Patents Marc Baudry, Béatrice Dumont, 2017-11-02
The patent system is criticized today by

some practitioners and economists In fact there is a partial disconnection between patent demographics and productivity gains but also the development of actors who do not innovate and who develop business models that their detractors equate with a capture of annuities or a dangerous commodification of patents This book provides a less Manichaeian view of the position of patents in the system of contemporary innovation It first recalls that these criticisms are not new before arguing that if these criticisms have been revived it is because of a partial shift from an integrated innovation system to a much more fragmented and open system This shift accompanied the promotion of a more competitive economy The authors show that this movement is coherent with a more intensive use of patents but also one that is more focused on their signal function than on their function of direct monetary incentive to innovation *University of Chicago Law Review: Volume 80, Number 4 - Fall 2013* University of Chicago Law Review,2014-01-02 This fourth issue of 2013 features articles from internationally recognized legal scholars and extensive research in Comments authored by University of Chicago Law School students Contents of Vol 80 No 4 include ARTICLES Bankruptcy Law as a Liquidity Provider by Kenneth Ayotte David A Skeel Jr Impeaching Precedent by Charles L Barzun Copyright in Teams by Anthony J Casey Andres Sawicki Inside or Outside the System by Eric A Posner Adrian Vermeule REVIEW ESSAY Francis Lieber and the Modern Law of War by Paul Finkelman COMMENTS Having Their Cake and Eating It Too Post emancipation Child Support as a Valid Judicial Option by Lauren C Barnett Equal Opportunity Federal Employees Right to Sue on Title VII and Tort Claims by Kristin Sommers Czubkowski Using Severability Doctrine to Solve the Retroactivity Unit of Analysis Puzzle A Dodd Frank Case Study by Hannah Garden Monheit I Didn t Do It Third Party Debtors and the Securities Law Violation Exception to Discharge by Hillel Nadler Super Contacts Invoking Aiding and Abetting Jurisdiction to Hold Foreign Nonparties in Contempt of Court by Julia K Schwartz Taking Leases by Nicholas Spear Disability Claims Guidance Documents and the Problem of Nonlegislative Rules by Frederick W Watson Quality ebook editions feature active Contents linked footnotes and linked URLs in notes [The Story of Constitutions](#) Wim Voermans,2023-11-02 Adopts an interdisciplinary approach to trace the surprising story of written constitutions since the agricultural revolution of c 10 000 B C [The Routledge International Handbook of Criminal Responsibility](#) Thomas Crofts,Louise Kennefick,Arlie Loughnan,2024-12-23 Presenting cutting edge research and scholarship this extensive volume covers everything from abstract theorising about the meanings of responsibility and how we blame to analysing criminal law and justice responses and factors that impact individual responsibility Inviting exchanges across a burgeoning critical scholarship on criminal responsibility this Handbook showcases the diverse range of methodologies applied to the field including socio political approaches critical historical methods criminological and sociological perspectives and interdisciplinary studies bridging law and the mind sciences Spanning global networks of established and emerging scholars of responsibility for crime this book explores how we relate to one another as human beings under the spotlight of the criminal law In doing so it is hoped that the collection not only does justice to the vibrant landscape of

Prosecutorial Discretion in the International Criminal Court Farid Mohammed Rashid, 2021-12-15 This book provides the first scholarly investigation of prosecutorial discretion in the International Criminal Court ICC from an interdisciplinary perspective This work analyses the discretionary power of the ICC prosecutor and its scope It explains that there is a tendency to overlook the necessity of distinguishing between the various usages of discretion when exercised as a power authorised by the law and effect when applying indeterminate legal thresholds The author argues that the latter indeterminacy may give decision makers an unwarranted opportunity to exercise a wide range of discretion where extra legal factors may be considered In comparison prosecutorial discretion allows decision makers to consider extra legal considerations This book also discusses the relevance of political considerations within the decision making process in the context of the exercise of prosecutorial discretion It suggests that there need not be a conflict between the broad sense of justice as outlined in the Statute and political factors in giving effect to decisions This book will be of interest to students of international law global governance and international relations

Literature and Citizenship in the Age of Revolution Mitchell Gauvin, 2024-09-11 Citizenship is at the forefront of popular imagination as political movements and state governments around the world traffic in anti immigrant rhetoric and call for increased policing of borders Literature and Citizenship in the Age of Revolution A Wish for Air and Liberty looks back to a critical historical juncture in the development of citizenship to uncover how literature contoured and contested imaginings of citizenship While territory and the nation state often frame our understanding of citizenship this book focuses on how non citizens foreigners and

strangers have long been central to citizenship's coherence. Rather than rootedness, literary texts exposed the circulations of persons, ideas, and affections at the heart of citizenship. This book brings together an unlikely combination of writers: Olaudah Equiano, Jane Austen, Mary Shelley, and Herman Melville to show how literature in the Age of Revolution exposed contradictions in notions of liberty and slavery that impacted how citizenship was conceived and practiced.

Institutions and Accounting Practices after the Financial Crisis Victoria Krivogorsky, 2019-01-30 Financial globalization paired with the relaxation of constraints on capital flows between countries before the 2008 crisis increased merger activities among the World's largest stock exchanges. The financial crisis of 2008 had a severe impact on the development of equity markets, corporate financial stability, and corporate governance, and a multi-step approach is needed to fully appreciate the causes and effects of this event. This book engages the separate strands of literature to advance a more holistic understanding of whether and how the national institutional environments in selected countries around the world have been changed after the crisis. *Institutions and Accounting Practices after the Financial Crisis: International Perspective* sets out a framework for the analysis of institutional environments and accounting practices in selected countries around the world during the pre-crisis period, followed by an examination of the impact of the crisis. It scrutinizes the changing roles of debt and equity markets, the shift in accounting practices and capital financing choices due to the economic downturn, and the lessons that can be obtained from the financial crisis while considering the institutional architecture of international business environments. This ongoing process of integration and globalization increases interdependence between world markets and allows shocks to propagate across national and continental lines, making the understanding of international markets vitally important to American investors. Aimed at primarily researchers, academics, and students in the fields of international accounting, management, and finance, *Institutions and Accounting Practices after the Financial Crisis: International Perspective* will additionally be of value to practitioners and policy makers, supplying them with information regarding the changes in accounting practices and risk evaluation due to the crisis.

The Affordable Care Act Decision Fritz Allhoff, Mark Hall, 2014-02-18 Interest in *NFIB v Sebelius* has been extraordinarily high from as soon as the legislation was passed through lower court rulings, the Supreme Court's grant of certiorari, and the decision itself, both for its substantive holdings and the purported behind-the-scenes dynamics. Legal blogs exploded with analysis; bioethicists opined on our collective responsibilities; and philosophers tackled concepts like coercion and the activity/inactivity distinction. This volume aims to bring together scholars from disparate fields to analyze various features of the decision. It comprises over twenty essays from a range of academic disciplines, namely law, philosophy, and political science. Essays are divided into five units: context and history; analyzing the opinions; individual liberty; Medicaid and future implications.

The Right to Equality in European Human Rights Law Charilaos Nikolaidis, 2014-07-25 A right to equality and non-discrimination is widely seen as fundamental in democratic legal systems. But failure to identify the human interest that equality aims to uphold reinforces the argument of

those who attack it as morally empty or unsubstantiated and weakens its status as a fundamental human right This book argues that an understanding of the human interest which equality aims to uphold is feasible within the jurisprudence of the European Court of Human Rights ECtHR and the European Court of Justice ECJ In comparing the evolution of the prohibition of discrimination in the case law of both Courts Charilaos Nikolaidis demonstrates that conceptual convergence within the European Convention on Human Rights ECHR and the EU on the issue of equality is not as far as it might appear initially While the two bodies of equality law are extremely divergent as to the requirements they impose their interpretation by the international judiciary might be properly analysed under a common light to emphasise the substantive dimension of equality in European Human Rights law The book will be of great use and interest to scholars and students of human rights discrimination law and European politics

Protection Vol. 4 Don Tustin, 2024-12-01 This book provides an overview of changes in legislation in Australia concerning both family law and child protection law The topic is important as the Australian Government has identified that the rate of mental disorder in some cohorts of children is high and rising These cohorts of children live in families where they are vulnerable because they are exposed to risk factors that can be changed by a coordinated effort from parents therapists and lawyers The aim of the book is to identify psycho legal concepts that need to be understood by professionals who work in the fields of child custody and child protection and to bring these concepts together to improve coordination between the two fields of practice The purpose of the book is to be a practice manual for professionals from the disciplines of law social work and psychologists who work in specialized legal roles dealing with families where children are vulnerable to developing mental health difficulties Volume 4 of the book provides a perspective from a mental health clinician about concepts and principles that arise in Australian family oriented courts and that need to be shared between disciplines This book proposes that some concepts be identified as psycho legal as the concepts need to be shared between disciplines who work with court involved families The book also proposes that psycho legal concepts be shared between the jurisdictions of child custody and child protection In this book proposals are made to improve collaboration between disciplines and to maximize the best interests of children

Infanticide Rachel Dixon, 2023-02-02 Infanticide examines medical expert evidence in infanticide cases focusing specifically on the shifting notion of certainty in medical testimony Beginning in the Early Modern period and concluding in the mid twentieth century it considers how courts determined whether an infant died from natural causes or other reasons including violence The book explores expert evidence in cases of infanticide and examines the extent of certainty created by medical specialists who founded their testimony on anatomical exploration and science As the book progresses it becomes clear that medical specialists were unable to scientifically establish cause of death and in doing so conveyed uncertainty in court proceedings Rather than being regarded as a professional failing Dixon argues that the uncertainty created by medical specialists redirected the outcomes of infanticide cases The combination of uncertainty and

the changing perceptions of infanticidal women by the court lead juries to find infanticidal women not guilty of a capital offence in many cases This book will be of great interest to students and scholars of Criminology Law and History **The Digital Rights Delusion** Andrea Monti,2023-03-31 This book examines the ever increasing impact of technology on our lives and explores a range of legal and constitutional questions that this raises It considers the extent to which concepts such as cyberspace and digital rights advance or undermine our understanding of this development and proposes a number of novel approaches to the effective protection of our rights in this rapidly evolving environment Finally it shows how the abuse of the adjective digital has demoted legal rights into subjective and individual claims The work will be of particular interest to scholars of privacy artificial intelligence and free speech as well as policymakers and the general reader Controllable Artificial Intelligence and the Future of Law Hugo Luz dos Santos,2025-11-08 This book broaches the newly crafted concept of algorithmic dictatorship that draws on a plethora of human biases that creep into the algorithm and feeds into an automated decision that comes to the expense of citizens lives freedoms health property fair lending and credit scoring This book sheds a keen light on the slew of reasons in view of which artificial intelligence should be both interpretable and controllable as opposed to merely explainable The reason for that is straightforward the skewed data baked into the bigoted algorithms machine biases spawns harrowing effects with which criminal justice has been grappling for a long haul drawn out Tallyingly and perhaps unsurprisingly law enforcement evinces biases that run along both gender and race lines No surprise springs from the fact that computer generated algorithms that propel predictive policing are often flagged as tools whereby racial discrimination abounds It should not therefore be pegged as flabbergasting that this sort of shady algorithmic governance is a byproduct of a grueling algorithmic dictatorship that is shaping up to crumble the foundations of Rule of Law upon which stands modern societies This is one of the key takeaways of this book Disturbingly enough brain computer interfaces are poised to be converted into shady tools to collate gauge thoughts emotions sentiments and crime related information that would be otherwise inaccessible to the governments rogue nations or unscrupulous actors prying eyes Much to our dismay an eerily dystopian world is unfolding before our very eyes This is the gist of transhumanism a byproduct of convolutional neural networks that revolve around deep learning genetic algorithms that will overhaul the current legal landscape beyond recognition This book charts the path ahead as to draw set in stone boundaries to prevent jurisdictions from careening into the chaos of genetic plutocracy that should be wished away The Normative Foundations of European Competition Law Oles Andriychuk,2017-08-25 Does competitive process constitute an autonomous societal value or is it a means for achieving more meritorious goals welfare growth integration and innovation The hypothesis of The Normative Foundations of European Competition Law is that the former is the case This insightful book analyses the phenomenon of competition from philosophical legal and economic perspectives demonstrating exactly why competitive process should not be viewed only as an instrument It consolidates various normative theories of freedom market and competition and explains

how exactly they can be operationalized effectively in the matrix of the EU competition policy
