Subject Guide to Books in Print, 2001 *America and the Americans in Postwar British Fiction* Stephan-Alexander Ditzel, 2006 National images have

been firmly established in western literatures since classical antiquity Since the seventeenth century these images have made an impact on the reception of the literary works in question and have influenced the production of later generations of writers Despite this early interest of artists in national images it was not until the early twentieth century that such images were addressed by literary scholarship However imagology a branch of Comparative and General Literature is still marked by a widespread terminological incoherence The present study wants to help eliminate this deficit To this end the basic notions image and stereotype are unambiguously defined and made applicable for practical criticism by using the newly coined concept of *imagene* and a structuralist model of images The explanatory power of the conceptual framework proposed is demonstrated by in depth analyses of five British novels of the second half of the twentieth century which focus on the United States of America and its inhabitants
