Theories and Practices of Development Katie Willis, 2011-02-25 Global economic crisis and the implications of global environmental change have led academics and policy makers to consider how development in all parts of the world should be achieved However development has always

been a contested idea While often presented as a positive process to improve people s lives the potential negative dimensions of development on people and environments must also be recognized Theories and Practices of Development provides a clear and user friendly introduction to the complex debates around how development has been understood and achieved The second edition has been fully updated and expanded to reflect global political and economic shifts as well as new approaches to development The rise of China and India is given particular attention as is the global economic crisis and its implications for development theories and practice There are new sections on faith based development and the development dimensions of climate change as well as greater engagement with development theories as they are put into practice in the Global North The book deals with the evolution of development ideas and policies focusing on economic political social environmental and spatial dimensions It highlights how development cannot be considered as a neutral concept but is entwined with inequalities in power at local as well as national and global scales The use of boxed examples tables and illustrations helps students understand complex theoretical ideas and also demonstrates how development theories are put into practice in the real world Each chapter ends with a summary section discussion topics suggestions for further reading and website resources

Managing Europe's Water Resources Chad Staddon,2010 Illustrated with case studies explaining key concepts and providing practical examples this book forms a comprehensive introduction to water management issues from a European perspective Initially detailing the history of water management the book then puts forward the major frameworks used for managing water and provides a synoptic treatment of major water management issues in all 27 EU nations *Urban Water Supply and Governance in India* Satyapriya Rout,Ruth Kattumuri,2022-05-15 This book investigates institutional dimensions of urban water supply in India with a specific focus on institutional capabilities to provide drinking water to urban households in an efficient equitable and sustainable manner This book has been developed through empirical research within the context of growing urbanisation and increasing water needs of Indian cities and the wider developmental goal of achieving universal and equitable access to safe and affordable water for all as envisaged in goal 6 of the SDGs This study revolves around three important aspects of urban water supply and governance Firstly it attempts to understand household water service delivery scenarios in urban India drawing from case studies based on our household survey in four cities Ahmedabad Bangalore Kochi and Hyderabad Secondly it examines the question of existing socio economic inequality and access to water in an urban context in India While dealing with the issue of inequality and access to water it attempts to explore the question of whether access to water and water scarcity is socially neutral whilst also analysing the mechanisms employed by the urban poor to manage their daily water needs Thirdly this book explores the role of institutions for efficient and effective delivery of water in urban India The institutional analysis from a comparative perspective provides important insights to guide current reforms in domestic water supply in India especially in a neo liberal context The book is a valuable resource for academicians policy makers and practitioners involved in water governance in general and domestic drinking

water supply in particular Besides it is of great interest to those working in the area of urban development urban planning and household water management The book is an outcome of a collaborative research project by the authors sponsored jointly by University Grants Commission UGC New Delhi and UK India Education and Research Initiative UKIERI *Water Resources Management and Water Pollution Control* Zhanhong Wan,2024-03-11 This book features select peer reviewed proceedings from the 6th International Symposium on Water Pollution and Treatment ISWPT 2023 It comprises articles written by researchers practitioners policymakers and entrepreneurs that examine recent advancements in water pollution and treatment The book covers a range of topics including the impact of climate change on water pollution and technologies for reducing greenhouse emissions in water and wastewater treatment Additionally it explores water resources planning and management water quality protection and technologies and processes that control water pollution This book is useful for beginners researchers and professionals working in the area of water pollution management policy and governance **The Role of Law in Transboundary River Basin Disputes** Chukwuebuka Edum,2023-12-22 This book examines the role legal rules play in the resolution of disputes in transboundary river basins When states fail to resolve disputes over shared water resources many cast such failures on inadequate or ineffective legal rules With this view in mind this book examines the role that legal rules do and can play in aiding the peaceful settlement of disputes and furthering cooperation between different parties Building on the interactional theory of law this book formulates three analytical frameworks the effect of norm generating processes the effects of water related agreements and or arrangements in the basins and the effect of international water It uses these frameworks to assess the role of law in the processes of cooperation and peaceful settlement of disputes on transboundary river basin by drawing on four illustrative case studies the Jordan River Basin the Nile River Basin the Mekong River Basin and the Indus River Basin In doing so this book presents a unique perspective on the multi functional role of legal rules in those processes Tapping into the global discussion on water security and water related conflicts this book stimulates readers to explore broader or interdisciplinary perspectives for understanding water related issues This book will be of great interest to students and scholars interested in water resource management water law environmental politics conflict resolution and sustainable development more generally Water and Power Mart A. Stewart,Peter A. Coclanis,2018-12-12 This book brings together a talented international group of scholars policy practitioners and NGO professionals that explores a range of issues relating to environmental developmental and governing challenges on the Mekong one of the world s greatest rivers and alas one of the most endangered The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin Issues relate to livelihood strategies environmental threats and adaptation strategies and various aspects of river governance with individual authors treating questions of governance at different levels of refracted and in different registers The result is a fresh and innovative collection of essays which taken together provide much needed new perspectives on some of the most important and
