Think to New Worlds Joshua Blu Buhs, 2024-07-03 This book is about Charles Fort his followers and the surprising influence they have had on science fiction the avant garde UFOlogy and more broadly on the role of spirituality and conspiracy in the modern world Fort was an author and maverick philosopher who wrote four non fiction books about anomalies rains of frogs mysterious disappearances unexplained lights in the sky for which he offered hypotheses that even he did not always accept as true His books developed into a monistic philosophy that denounced science as a machine for generating truth In his view science was a small part of a larger system in which truth and falsity were constantly transforming one into the other This was not a rejection of the modern world but instead its fulfillment Fort prophesied the next stage in intellectual evolution after the scientific era He inspired four overlapping groups members of the Fortean Society science fiction fans and writers avant garde artists and flying saucer enthusiasts First We Must Think to New Worlds takes up each of these groups in turn to ask How can the human imagination be expanded What is the fundamental structure of the universe And how does power move As they developed their responses Fort s followers mixed Forteanism with Fundamentalism New Agery and conspiracy as well as a host of other forms of modern enchantments such as the ironic imagination scientific wonder and Theosophical syncretism Each chapter is interrupted by and concludes with shorter sections that focus on particular Fortean or Fortean events as a way to deepen themes

Addresses general topics such as the history and origins of the genre, its engagement with science and gender, and national variations of science fiction around the English-speaking world. Maps out connections between science fiction, television, the cinema, virtual reality, technology, and other aspects of the culture. Includes a section focusing on major figures such as H. G. Wells, Arthur C. Clarke, and Ursula Le Guin. Offers close readings of particular novels from Mary Shelley's *Frankenstein* to Margaret Atwood's *The Handmaid's Tale*. *Science Fiction and Fantasy Reference Index, 1985-1991* Halbert W. Hall, 1993 [Black Movement](#) Jeffrey O. G. Ogbar, 2025-04-15 The Great Migration of African Americans from the South to northern and western cities between 1915 and 1970 fundamentally altered the political, social, and cultural landscapes of major urban centers like New York, Chicago, Philadelphia, and Detroit, and changed the country as well. By the late twentieth century, Black people were mayors, police chiefs, and school superintendents, often at parity and sometimes overrepresented in municipal jobs in these and other cities, which were also hubs for Black literature, music, film, and politics. Since the 1970s, migration patterns have significantly shifted away from the major sites of the Great Migration, where some iconic Black communities have been replaced by mostly non-Black residents. Although many books have examined Black urban experiences in America, this is the first written by historians focusing on the post-Great Migration era. It is centered on numerous facets of Black life, including popular culture, policing, suburbanization, and political organizing across multiple cities. In this landmark volume, Jeffrey O. G. Ogbar and his contributors explore the last half century of African American urban history, covering a landscape transformed since the end of the Great Migration and demonstrating how cities remain dynamic into the twenty-first century. Contributors are Stefan M. Bradley, Scot Brown, Tatiana M. F. Cruz, Tom Adam Davies, LaShawn Harris, Maurice J. Hobson, Shannon King, Melanie D. Newport, Jeffrey O. G. Ogbar, Brian Purnell, J. T. Roane, Chanelle Rose, Benjamin H. Saracco, and Fiona Vernal.

Ultimate Island Nicholas Ruddick,1993-01-26 This study confronts current influential theories that science fiction is either an American phenomenon or an international one The study rejects the idea that British science fiction is distinguishable only by its pessimistic outlook while also rejecting the idea that other designations such as scientific romance or speculative fiction better fit the British product Instead the study traces the evolution of British science fiction showing how H G Wells synthesized various strains in English literature and how later writers conscious of this Wellsian tradition built upon Wells s literary achievement An introduction defines what might reasonably be placed under the heading British science fiction and why Chapter 1 examines previous critical ideas about the nature of British science fiction revealing that most of them are based on untested assumptions Chapter 2 explores the significance of the dominant motif of the island in British SF a motif that suggests that British SF and mainstream English literature have been long and fruitfully intertwined Chapters 3 and 4 deal respectively with British disaster fiction before and after the Second World War They focus on why British science fiction has so frequently seemed obsessed with catastrophe Chapter 5 a polemical conclusion deals with the future of British science fiction based on its current predicament Ultimate Island forms a theoretical counterpart to the author s recently published British Science Fiction A Chronology 1478 1990 Greenwood 1992 which defines the historical scope of the field

Space and Beyond Gary Westfahl,2000-01-30 Although the exploration of space has long preoccupied authors and filmmakers the development of an actual space program discoveries about the true nature of space and critical reconsiderations of America s frontier experiences have challenged and complicated conventional portrayals of humans in space This volume reexamines the themes of space and the frontier in science fiction in light of recent scientific and literary developments From this new perspective we discern previously unnoticed commentaries from older authors while newer writers either remain within a reassuring but obsolete tradition venture into unexplored new realities or abandon space to focus on other frontiers The intriguing contributions to this volume include a previously unpublished interview with Arthur C Clarke the world s greatest living author of science fiction examinations of space opera by veteran author Jack Williamson and scholar David Pringle surveys of space in science fiction film and writer and producer Michael Cassutt s account of his efforts to launch a film based on a Clifford D Simak novel and speculations about future developments from noted writers Gregory Benford Jack Dann James Gunn and Howard V Hendrix
