Western Hemisphere Immigration and United States Foreign Policy Christopher Mitchell, 2010-11-01 **Migration in the Caribbean** James Ferguson, 2003 This report aims to cast light on the conditions experienced by often invisible minority migrant workers in the Caribbean looking at established patterns and newer forms of migration It examines the continuing plight of Haitian cane cutters in the Dominican Republic as well as the situation of those employed in other sections of the economy Exploring further dimensions of the Haitian diaspora it assesses the growing controversy surrounding many thousands of people born in the Dominican Republic but denied Dominican citizenship The author James Ferguson also considers how and why a significant number of Dominicans escape their own country in search of a better life The report concentrates on the island of Hispaniola shared between Haiti and the Dominican Republic for the issue of migration is most acute and controversial here but also considers less known migrant experiences in the Caribbean back cover

Migrant and Tourist Encounters Andrea Easley Morris, 2020-05-13 Migrant and Tourist Encounters The Ethics of Im mobility in 21st Century Dominican and Cuban Cultures analyzes the effects of clashing flows of voluntary and involuntary travelers to and from these countries due to an increase in migration and tourism during the last three decades I compare the ways in which literary works and films reflect on and critique the power relations and ethics of im mobility and encounter both on the islands and in destinations abroad The works draw attention to the interconnectedness of migration tourism and other forms of travel as well as immobility and portray growing local and global inequalities through characters disparate access to free voluntary movement I consider how the works respond to the question of the moral potential of encounters produced by im mobilities and the possibility of

connection across differences I argue that Dominican and Cuban artists not only critique neo colonial paradigms of power and im mobility but envision and enact strategies for belonging and in some cases suggest a path toward de colonial cosmopolitanism

Constructed Latinx(s) Identities José I. Lara, 2025-09-09 *Constructed Latinx s Identities Racialized Bodies in Visual and Textual Culture* consists of ten interdisciplinary essays that discuss recent forms and interpretations of the histories and traditions of the Latinx communities present in film literature television and other cultural expressions Using specific case studies the authors of this collection delve into the intersections of identity in Latinx production and representation and challenge the colonial and modern power structures that have continuously racialized and gendered Latinx bodies In addition to deconstructing these power structures the chapters attempt to recover knowledge buried or shunned by colonialism and modernity as well as offer alternative and nonhierarchical forms of defining Latinx and forming pluri identity and multivoiced communities The concept of Latinx continues to evolve to be renegotiated and to be embedded with new meanings and subjectivities As such all chapters not only encourage further debate about racialization and the interaction of the various historical political and social contexts in identity formation but also propel all scholars to question their positionality when approaching the concept of Latinx

International Migration from the Dominican Republic Antonio Ugalde, Frank D. Bean, Gilbert Cardenas, 1979

Between Two Islands Sherri Grasmuck, Patricia R. Pessar, 2023-11-15 Popular notions about migration to the United States from Latin America and the Caribbean are too often distorted by memories of earlier European migrations and by a tendency to generalize from the more familiar cases of

Mexico and Puerto Rico *Between Two Islands* is an interdisciplinary study of Dominican migration challenging many widespread yet erroneous views concerning the socio economic background of new immigrants and the causes and consequences of their move to the United States Eschewing monocausal treatments of migration the authors insist that migration is a multifaceted process involving economic political and socio cultural factors To this end they introduce an innovative analytical framework which includes such determinants as the international division of labor state policy in the sending and receiving societies class relations transnational migrant households social networks and gender and generational hierarchies By adopting this multidimensional approach Grasmuck and Pessar are able to account for many intriguing paradoxes of Dominican migration and development of the Dominican population in the U S For example why is it that the peak in migration coincided with a boom in Dominican economic growth Why did most of the immigrants settle in New York City at the precise moment the metropolitan economy was experiencing stagnation and severe unemployment And why do most immigrants claim to have achieved social mobility and middle class standing despite employment in menial blue collar jobs Until quite recently studies of international migration have emphasized the male migrant while neglecting the role of women and their experiences Grasmuck and Pessar s attempt to remedy this uneven perspective results in a better overall understanding of Dominican migration For instance they find that with regard to wages and working conditions it is a greater liability to be female than to be without legal status They also show that gender influences attitudes toward settlement return and workplace struggle Finally the authors explore some of the paradoxes created by Dominican migration The material success achieved by individual migrant households contrasts starkly with increased socio economic inequality in the Dominican Republic and polarized class relations in the United States This is an exciting and important work that will appeal to scholars and policymakers interested in immigration ethnic studies and the continual reshaping of urban America Popular notions about migration to the United States from Latin America and the Caribbean are too often distorted by memories of earlier European migrations and by a tendency to generalize from the more familiar cases of Mexico and Puerto Rico

it concludes that all three exploited foreign labor Refuting modern slavery charges through social science theory and extensive field research this study suggests these charges resulted from superficial analyses of symbols In depth analyses display one of the 20th century s most extensive forms of super exploitation **Caribbean Security in the Age of Terror**
