Power, Legal Education, and Law School Cultures Meera Deo,Mindie Lazarus-Black,Elizabeth Mertz,2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within

law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula The contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty

Mixed Legal Systems, East and West Vernon Valentine Palmer, Mohamed Y. Mattar, 2016-07-22 Advancing legal scholarship in the area of mixed legal systems as well as comparative law more generally this book expands the comparative study of the world's legal families to those of jurisdictions containing not only mixtures of common and civil law but also to those mixing Islamic and or traditional legal systems with those derived from common and or civil law traditions With contributions from leading experts in their fields the book takes us far beyond the usual focus of comparative law with analysis of a broad range of countries including relatively neglected and under researched areas The discussion is situated within the broader context of the ongoing development and evolution of mixed legal systems against the continuing tides of globalization on the one hand and on the other hand the emergence of Islamic governments in some parts of the Middle East the calls for a legal status for Islamic law in some European countries and the increasing focus on traditional and customary norms of governance in post colonial contexts This book will be an invaluable source for students and researchers working in the areas of comparative law legal pluralism the evolution of mixed legal systems and the impact of colonialism on contemporary legal systems It will also be an important resource for policy makers and analysts
