Steinmetz,2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production

Awards,2015-11-30 FacultyAwards.org is the first and only university awards program in the United States based on faculty peer evaluation. Faculty Awards was created to recognize outstanding faculty members as viewed by their Faculty peers at colleges and universities across the United States. Faculty members voted through the 2014-2015 academic year for their peers at their academic departments and schools within a number of categories. Access to FacultyAwards.org to nominate and vote for Faculty was limited to university professors or faculty members at accredited U.S. institutions of higher education. Faculty members were nominated and voted for by other faculty members in their own academic departments and schools. We strove to maintain an accurate peer review process. Voting was not open to students or the public at large. In addition, faculty members voted for educators only at their own college or university. Winners for the 2014-2015 academic year in all departments and colleges across U.S. institutions of higher education were announced in March 2015 and are permanently archived at FacultyAwards.org as well as recognized in this 2015 print edition of the Faculty Awards Compendium. For the academic year 2014-2015, votes were cast to nominate and vote for Faculty members and no self-voting was allowed to assure the integrity of the whole process. This volume of the Faculty Awards Compendium includes Faculty awardees within Fine Arts, Humanities, Liberal Arts, and Social Sciences Disciplines for the 2014-2015 academic year. A total of 1608 winning Faculty members in 584 higher education institutions were determined after tallying the votes. We would like to thank all Faculty members who participated in the voting process and to wish all the Faculty awardees continued success in their academic endeavors. We look forward to resuming the voting process for the 2015-2016 academic year awards.

Communication in Modern Social Ordering Kai Eriksson, 2011-07-21 Communication in Modern Social Ordering investigates the modern history of communication in relation to the thinking of the political community in the United States By illustrating the intertwining of the technological developments in communication methods and its community building effects the different representations of society and their political implications are examined against the development of communication systems from the telegraph to the telephone to computer networks It was the telegraph that made communication a continual process thus freeing it from the rhythmical

motion of the postal service and from physical transportation in general and provided both a model and a mechanism of control Using the theories of both Foucault and Heidegger to provide a lens for new investigation the author studies not the meanings of communication and its logic as such but rather the conditions and structures that allow meanings and logic to be formulated in the first place The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U S as a phenomenon of modern social ordering Exploring Psychology Study Guide Richard O.
