Understanding Psychological Assessment Perspectives On Individual Differences:

Understanding Psychological Assessment William I. Dorfman, Michel Hersen, 2013-11-11 Introductory texts on psychological testing and evaluation historically are not in short supply Typically however such texts have been relatively superficial in their discussion of clinical material and have focused primarily on the theoretical and psychometric properties of individual tests More practical clinically relevant presentations of psychological instruments have been confined to individual volumes with advanced and often very technical information geared to the more sophisticated user Professors in introductory graduate courses are often forced to adopt several advanced texts to cover the material at the same time helping students wade through unnecessary technical information in order to provide a basic working knowledge of each test Understanding Psychological Assessment is an attempt to address these concerns It brings together into a single volume a broad sampling of the most respected instruments in the psychologist's armamentarium along with promising new tests of cognitive vocational and personality functioning Additionally it presents the most updated versions of these tests all in a practical clearly written format that covers the development psychometrics administrative considerations and interpretive hypotheses for each instrument Clinical case studies allow the reader to apply the interpretive guidelines to real clinical data thereby reinforcing basic understanding of the instrument and helping to insure that both the student and practitioner can actually begin to use the test Understanding Psychological Assessment includes cognitive and personality tests for adults children and adolescents as well as chapters on the theory of psychological measurement and integrated report writing

The Handbook of Adult Clinical Psychology Alan Carr, Muireann McNulty, 2014-03-05 The Handbook of Adult Clinical Psychology provides a reliable source of guidance on the full range of issues associated with conducting evidence based practice in adult mental health Topics covered include general frameworks for practice classification and epidemiology CBT psychodynamic systemic and bio medical models general assessment procedures mood problems depression bipolar disorder and managing suicide risk anxiety problems generalized anxiety disorder panic disorder obsessive compulsive disorder PTSD and social phobia physical health problems somatoform disorders chronic pain adjustment to cancer eating disorders and substance abuse other psychological difficulties schizophrenia borderline personality disorder psychological problems in older adults anger management and depersonalization disorder Each chapter includes useful skill building exercises summaries of the issues covered suggested further reading lists for both psychologists and patients and case material This practical Handbook will prove invaluable to clinical psychologists in training helping them to build the necessary skills to complete a clinical placement in the field of adult mental health The Handbook of Adult Clinical Psychology is one of a set of three handbooks published by Routledge which includes The Handbook of Child and Adolescent Clinical Psychology by Alan Carr and The Handbook of Intellectual Disability and Clinical Psychology Practice Edited by Alan Carr Gary O Reilly Patricia Noonan Walsh and John McEvoy *Comprehensive Handbook of Psychological Assessment, Volume 2* Mark J.

Hilsenroth, Daniel L. Segal, 2004-04-19 Comprehensive Handbook of Psychological Assessment Volume 2 presents the most up to date coverage on personality assessment from leading experts Contains contributions from leading researchers in this area Provides the most comprehensive up to date information on personality assessment Presents conceptual information about the tests **Psychological Assessment and Therapy with Older Adults** Bob G. Knight, Nancy A.

Pachana, 2015-01-08 Due to improvements in health and healthcare the elderly population is expanding rapidly within the developed world However more and more elderly people require some form of psychological support at some point in their later years The types of problems faced by this population are quite distinct and often more complex than those faced by younger adults and throw up many new challenges in both assessment and treatment Though there are books available that focus individually on assessment or treatment few have combined the two into a single framework Within this book Knight and Pachana argue that psychological assessment needs to be more tightly integrated with therapy especially with older adult clients Using the Contextual Adult Lifespan Theory for Adapting Psychotherapy CALTAP as a framework for applying our knowledge about developmental social contextual and cohort generational factors that influence age differences in response to psychological assessment and therapy they present an integrated framework for psychological assessment and therapy with older adults This text is valuable for practitioners looking for a solid theoretical basis for the practice of assessment and therapy with older clients students in graduate courses looking at later lifespan issues and educators looking for material to enhance generalist psychotherapy courses with a lifespan perspective **Essentials of**
