

About the GeoExplorer 6000 series handheld

The GeoExplorer 6000 series includes the GeoXH™ and GeoXT™ handhelds. These handhelds combine a Trimble GNSS receiver with a field computer powered by Microsoft Windows Mobile version 6.5 operating system.

The GeoExplorer 6000 series handheld has built-in Bluetooth® wireless technology for cable-free connection to other devices, and Wi-Fi connectivity for connections to networks. In addition, some GeoExplorer 6000 series handheld editions are equipped with a wireless cellular modem for downloading and transmitting data over the Internet.

The GeoXT handheld uses EVEREST™ multipath rejection technology to provide submeter accuracy. The GeoXH handheld uses both EVEREST and H-Star™ technology to provide decimeter (10 cm) accuracy, either in real time or after postprocessing. In addition, both the GeoXH and GeoXT handhelds are compatible with Trimble Floodlight™ satellite shadow reduction technology for improved productivity in conditions where sky view is obstructed by buildings, trees, or landscape features. For more information, see [Chapter 5, Using the GNSS Receiver](#).

Historical Archaeology of Arkansas Carl Drexler, 2024-01-12 Arkansas's diverse geography spanning the Ozark Mountains, densely forested Timberlands and Mississippi River Delta and its complex Native American and Euro American history belie the inattentive historical treatment the Natural State has thus far received by scholars. Often disparaged as a cultural and intellectual backwater and indeed perhaps best known for President Bill Clinton and Wal-Mart, this overly simplified image of Arkansas shadows a state rich in historic significance and the archaeological record. Carl G. Drexler aims to correct this bias in *Historical Archaeology of Arkansas*. In nine essays that range from Civil War sites to the Ozark Mountains to the nineteenth century Jewish community, Drexler and his contributors present an Arkansas unknown to all but those dedicated individuals working to publicize the state's hidden diversity. The research presented herein depicts a strong state and federal commitment to documenting Arkansas's history, perhaps unmatched by any other state in America, and the success of public archaeology through the efforts of the Arkansas Archaeological Survey. *Historical Archaeology of Arkansas* not only showcases the natural beauty and rich history of Arkansas but it also serves as a primer for historical inquiry for other state and federal organizations looking to bolster their own programs. Carl G. Drexler is the Archaeological Survey's station archaeologist for southwest Arkansas and a research assistant professor with the University of Arkansas. His articles have
