Becoming Divine M. David Litwa, 2013-10-30 Some have called it the essence of sin others the depth of salvation Regardless of one's evaluation of it however deification throughout Western history has been a part of human aspiration From the ancient pharaohs to modern transhumanists people have envisioned their own divinity These visionaries include not only history's greatest megalomaniacs but also mystics sages apostles prophets magicians bishops philosophers atheists and monks Some aimed for independent deity others realized their eternal union with God Some anticipated godhood in heaven others walked as gods on earth Some accepted divinity by grace others achieved it by their own will to power There is no single form of deification indeed deification is as manifold as the human conception of God but the many types are united by a set of interlocking themes achieving immortality wielding superhuman power being filled with supernatural knowledge or love and through these means transcending normal human or at least earthly nature **Dictionary of World Biography** Frank Northen Magill, Alison Aves, 2003-01-23 Containing 250 entries each volume of the Dictionary of World Biography contains examines the lives of the individuals who shaped their times and left their mark on world history Much more than a Who's Who each entry provides an in depth essay on the life and career of the individual concerned Essays

commence with a quick reference section that provides basic facts on the individual's life and achievements and conclude with a fully annotated bibliography. The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history. Any student in the field will want to have one of these as a handy reference companion. *Faiths across Time* J. Gordon Melton, 2014-01-15. This monumental four-volume reference overviews significant events and developments in religious history over the course of more than five millennia. Written for high school students, undergraduates, and general readers interested in the history of world religions, this massive reference chronicles developments in religious history from 3500 BCE through the 21st century. The set comprises four volumes treating the ancient world from 3500 BCE through 499 CE, 500 through 1399, 1400 through 1849, and 1850 through 2009. Each volume includes hundreds of brief entries arranged chronologically and then further organized by region and religion. The entries provide fundamental information on topics ranging from the neolithic Ggantija temples near Malta through the election of Mary Douglas Glasspool as bishop of the Episcopal Diocese of Los Angeles in 2009. Global in scope and encyclopedic in breadth, this chronology of world religions is an essential purchase for all libraries concerned with the development of human civilization.

Moses and Akhenaten Ahmed Osman, 2002-10-01. A reinterpretation of biblical and Egyptian history that shows Moses and the Pharaoh Akhenaten to be one and the same. Provides dramatic evidence from both archaeological and documentary sources. A radical challenge to long-established beliefs on the origin of Semitic religion. During his reign, the Pharaoh Akhenaten was able to abolish the complex pantheon of the ancient Egyptian religion and replace it with a single god, the Aten, who had no image or form. Seizing on the striking similarities between the religious vision of this heretic pharaoh and the teachings of Moses, Sigmund Freud was the first to argue that Moses was in fact an Egyptian. Now Ahmed Osman, using recent archaeological discoveries and historical documents, contends that Akhenaten and Moses were one and the same man. In a stunning retelling of the Exodus story, Osman details the events of Moses/Akhenaten's life: how he was brought up by Israelite relatives, ruled Egypt for seventeen years, angered many of his subjects by replacing the traditional Egyptian pantheon with worship of the Aten, and was forced to abdicate the throne. Retreating to the Sinai with his Egyptian and Israelite supporters, he died out of the sight of his followers, presumably at the hands of Seti I after an unsuccessful attempt to regain his throne. Osman reveals the Egyptian components in the monotheism preached by Moses, as well as his use of Egyptian royal ritual and Egyptian religious expression. He shows that even the Ten Commandments betray the direct influence of Spell 125 in the Egyptian Book of the Dead. Moses and Akhenaten provides a radical challenge to long-standing beliefs concerning the origin of Semitic religion and the puzzle of Akhenaten's deviation from ancient Egyptian tradition. In fact, if Osman's contentions are correct, many major Old Testament figures would be of Egyptian origin.
