is It Good For* the renowned historian and archaeologist Ian Morris tells the gruesome gripping story of fifteen thousand years of war going beyond the battles and brutality to reveal what war has really done to and for the world Stone Age people lived in small feuding societies and stood a one in ten or even one in five chance of dying violently In the twentieth century by contrast despite two world wars Hiroshima and the Holocaust fewer than one person in a hundred died violently The explanation War and war alone has created bigger more complex societies ruled by governments that have stamped out internal violence Strangely enough killing has made the world safer and the safety it has produced has allowed people to make the world richer too War has been history's greatest paradox but this searching study of fifteen thousand years of violence suggests that the next half century is going to be the most dangerous of all time If we can survive it the age old dream of ending war may yet come to pass But Morris argues only if we understand what war has been good for can we know where it will take us next Praise for *War What Is It Good For* Morris's pace is perfect his range dazzling his phrasemaking fluent his humor raucous A rattling good book Felipe Fernandez Armesto *The Wall Street Journal* Ian Morris's evidence that war has benefited our species albeit inadvertently is provocative compelling and fearless This book is equally horrific and inspiring detailed and sweeping lighthearted and dead serious For those who think war has been a universal disaster it will change the way they think about the course of history Richard Wrangham coauthor of *Demonic Males* and author of *Catching Fire* A disturbing transformative text that veers toward essential reading Kirkus Reviews starred review

Futurecide W. Douglas Smith, 2024-04-26 Every civilization in history has faced moments of overwhelming existential crises and they all eventually collapsed Was this failure inherent in the evolution of civilization something within the human species or a combination of both More importantly was it predictable and unavoidable Most civilizations believed they had a special relationship with the divine and were beyond the laws of nature Our current economic civilization is now global and interdependent Today's economy is responsible for the most rapid mass extinction in Earth's history We face imminent catastrophic climate change and environmental disruption yet the same sense of exceptionalism and hubris clouds humanity's judgement and ability to act rationally Environmental disruption is making the planet uninhabitable No economy can consume its way out of scarcity This law of nature conflicts with many longstanding economic theories Sheltered and self absorbed elitists promote lies and prey on humanity's most vulnerable instincts of pecking order conformity and obedience to authority These primal instincts may be maladapted to civilization in its current form Today's elitists are choosing mass extinction in a false belief in their own invincibility To survive humanity can no longer follow delusional leaders to self destruction In non technical language the author explores common phases in the development of past civilizations and the critical junctures and decisions that made collapse inevitable He investigates the linkages and contradictions between human social behavior the economy and the environment In the closing pages he identifies a clear path to redemption
