Theories Of Personality Ninth Edition:

Theories of Personality Gregory Feist, Gregory J. Feist, Tomi-Ann Roberts, Jess Feist, 2020-05-28 What makes people behave as they do Are people ordinarily aware of what they are doing or are their behaviors the result of hidden unconscious motives Are some people naturally good and others basically evil Or do all people have potential to be either good or evil Is human conduct largely a product of nature or is it shaped mostly by environmental influences Can people freely choose to mold their personality or are their lives determined by forces beyond their control Are people best described by their similarities or is uniqueness the dominant characteristic of humans What causes some people to develop disordered personalities whereas others seem to grow toward psychological health These questions have been asked and debated by philosophers scholars and religious thinkers for several thousand years but most of these discussions were based on personal opinions that were colored by political economic religious and social considerations Then near the end of the 19th century some progress was made in humanity's ability to organize explain and predict its own actions The emergence of psychology as the scientific study of human behavior marked the beginning of a more systematic approach to the study of human personality This edition continues to emphasize the strong and unique features of earlier editions namely the overviews near the beginning of each chapter a lively writing style the thought provoking concepts of humanity as seen by each theorist and the structured evaluations of each theory

The Capitalist Personality Christopher S. Swader, 2013-01-04 Modern capitalism favors values that undermine our face to face bonds with friends and family members Focusing on the post communist world and comparing it to more developed societies this book reveals the mixed effects of capitalist culture on interpersonal relationships While most observers blame the egoism and asocial behavior found in new free market societies on their communist pasts this work shows how relationships are also threatened by the profit orientations and personal ambition unleashed by economic development Successful people in societies as diverse as China Russia and Eastern Germany adjust to the market economy at a social cost relaxing their morals in order to obtain success and succumbing to increased material temptations to exploit relationships for their own financial and professional gain The capitalist personality is internally troubled as a result of this sellout but these qualms subside as it devalues intimate qualitative bonds with others This book also shows that post communists are similarly individualized as people living in Western societies Capitalism may indeed favor values of independence creativity and self expressiveness but it also rewards self centeredness consumerism and the stripping down of morality As is the case in the West capitalist culture fosters an internally conflicted and self centered personality in post communist societies
