Supercinema William Brown, 2013-05-01 Drawing on a variety of popular films including Avatar Enter the Void Fight Club The Matrix Speed Racer X Men and War of the Worlds *Supercinema* studies the ways in which digital special effects and editing techniques require a new theoretical framework in order to be properly understood Here William Brown proposes that while analogue cinema often tried to hide the technological limitations of its creation through ingenious methods digital cinema hides its technological omnipotence through the use of continued conventions more suited to analogue cinema in a way that is analogous to that of Superman hiding his powers behind the persona of Clark Kent Locating itself on the cusp of film theory film philosophy and cognitive approaches to cinema *Supercinema* also looks at the relationship between the spectator and film that utilizes digital technology to maximum supercinematic effect

Rodowick, 2009-06-30 As almost every aspect of making and viewing movies is replaced by digital technologies even the notion of watching a film is fast becoming an anachronism With the likely disappearance of celluloid film stock as a medium and the emergence of new media what will happen to cinema and to cinema studies In the first of two books exploring this question Rodowick considers the fate of film and its role in the aesthetics and culture of the twenty first century Doing Digital Film History Sarah-Mai Dang, Tim van der Heijden, Christian Gosvig Olesen, 2024-12-30 How has the digital turn shaped the practices of film historical research and teaching While computational approaches have been used by film historians since the 1960s and 1970s the arrival and use of digital tools and methods in recent decades has fundamentally changed the ways we search analyze interpret present and so think and write about film history from digital archival and curatorial practices data driven search and analysis of film historical collections to the visualization and dissemination of film historical materials online While film historians have increasingly embraced the new possibilities brought by digital technologies their practical epistemological and methodological implications need further exploration What opportunities does the digitization of film historical sources provide for film historians What new questions can be raised by using digital methods What new perspectives emerge from analyzing interpreting and visualizing film historical data at the levels of both close and distant or scalable reading and viewing By focusing on the concepts tools and practices of digital film historiography this edited volume aims to contribute to a better understanding and critical reflection on the changes and continuities of doing film history in the digital age **The Cinema of Stephanie Rothman** Alicia Kozma, 2022-09-20 The rare woman director working in second wave exploitation Stephanie Rothman b 1936 directed seven successful feature films served as the vice president of an independent film company and was the first woman to win the Directors Guild of America s student filmmaking prize Despite these career accomplishments Rothman retired into relative obscurity In The Cinema of Stephanie Rothman Radical Acts in Filmmaking author Alicia Kozma uses Rothman s career as an in depth case study intertwining historical archival industrial and filmic analysis to grapple with the past present and future of women s filmmaking labor in Hollywood Understanding second wave exploitation filmmaking as a transitory space for the industrial development of contemporary Hollywood that also opened up opportunities for women practitioners Kozma argues that understudied film production cycles provide untapped spaces for discovering women s directorial work The professional career and filmography of Rothman exemplify this claim Rothman also serves as an apt example for connecting the structure

of film histories to the persistent strictures of rhetorical language used to mark women filmmakers and their labor Kozma traces these imbrications across historical archives Adopting a diverse methodological approach The Cinema of Stephanie Rothman shines a needed spotlight on the problems and successes of the memorialization of women s directorial labor connecting historical and contemporary patterns of gendered labor disparity in the film industry This book is simultaneously the first in depth scholarly consideration of Rothman the debut of the most substantive archival materials collected on Rothman and a feminist political intervention into the construction of film histories **Emerging Research on Networked**
