Deming, 2014-01-10 Science is a living organic activity the meaning and understanding of which have evolved incrementally over human history This book the second in a roughly chronological series explores the evolution of science from the advents of Christianity and Islam through the Middle Ages focusing especially on the historical relationship between science and religion Specific topics include technological innovations during the Middle Ages Islamic science the Crusades Gothic cathedrals and the founding of Western universities Close attention is given to such figures as Paul the Apostle Hippolytus Lactantius Cyril of Alexandria Hypatia Cosmas Indicopleustes and the Prophet Mohammed *History Textbooks and the Wars in Asia* Gi-Wook Shin, Daniel C. Snider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions especially in the realms of culture and economy Still the region cannot escape from the burden of history This book examines the formation of historical memory in four Northeast Asian societies China Japan South Korea and Taiwan and the United States focusing on the period from the beginning of the Sino Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951 The contributors analyse the recent efforts of Korean Japanese and Chinese scholars to write a common history of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements In doing so they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided and often conflicting historical memories The book argues

that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives Through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region This book will be essential reading for students and scholars of Asian history Asian education and international relations in East Asia **The World** Felipe Fernandez-Armesto,2015-08-05 **The Cambridge World History of Genocide: Volume 2, Genocide in the Indigenous, Early Modern and Imperial Worlds, from c.1535 to World War One** Ned Blackhawk,Ben Kiernan,Benjamin Madley,Rebe Taylor,2023-05-04 Volume II documents and analyses genocide and extermination throughout the early modern and modern eras It tracks their global expansion as European and Asian imperialisms and Euroamerican settler colonialism spread across the globe before the Great War forging new frontiers and impacting Indigenous communities in Europe Asia North America Africa and Australia Twenty five historians with expertise on specific regions explore examples on five continents providing comparisons of nine cases of conventional imperialism with nineteen of settler colonialism and offering a substantial basis for assessing the various factors leading to genocide This volume also considers cases where genocide did not occur permitting a global consideration of the role of imperialism and settler Indigenous relations from the sixteenth to the early twentieth centuries It ends with six pre 1918 cases from Australia China the Middle East Africa and Europe that can be seen as premonitions of the major twentieth century genocides in Europe and Asia **Europe on the Path to Self-Destruction** Jack L. Schwartzwald,2022-07-19 Between the years 1815 and 1945 Europe achieved unrivaled global dominance only to see it shattered by two world wars This frenetic rise and fall was attended by immense societal change In 1815 Europe remained largely agricultural and dependent upon horsepower By 1945 the power of the atom had been unleashed Two industrial revolutions occurred in the interim the first founded upon coal iron and steam the second upon oil steel electricity and internal combustion The implications for humanity were profound This concise yet comprehensive study is divided into three sections In section one the map of Europe emerges in its modern visage as unrestrained nationalist fervor gives rise to an assemblage of new nation states In section two the continent attains global hegemony as massive industrialization fuels a mad scramble for colonial markets and raw materials In section three a cauldron of national ethnic and class hatreds spawn the rise of totalitarianism and the overthrow of European hegemony in two calamitous world wars By tracing the events and undercurrents of this vital period in European history this book offers trenchant insights for the lay reader and the student of history alike *Recording for the Blind & Dyslexic, ...
