The most energy is available in the producer's level which is the base of the pyramid. The energy available reduces as you move up the pyramid which would be as you move from producers to consumers.

90% of the energy in a trophic level is used by the organism for living processes such as growth, movement, reproduction, etc.
7. Why does the number of organisms decrease as you move up the pyramid?
The organisms become larger therefore require more energy. It becomes harder to fulfill the energy requirements so the populations are not as large.
