Proceedings of ... ACM/IEEE-CS Joint Conference on Digital Libraries ,2005 **The Digital Challenge for Libraries** Ralph Blanchard,2005 Public and university libraries are at a crossroads hard pressed by competition from Internet search engines declining budgets and changes in popular culture Libraries must respond aggressively Otherwise they will be marginalized by the impact of digital technology on their traditional customer base Author Ralph Blanchard drawing on twenty years of experience as an information services entrepreneur argues that it is irresponsible for librarians to simply turn academic tasks over to search engines as many do Instead libraries should expand digital services and using the tactics and strategies of successful for profit information service businesses reconnect with

their customers by promoting themselves as 21st Century information experts Topics in this wide ranging study include The library as a service business Change risk and unintended consequences The Internet search engine business model Problems with students using search engines The evolution of ambient information Music and information technology Millennials as library customers Hiring and training library information workers Push and viral marketing strategies for libraries The Digital Challenge for Libraries calls for new initiatives by librarians and for a rekindling of interest in the vital role libraries play in an informed prosperous and democratic society

Digital Libraries William Y. Arms, 2001-07-27 The emergence of the Internet and the wide availability of affordable computing equipment have created tremendous interest in digital libraries and electronic publishing This book is the first to provide an integrated overview of the field including a historical perspective the state of the art and current research The term digital libraries covers the creation and distribution of all types of information over networks ranging from converted historical materials to kinds of information that have no analogues in the physical world In some ways digital libraries and traditional libraries are very different yet in other ways they are remarkably similar People still create information that has to be organized stored and distributed and they still need to find and use information that others have created An underlying theme of this book is that no aspect of digital libraries can be understood in isolation or without attention to the needs of the people who create and use information Although the book covers a wide range of technical economic social and organizational topics the focus is on the actual working components of a digital library

Digital Libraries and Digitization Gurdev Singh, 2011 The development of new information technology has created an interest in the development of digital libraries This book provides an overview of the various concepts of digital libraries It covers a wide range of topics related to digital libraries from historical developments to the process of digitization It also offers information on how to do digitization including such topics as e resources digital library services preservation process of digitization e journals e books networks consortia etc The book based on library science research in India will be helpful to those who deal with archiving digitization and preservation of library materials those who are concerned with modernization and digitization of library resources and those who are involved in organizing and establishing digital libraries A special feature of the book is that it consists of a Glossary of words frequently used for digitization and digital libraries Diagrams are given wherever necessary to understand the concepts clearly

Constantopoulos,Ingeborg T. Solvberg,2001-08-27 Digital libraries DLs are major advances in information technology that frequently fall short of expectations 7 28 Covi Kling 7 argue that understanding the wider context of technology use is essential to understanding digital library use and its plementation in different social worlds Recent health informatics research also gues that social and organisational factors can determine the success or failure of healthcare IT developments 8 11 12 Heathfield 11 suggests that this is due to the complex autonomous nature of the medical discipline and the specialized clinician or software engineer approach to system development Negative reactions to these systems is often due to inappropriate system design and poor implementation H ever there may be other less obvious social and political repercussions of information system design and deployment Symon et al 26 have identified within a hospital scenario how social structures and work practices can be disrupted by technology implementation Although these systems often deal with sensitive personal infor tion other system design research has found that apparently innocuous data can be perceived as a threat to social and political stability 1 2 3 To understand the impact of DLs within the medical profession an in depth evaluation is required of the int duction and later development of these applications within their specific social and organisational settings However as Covi Kling 7 have highlighted there are few high level theories that aid designers in understanding the implication of these issues for DL design and implementation

Andrews, 2017-05-15 Digital Libraries Policy Planning and Practice brings together a wealth of international experience in the planning and implementation of digital and hybrid library projects providing a stimulating and informative handbook and reference for library staff and information managers. It consists of chapters contributed by leading specialists from Europe, North America, South Africa and the Middle East who offer their insight into the decision making processes that have shaped a variety of different digitization programmes. Beginning with introductory overviews of the digital library context, the US Digital Library Program and the UK e lib and hybrid library programmes, Digital Libraries then divides into two main sections on policy and planning and implementation and practice. The first explores concerns such as financial and resource planning, digitized compared to born digital content and related service issues, open access to scholarly research archives, policies for and against preservation and their justification and evaluating electronic information services. The second section is based on case studies on major European and North American digital library projects including the Glasgow Digital Library, UCEEL, University of Central England Electronic Library, the Networked Digital Library of Theses and Dissertations, discussed in the context of five international projects, the Indiana University music Variations and Variations2 Project and the beginnings of the Library of Congress digital program and its integration into core library services. The concluding chapter discusses the way forward for digital libraries in the context of experiences at Tilburg University library and possible enabling or limiting factors in the future. The result of drawing together these varied and illuminating experiences is a book that offers useful information and comparisons for all digital library project staff, institutional administrators, educators and developers of learning technology. It also provides useful pointers for researchers and project staff involved in archive and museum projects as well as introducing students to the key ingredients of successful digital libraries.
