

To replace the battery:

- Align the battery and then push it carefully into the battery cavity. The spring clip holds the battery in position. See **Figure 1.5**.

Figure 1.5 Replacing the battery

***Note** – If you accidentally short the battery's output terminals together, the battery will shut down for self-protection, and the output voltage will be zero. To reset the battery, plug it into the wall charger for a few moments to supply current, which resets the internal protector.*

## Charging the Battery

The battery takes approximately five hours to charge fully. You can charge the battery while it is in the receiver, or you can remove the battery and charge it out of the receiver.

***Note** – Trimble recommends that you charge the battery in the receiver with the receiver switched on. If the receiver is on, the battery reporting is recalibrated at the end of the charging process.*

### Charging the battery in the receiver

1. Insert the battery into the receiver.
2. Turn on the receiver.
