Jeanie Stiles, 1998 Provides information on tools ropes knots ladders and other equipment and supplies needed for building a tree house and offers five basic designs that can be built **The Virgin in the Treehouse** Willemien De Villiers, 2007 A

South African novel that involves distinctive personalities a woman who lives in a tree house and awaits immaculate conception a failed artist whose deepest desires are only revealed to her in forgotten dreams a wise woman who lives in a red car a tragic domestic worker who only experiences atrocity and a King whose chest is home to a bird of paradise this extraordinary story tells of two sisters and their family as they try to understand the landscapes of their lives With beauty provocation and skill this carefully woven narrative explores the battleground of human relationships and explores the personal and familial consequences of mother daughter estrangement *How to Build Treehouses, Huts and Forts* David

Stiles, 2023-09-21 A treehouse is a wonderful idea but how in the name of creation do you actually build one In this delightfully illustrated handbook David Stiles the unofficial world grandmaster of the treehouse shows how Not assuming anything about the treehouse builder Stiles starts with the basics how to nail how to buy wood what kind of screws and nails to use Then it s on to an A frame design so simple that it can be built in a weekend out of four sheets of plywood followed by lean tos a tree hut and a Tarzan style jungle hideaway There are also forts of every description including a 21 foot tall lookout tower modeled on one George Washington built to keep an eye on the redcoats Stiles also adds a design for a snowball catapult an igloo and even a Nerf loaded cannon Written for children with an adult peeking over their shoulder Stiles s TREEHOUSES HUTS FORTS is a dreamer s handbook offering practical results **Spatial Transparency in**

Architecture Camilo Rosales, 2022-08-12 This volume explores the concept of spatial transparency a form of spatial continuity that articulates depth through permeable layered or porous three dimensional organizations where interstitial light is present Although transparency is a concept largely associated with the modern movement the use of glazed components and twentieth century architectural discourse spatial transparency is a form of depth awareness through intermediate domains takes place through the interstitial fabric of a structure and occurs when several consecutive domains are spatially and visually connected These immersive environments invite active participation not as one way communication but as a series of visual and experiential exchanges interdependencies and relationships Divided into four parts the book examines spatial transparency in massive opaque constructions light constructions glass assemblies and hybrid systems It analyzes both the phenomenon of visual connectivity and continuity through intermediate spaces and spatial transparency s

capacity for promoting and enabling graded interflowing environmental transactions Using historical and contemporary examples it catalogs some of the most common and recurring configurations that manifest these characteristics Over 20 international case studies from the Americas to Japan are presented to argue that environments exist in porous mediums and that by studying the openings voids light and materials of layered and or permeable organizations important insights about space making can be revealed Written for students and academics this book explores various expressions of spatial transparency in architecture and helps connect their abstract ideas with significant built works analytical drawings and comparison charts
