Understanding Moral Sentiments Darwinian Perspectives:

Understanding Moral Sentiments Hilary Putnam, 2017-09-08 This volume brings together leading scholars to examine Darwinian perspectives on morality from widely ranging disciplines evolutionary biology anthropology psychology philosophy and theology They bring not only varied expertise but also contrasting judgments about which and to what extent differing evolutionary accounts explain morality They also consider the implications of these explanations for a range of religious and non religious moral traditions The book first surveys scientific understandings of morality Chapters by Joan Silk and Christopher Boehm ask what primatology and anthropology tell us about moral origins Daniel Batson and Stephen Pinker provide contrasting accounts of how evolution shapes moral psychology and Jeffrey Schloss assesses a range of biological proposals for morality and altruism Turning to philosophical issues Martha Nussbaum argues that recognizing our animal nature does not threaten morality Stephen Pope and Timothy Jackson explore how Darwinian accounts of moral goodness both enrich and require understandings outside the sciences Hilary Putnam and Susan Neiman ask whether Darwin is truly useful for helping us to understand what morality actually is and how it functions The book is a balanced effort to assess the scientific merits and philosophical significance of emerging Darwinian perspectives on morality

Evolution and Human Culture Gregory F. Tague, 2016-04-26 *Evolution and Human Culture* argues that values beliefs and practices are expressions of individual and shared moral sentiments Much of our cultural production stems from what in early hominins was a caring tendency both the care to share and a self care to challenge others Topics cover prehistory mind biology morality comparative primatology art and aesthetics The book is valuable to students and scholars in the arts including moral philosophers who would benefit from reading about scientific developments that impact their fields For biologists and social scientists the book provides a window into how scientific research contributes to understanding the arts and humanities The take home point is that culture does not transcend nature rather culture is an evolved moral behavior

Issues in Science and Theology: Do Emotions Shape the World? Dirk Evers, Michael Fuller, Anne Runehov, Knut-Willy Sæther, 2016-04-14

This volume examines emotions and emotional well being from a rich variety of theological philosophical and scientific and therapeutic perspectives To experience emotion is a part of being human but what are emotions How can theology philosophy and the natural sciences unpack the nature and content of emotions This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi Italy It brings together contributions from scholars of various academic backgrounds from around the world whose individual insights are made all the richer by their juxtaposition with those from experts in other fields leading to a unique exchange of ideas

Ideological Fixation Azar Gat, 2022 After theorists around 1960 proclaimed the death of ideology ideological divides and clashes have reemerged with renewed intensity throughout the world including in the liberal democracies In the United States they have become particularly venomous The other side is widely viewed as malicious irrational or downright stupid and often as barely legitimate The zeal

of the opposing sides is often scarcely less than that which characterized the religious ideologies of old. Indeed, historical religious ideologies have largely been replaced by secular religions or religion substitutes. The book is not another survey of past and present ideologies. It is an attempt to understand the cognitive, emotional, and social roots of ideology and ideological fixation. It combines insights from evolutionary psychology regarding the nature of some of our deepest proclivities with a broad sweep through history.

Shadow Sophia Celia E. Deane-Drummond, 2021-02-25. Why do humans who seem to be exemplars of virtue also have the capacity to act in atrocious ways? What are the roots of tendencies for sin and evil? A popular assumption is that it is our animalistic natures that are responsible for human immorality and sin, while our moral nature curtails and contains such tendencies through human powers of freedom and higher reason. This book challenges such assumptions as being far too simplistic. Through a careful engagement with evolutionary and psychological literature, Celia Deane Drummond argues that tendencies towards vice are more often than not distortions of the very virtues that are capable of making us good. After beginning with Augustine's classic theory of original sin, the book probes the philosophical implications of sin's origins in dialogue with the philosophy of Paul Ricoeur. Different vices are treated in both individual and collective settings in keeping with a multispecies approach. Areas covered include selfishness, pride, violence, anger, injustice, greed, envy, gluttony, deception, lying, lust, despair, anxiety, and sloth. The work of Thomas Aquinas helps to illuminate and clarify much of this discussion on vice, including those vices which are more distinctive for human persons in community with other beings. Such an approach amounts to a search for the shadow side of human nature. *Shadow Sophia*: Facing that shadow is part of a fuller understanding of what makes us human, and thus this book is a contribution to both theological anthropology and theological ethics.

The Human Being, the World and God Anne L.C. Runehov, 2016-09-26. This book offers a philosophical analysis of what it is to be a human being in all her aspects. It analyses what is meant by the self and the I and how this feeling of a self or an I is connected to the brain. It studies specific cases of brain disorders based on the idea that in order to understand the common, one has to study the specific. The book shows how the self is thought of as a three-fold emergent self comprising a relationship between an objective neural segment, a subjective neural segment, and a subjective transcendent segment. It explains that the self in the world tackles philosophical problems such as the problem of free will, the problem of evil, the problem of human uniqueness, and empathy. It demonstrates how the problem of time also has its place here. For many people, the world includes ultimate reality; hence, the book provides an analysis and evaluation of different relationships between human beings and Ultimate Reality, God. The book presents an answer to the philosophical problem of how one could understand divine action in the world.

What's Wrong with Morality? Charles Daniel Batson, 2016. Most works on moral psychology consider morality an unalloyed good. Drawing primarily on social psychological theory and research, this book looks at morality as a problem. The problem is that we often fail to live up to our own moral standards. Why?

Problems of Living Dan J. Stein, 2021-05-11. *Problems of Living: Perspectives from Philosophy, Psychiatry*

and Cognitive Affective Science addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living

When Did Sin Begin? Loren Haarsma, 2021-08-17 The question of the historical Adam is a flashpoint for many evangelical readers and churches Science and theology scholar Loren Haarsma who has studied written and spoken on science and faith for decades shows it is possible both to affirm what science tells us about human evolution and to maintain belief in the doctrine of original sin Haarsma argues that there are several possible ways of harmonizing evolution and original sin taking seriously both Scripture and science He presents a range of approaches without privileging one over the others examining the strengths and challenges of each

Theological Ethics Through a Multispecies Lens Celia Deane-Drummond, 2019 This book is the first volume on the evolution of wisdom Using a combination of ethnographic and ethological studies it shows how key moral attributes of compassion justice and wisdom are woven into relationships with animals

God is Watching You Dominic Johnson (Professor of Biopolitics), 2016 The willingness to believe in some kind of payback or karma remains nearly universal Retribution awaits those who commit bad deeds rewards await those who do good Johnson explores how this belief has developed over time and how it has shaped the course of human evolution

Cultural Perceptions of Violence in the Hellenistic World Michael Champion, Lara O'Sullivan, 2017-04-21 Violence had long been central to the experience of Hellenistic Greek cities and to their civic discourses This volume asks how these discourses were shaped and how they functioned within the particular cultural constructs of the Hellenistic world It was a period in which warfare became more professionalised and wars increasingly ubiquitous The period also saw major changes in political structures that led to political and cultural experimentation and transformation in which the political and cultural heritage of the classical city state encountered the new political principles and cosmopolitan cultures of Hellenism Finally and in a similar way it saw expanded opportunities for cultural transfer in cities through re constructions of urban space Violence thus entered the city through external military and political shocks as well as within emerging social hierarchies and civic institutions Such factors

also inflected economic activity religious practices and rituals and the artistic literary and philosophical life of the polis

Left Is Not Woke Susan Neiman, 2023-03-13 If you're woke you're left If you're left you're woke We blur the terms assuming that if you're one you must be the other That Susan Neiman argues is a dangerous mistake The confusion arises because woke is fuelled by traditionally leftwing emotions the wish to stand with the oppressed and marginalized to address historic crimes But those emotions are undermined by widespread philosophical assumptions with reactionary sources As a result wokeism conflicts with ideas that have guided the left for more than 200 years a commitment to universalism a firm distinction between justice and power and a belief in the possibility of progress Without these ideas the woke will continue to undermine their own goals and drift inexorably and unintentionally towards the right One of the world's leading philosophical voices Neiman calls with passion and power for the left to return to the ideals that built the best of the modern world Also available as an audiobook narrated by the author

The Nature and Limits of Human Understanding Anthony Sanford, Philip Nicholas Johnson-Laird, 2003-05-01 This book is an exploration of human understanding from the perspectives of psychology philosophy biology and theology The six contributors are among the most internationally eminent in their fields Though scholarly the writing is non technical No background in psychology philosophy or theology is presumed No other interdisciplinary work has undertaken to explore the nature of human understanding This book is unique and highly significant for anyone interested in or concerned about the human condition

The Returns of Fetishism Charles de Brosses, 2017-07-26 For more than 250 years Charles de Brosses's term fetishism has exerted great influence over our most ambitious thinkers Used as an alternative to magic but nonetheless expressing the material force of magical thought de Brosses's term has proved indispensable to thinkers as diverse as Kant Hegel Marx Freud Lacan Baudrillard and Derrida With this book Daniel H Leonard offers the first fully annotated English translation of the text that started it all *On the Worship of Fetish Gods* and Rosalind C Morris offers incisive commentary that helps modern readers better understand it and its legacy The product of de Brosses's autodidactic curiosity and idiosyncratic theories of language *On the Worship of Fetish Gods* is an enigmatic text that is often difficult for contemporary audiences to assess In a thorough introduction to the text Leonard situates de Brosses's work within the cultural and intellectual milieu of its time Then Morris traces the concept of fetishism through its extraordinary permutations as it was picked up and transformed by the fields of philosophy comparative religion political economy psychoanalysis and anthropology Ultimately she breaks new ground moving into and beyond recent studies by thinkers such as William Pietz Hartmut Böhme and Alfonso Lacono through illuminating new discussions on topics ranging from translation issues to Africanity and the new materialisms

Naturalism, Realism, and Normativity Hilary Putnam, 2016-04-11 Hilary Putnam's writings have shaped epistemology ethics metaphysics philosophy of physics and mathematics and philosophy of mind This volume illustrates his willingness to revisit past arguments above all how to articulate a theory of naturalism which acknowledges that normative phenomena form an ineluctable part of human

experience *The Philosophy of Hilary Putnam* Randall E. Auxier, Douglas R. Anderson, Lewis Edwin Hahn, 2015-05-18 Hilary Putnam who turned 88 in 2014 is one of the world's greatest living philosophers. He currently holds the position of Cogan University Professor Emeritus of Harvard. He has been called one of the 20th century's true philosophic giants by Malcolm Thorndike Nicholson in *Prospect* magazine in 2013. He has been very influential in several different areas of philosophy: philosophy of mathematics, philosophy of language, philosophy of mind, and philosophy of science. This volume in the prestigious Library of Living Philosophers series contains 26 chapters original to this work, each written by a well-known philosopher including the late Richard Rorty and the late Michael Dummett. The volume also includes Putnam's reply to each of the 26 critical and descriptive essays which cover the broad range of Putnam's thought. They are organized thematically into the following parts: Philosophy and Mathematics; Logic and Language; Knowing and Being; Philosophy of Practice and Elements of Pragmatism. Readers will also appreciate the extensive Intellectual Autobiography.

The Bloomsbury Encyclopedia of Philosophers in America John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought, *The Bloomsbury Encyclopedia to Philosophers in America* presents an indispensable reference work. Selecting over 700 figures from the *Dictionary of Early American Philosophers* and the *Dictionary of Modern American Philosophers*, this condensed edition includes key contributors to philosophical thought. From 1600 to the present day, entries cover psychology, pedagogy, sociology, anthropology, education, theology, and political science before these disciplines came to be considered distinct from philosophy. Clear and accessible, each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. Featuring a new preface by the editor and a comprehensive introduction, *The Bloomsbury Encyclopedia to Philosophers in America* includes 30 new entries on twenty-first century thinkers including Martha Nussbaum and Patricia Churchland. With in-depth overviews of Waldo Emerson, Margaret Fuller, Noah Porter, Frederick Rauch, Benjamin Franklin, Thomas Paine, and Thomas Jefferson, this is an invaluable one-stop research volume to understanding leading figures in American thought and the development of American intellectual history.

Evolution and the Foundations of Ethics John Mizzoni, 2017-02-03 If human biological evolution is part of our worldview, then how do commonplace notions of ethics fit in? To ask the question, what does evolution imply about ethics, we must first be clear about what we mean by evolution. *Evolution and the Foundations of Ethics* discusses four models of evolution represented by Darwin, Dawkins, Gould, and Haught. We must also be clear about what we mean by ethics. Do we mean metaethics? If so, which variety? With metaethical theories such as Error Theory, Expressivism, Moral Relativism, and Moral Realism, theorists are attempting to explain the general nature, status, and origins of ethics. In the first four chapters of this book, Part I, John Mizzoni examines how metaethical theories fit with evolution. Next, in asking about the implications of evolution for ethics, do we mean normative ethics? Theorists who work with normative ethical theories such as Virtue Ethics, Natural Law Ethics, Social Contract Ethics, Utilitarian Ethics, Deontological Ethics, and Ethics of Care articulate

and defend a normative ethics that people can and do use in a practical way when deliberating about specific actions rules and policies The next six chapters Part II look at how normative ethical theories fit with evolution A full reckoning of ethics and evolution demands that we consider the range of ethical elements both metaethical and normative Thus this book looks at what several different models of evolution imply about four metaethical theories and six normative ethical theories This book will be of interest to scholars interested in the intersection of evolutionary theory and ethical theory *Altruism and Altruistic Love* Stephen G. Post,Lynn G. Underwood,Jeffrey P. Schloss,William B. Hurlbut,2002-03-28 The concept of altruism or disinterested concern for another s welfare has been discussed by everyone from theologians to psychologists to biologists In this cutting edge book evolutionary neurological developmental psychological social cultural and religious aspects of altruistic behavior are examined by renowned researchers The result is a collaborative and provocative look at one of humanity s essential and defining characteristics
