The Seductiveness of Virtue John J. Fitzgerald, 2016-12-15 John J Fitzgerald addresses here one of life's enduring questions how to achieve personal fulfillment and more specifically whether we can do so through ethical conduct He focuses on two significant twentieth century theologians Rabbi Abraham Joshua Heschel and Pope John Paul II seeing both as fitting dialogue partners given the former's influence on the Second Vatican Council's deliberations on the Jews and the latter's groundbreaking overtures to the Jews in the wake of his experiences in Poland before and during World War II Fitzgerald demonstrates that Heschel and John Paul II both suggest that doing good generally leads us to growth in various components of personal fulfillment such as happiness meaning in life and freedom from selfish desires There are however some key differences between the two theologians John Paul II emphasizes more strongly the relationship between acting well and attaining eternal life whereas Heschel wrestles more openly with the possibility that religious commitment ultimately involves anxiety and sadness By examining historical and contemporary analyses including the work of the Fourteenth Dalai Lama the philosopher Peter Singer and some present day psychologists Fitzgerald builds a narrative that shows the promise and limits of Heschel's and John Paul II's views

Ontologized Ethics Elvis Imafidon, John Ayotunde Isola Bewaji, 2013-11-21 Ontologized Ethics New Essays in African Meta Ethics examines an often neglected meta ethical issue in African philosophical discourse the extent to which one's orientation of being or idea of what is as an individual or as a group of persons does or should determine one's concept of the good To what extent is ethics or our idea of what is permissible or impermissible grounded on ideas of what fundamentally exists or what it means to be The aim of this collection of essays with emphasis on an African philosophical context will be to establish more firmly and vigorously whether there is an intrinsic link between ontology and morality that is whether and if so how the proper norms for human actions can be explained and validated once we make lucid ideas about metaphysical topics such as human nature community relationality and spirituality The essays included in this volume focus rigorously on ethical issues such as communalism adultery environmental ethics and bioethics with the primary aim of showing whether the link between such issues and metaphysical beliefs is trivial or intrinsic

Peterson, 2001-05-26 Being Human is one of the few books that begins to integrate theological narratives with scientific ones looking for a compelling correlation between them where modern and religious sensibilities might both be affirmed This is a unique work Bron Taylor Professor and Director of Environmental Studies University of Wisconsin Oshkosh and author of Ecological Resistance Movements The Global Emergence of Radical and Popular Environmentalism Being Human succeeds at accounting for people's conception of humanness and human's relationship with nature no easy task but one that is a crucial starting point for any discussion of environmental ethics Kay Read Associate Professor of Comparative Ethics and Native American Religions DePaul University and author of Time and Sacrifice in the Aztec Cosmos Anna Peterson's Being Human is a stellar work of integration Peterson argues that the ideology of human exceptionalism and disconnection from the rest of nature is a major source of social and ecological harm She draws together cultural constructionist Asian Native American feminist and evolutionary thought to present a view of the human as both an integral part of nature and a creator of culture called to develop an ethic of interrelationality for the sake of the wellbeing of the whole earth community Rosemary Radford Ruether Garrett Theological Center author of Gaia and God An Ecofeminist Theology of Earth Healing In the postmodern academic climate of slice and dice take no prisoners analysis and critical theory Anna Peterson's book is a welcome breath of fresh air She positions her discussion as a development of rather than a

deconstructive triumph over earlier work in the field of environmental philosophy Peterson takes up the themes that are absolutely central to the field the nature of nature human nature and the appropriate relationship between the two Her conclusions are well informed well reasoned reasonable and last but not least beautifully and engagingly expressed Baird Callicott Professor of Philosophy and Religion Studies University of North Texas and author of *Earth's Insights A Multicultural Survey of Ecological Ethics from the Mediterranean Basin to the Australian Outback* California 1997 *In Defense of the Land* Essays in Environmental Philosophy and *Beyond the Land Ethic* More Essays in Environmental Philosophy Peterson challenges us to think critically about the ideas about nature and humanity that shape our ethical behavior She also brings into critical dialogue insights from a wide variety of religious traditions Buddhist Taoist Navaho Koyukon Catholic and Protestant Peterson helps us think creatively and critically about the task of comparative ethics and the imperatives of environmental ethics This book is a must read for any one concerned with environmental ethics and with comparative ethics Sharon Welch Professor of Religious Studies at the University of Missouri Columbia and author of *A Feminist Ethic of Risk Sweet Dreams in America Making Ethics and Spirituality Work* and *Communities of Resistance and Solidarity A Feminist Theology of Liberation* *Wrestling with God* Cecelia Lynch, 2020-03-12 Explores the ethical tensions impacting Christian practice in international politics from early missions to contemporary humanitarianism [Comparative Religious Ethics](#) Charles T. Mathewes, Charles Mathewes, Matthew Puffer, Mark Storslee, 2014-08-15 SPECIAL INTRODUCTORY PRICE Valid until 3 months after publication No collection of this sort has yet been conceived of let alone accomplished in this field In part that may well be due to the extraordinarily nascent character of the field of comparative religious ethics described as that as opposed to Christian ethics for example Yet the aim is not simply to gather together a number of pieces but with the appropriate modesty and tentativeness to offer one picture of how the field ought to understand itself its past present and perhaps its future A critical mass of scholars has now emerged in this area and the institutional dynamics of religious studies departments which are increasingly seeing the attractions of classes in comparative ethics are favorable as well By gathering together both classic statements exemplifying paradigmatic approaches in the field and recent ground breaking and innovative works the ambition is to make this collection the gold standard for anyone working on the field of comparative religious ethics in coming decades **Works Righteousness** Anna L. Peterson, 2020-10-19 *Works Righteousness* explores the ways that different ethical theories relate to what people actually do Peterson argues that the most dominant philosophical and religious approaches have largely ignored practice assuming that internal mental states are what matter for ethics and that ideas and practices are related in a simple linear fashion However some alternative models including pragmatism Marxism and religious pacifism present a more complex view of the relations between values and practices These traditions show how attention to practices opens up new ways of thinking about moral theory and concrete issues like hate speech euthanasia and climate change **Our Bodies Belong to God** Sherine Hamdy, 2012-03-13 This book analyzes

the national debate over organ transplantation in Egypt as it has unfolded during a time of major social and political transformation including mounting dissent against a brutal regime the privatization of health care advances in science the growing gap between rich and poor and the Islamic revival

Treating the Body in Medicine and Religion John J. Fitzgerald, Ashley John Moyse, 2019-05-09 Modern medicine has produced many wonderful technological breakthroughs that have extended the limits of the frail human body However much of the focus of this medical research has been on the physical often reducing the human being to a biological machine to be examined understood and controlled This book begins by asking whether the modern medical milieu has overly objectified the body unwittingly or not and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person In response various authors here suggest that a more theological religious approach would be helpful or perhaps even necessary Presenting specific perspectives from Judaism Christianity and Islam the book is divided into three parts Understanding the Body Respecting the Body and The Body at the End of Life A panel of expert contributors including philosophers physicians and theologians and scholars of religion answer key questions such as What is the relationship between body and soul What are our obligations toward human bodies How should medicine respond to suffering and death The resulting text is an interdisciplinary treatise on how medicine can best function in our societies Offering a new way to approach the medical humanities this book will be of keen interest to any scholars with an interest in contemporary religious perspectives on medicine and the body
