Silsbee, Joerg Draeger, Jörg Dräger, 1997-06-28 Interactive resource centering around fourteen high quality computer simulations covering essential topics in solid state physics **Science By Simulation - Volume 2: Models Of Classical Physics** Andrew French, 2025-10-03 Models of Classical Physics is the second volume of Science by Simulation It is a recipe book of mathematical models that can be enlivened by the transmutation of equations into computer code In this volume the examples represent the standard canon of Classical Physics Mechanics Thermodynamics Waves and Optics Electromagnetism and are based upon paradigm problems and systems that all pre university and undergraduate STEM students should have the opportunity to experience and in time master Rather than the what of Science this book is aimed at the how providing guidance that can be readily applied to projects by students and professionals Written in a friendly style based upon the author's expertise in teaching and pedagogy this mathematically rigorous book is designed for readers to follow arguments step by step with stand alone chapters and indeed sections which can be read independently This approach will provide a tangible and accessible context for the development of a wide range of interconnected mathematical ideas and computing methods that underpin the practice of Science and Physics in particular Nuclear and Particle Physics Simulations Roberta Bigelow, Michael J. Moloney, John Philpott, Joseph Rothberg, 1995-10-06 The Consortium for Upper Level Physics Software CUPS has developed a comprehensive series of Nine Book Software packages that Wiley will publish in FY 95 and 96 CUPS is an international group of 27 physicists all with extensive backgrounds in the research teaching and development of instructional software The project is being supported by the National Science Foundation PHY 9014548 and it has received other support from the IBM Corp Apple Computer Corp and George Mason University The Simulations being developed are Astrophysics Classical Mechanics Electricity Magnetism Modern Physics Nuclear and Particle Physics Quantum Mechanics Solid State Thermal and Statistical and Wave and Optics *Learning and Teaching Mathematics using Simulations* Dieter Röss, 2011-11-14 Mathematics course with 60 Java based interactive mathematic simulations by the author Comprehensive and systematically organized collection of 2 000 Java based physics simulations All simulations are runnable and can be accessed both on and offline Visualization of mathematic relationships Facilitates an experiment based understanding of problems including suggestions for your own mathematical experiments Calculation procedures can be adjusted in a variety of ways Introduction to simulation techniques with the EJS Easy Java Simulation tool Visual interface for simple and transparent modeling and programming Building block library for programming one's own simulations Quick access to simulations from links embedded in the digital text Mathematics is the language of physics and technology Yet in the age of computers mathematic skill is not based on mastery of arithmetic Rather it depends on understanding relationships in time and space and expressing them with precise and clear formulas In this regard one cannot rely on the

rote memorization of rules and formulas insight and intuitive understanding are crucial But how can this understanding be achieved in higher mathematics which depends on abstract concepts such as complex numbers real and complex infinite series infinitesimal calculus 2 3 and 4 dimensional functions conformal maps vectors and linear and nonlinear ordinary and partial differential equations The author takes a highly practical approach to facilitating the insight essential for true learning in mathematics Students can work directly with the simulation programs can visualize relationships and creatively interact with the calculation procedures Proceeding in textbook fashion the work makes use of a broad palette of multimedia tools and features numerous interactive calculation programs for mathematical experimentation Students merely have to select one of the many predefined examples and set the relevant parameters and in a flash the results are graphically displayed in 2 or 3 dimensions In addition the specific functions used can be changed or even newly formulated according to user preferences For example a procedure developed for a fourth degree power function for the numerical calculation of zero points can be adapted for use with another function Each simulation is accompanied by a detailed description instructions for use and numerous suggestions for experimentation The mathematical simulations are based on the Easy Java Simulation EJS programming tool All of the files developed with EJS are completely open and transparent The user can even draw on the examples as building blocks for the development his or her own calculation procedures The appendix contains a short introduction to EJS The work is enriched by a comprehensive collection of cosmological simulations as well as models from the Open Source Physics project organized by subject area Intended as a systematic collection of methods and materials for upper secondary school teachers and as a course for students of physics and mathematics the work facilitates hands on and experiment driven learning in higher mathematics The print version contains the electronic text and simulations for offline use For questions concerning download or online access to the simulations please contact service degruyter com
