National Human Rights Action Planning Azadeh Chalabi, 2018-07-18 This book deals with human rights action planning as a largely under researched area from theoretical doctrinal empirical and practical perspectives and as such provides the most comprehensive studies of human rights planning to date At the theoretical level by advancing a novel general theory of human rights planning it offers an alternative to the traditional state centric model of planning This new theory contains four sub theories contextual substantive procedural and analytical ones At the doctrinal level by conducting a textual analysis of core human rights conventions it reveals the scope and nature of the states obligation to adopt a plan of action for implementing human rights At the empirical level a cross case analysis of national human rights action plans of 53 countries is conducted exploring the major problems of these plans in different phases of planning and uncovering the underlying causes of these problems At the practical level this volume sets out how these plans should be developed and implemented how they can be best monitored by international human rights bodies and how to maximize their effectiveness With discussions bridging human rights theory and practice and development discourse this book will be a useful resource for a wide range of audiences from academics of different disciplines law human rights social policy political science political philosophy legal philosophy development studies planning studies socio legal studies to governments human rights practitioners and the UN human rights bodies

The Explanation of Crime Per-Olof H. Wikström, Robert J. Sampson, 2006-11-30 Integration of disciplines theories and research orientations has assumed a central role in criminological discourse yet it remains difficult to identify any concrete discoveries or significant breakthroughs for which integration has been responsible Concentrating on three key concepts context mechanisms and development this volume aims to advance integrated scientific knowledge on crime causation by bringing together different scholarly approaches Through an analysis of the roles of behavioural contexts and individual differences in crime causation The Explanation of Crime seeks to provide a unified and focused approach to the integration of knowledge Chapter topics range from individual genetics to family environments and from ecological behaviour settings to the macro level context of communities and social systems This is a comprehensive treatment of the problem of crime causation that will appeal to graduate students and researchers in criminology and be of great interest to policy makers and practitioners in crime policy and prevention

Environmental Political Philosophy Wojciech W. Gasparski, 2017-07-28 The need for solutions to environmental problems is urgent Expanded environmental research and knowledge along with interest in environmental issues has focused attention on the social political and practical aspects of environmental problems Environmental Political Philosophy searches for common environmental goals values and policies in society An essential undercurrent in political theory about the environment is that such issues are not questions of efficiency or technology They cannot simply be addressed through knowledge of processes and mechanics of nature by boosting or targeting research or by allocating of resources and development of technology Neither can they be resolved solely by increasing civic understanding and mounting environmental campaigns or requiring endless eco friendly actions A crucial element of environmental political philosophy is highlighted through the studies in this volume which address the question of what constitutes efficient action or effective decision making Praxiology commences with empirical orientation but does so by maintaining the important sense that in the evaluation of actions and policies ethical considerations must be employed in conjunction with effectiveness and efficiency

Emergence and Convergence Mario Bunge, 2015-01-15 Two problems continually arise in the sciences and humanities according to Mario Bunge parts and wholes and the origin of novelty In *Emergence and Convergence* he works to address these problems as well as that of systems and their emergent properties as exemplified by the synthesis of molecules the creation of ideas and social inventions Along the way Bunge examines further topical problems such as the search for the mechanisms underlying observable facts the limitations of both individualism and holism the reach of reduction the abuses of Darwinism the rational choice hermeneutics feud the modularity of the brain vs the unity of the mind the cluster of concepts around maybe the uselessness of many worlds metaphysics and semantics the hazards posed by Bayesianism the nature of partial truth the obstacles to correct medical diagnosis and the formal conditions for the emergence of a cross discipline Bunge is not interested in idle fantasies but about many of the problems that occur in any discipline that studies reality or

ways to control it His work is about the merger of initially independent lines of inquiry such as developmental evolutionary biology cognitive neuroscience and socio economics Bunge proposes a clear definition of the concept of emergence to replace that of supervenience and clarifies the notions of system real possibility inverse problem interdisciplinary and partial truth that occur in all fields The Lvov-Warsaw School. Materialism: Its Ontology and Epistemology Gustavo E. Romero, Javier Pérez-Jara, Lino Camprubí, 2022-06-01 This book provides an up to date revision of materialism's central tenets its main varieties and the place of materialistic philosophy vis a vis scientific knowledge Materialism has been the subject of extensive and rich controversies since Robert Boyle introduced the term for the first time in the 17th century But what is materialism and what can it offer today The term is usually defined as the worldview according to which everything real is material Nevertheless there is no philosophical consensus about whether the meaning of matter can be enlarged beyond the physical As a consequence materialism is often defined in stark exclusive and reductionist terms whatever exists is either physical or ontologically reducible to it This conception if consistent mutilates reality excluding the ontological significance of political economic sociocultural anthropological and psychological realities Starting from a new history of materialism the present book focuses on the central ontological and epistemological debates aroused by today's leading materialist approaches including some little known to an anglophone readership The key concepts of matter system emergence space and time life mind and software are checked over and updated Controversial issues such as the nature of mathematics and the place of reductionism are also discussed from different materialist approaches As a result materialism emerges as a powerful indispensable scientifically supported worldview with a surprising wealth of nuances and possibilities *Ethics: The Good and the Right* Mario

BUNGE, 2014-03-14 The purpose of this Introduction is to sketch our approach to the study of value morality and action and to show the place we assign it in the system of human knowledge 1 VALUE MORALITY AND ACTION FACT THEORY AND METATHEORY We take it that all animals evaluate some things and some processes and that some of them learn the social behavior patterns we call moral principles and even act according to them at least some of the time An animal incapable of evaluating anything would be very short lived and a social animal that did not observe the accepted social behavior patterns would be punished These are facts about values morals and behavior patterns they are incorporated into the bodies of animals or the structure of social groups We distinguish the facts of valuation morality and action from the study of such facts This study can be scientific philosophic or both A zoologist may investigate the way an animal evaluates environmental

or internal stimuli a social psychologist may examine the way children learn or fail to learn certain values and norms when placed in certain environments And a philosopher may study such descriptive or explanatory studies with a view to evaluating valuations moral norms or behavior patterns he may analyze the very concepts of value morals and action as well as their cognates or he may criticize or reconstruct value beliefs moral norms and action plans The Future of Ocean Governance and Capacity Development International Ocean Institute - Canada,2018-09-11 The International Ocean Institute Canada has produced this collection of over 80 insightful essays on the future of ocean governance and capacity development The book honors the work of Elisabeth Mann Borgese 1918 2002 preeminent ocean advocate and founder of the IOI More than 90 leading experts explore future challenges and opportunities for ocean governance and capacity development Major themes include the law of the sea ocean sciences integrated coastal and ocean management fisheries and aquaculture communication and negotiations maritime safety and security ocean energy and maritime transportation The essay collection is aimed at professionals students and citizens alike covering themes that parallel those in the annual Training Program of IOI Canada A leading member of the International Ocean Institute's network of centers and focal points worldwide IOI Canada was founded by Elisabeth Mann Borgese in 1979 Modernity and the Ideals of Arab-Islamic and Western-Scientific Philosophy A. Z. Obiedat,2022-07-08 This is the first study to compare the philosophical systems of secular scientific philosopher Mario Bunge 1919 2020 and Moroccan Islamic philosopher Taha Abd al Rahman b 1945 In their efforts to establish the philosophical underpinnings of an ideal modernity these two great thinkers speak to the same elements of the human condition despite their opposing secular and religious worldviews While the differences between Bunge's critical realist epistemology and materialist ontology on the one hand and Taha's spiritualist ontology and revelational mystical epistemology on the other are fundamental there is remarkable common ground between their scientific and Islamic versions of humanism Both call for an ethics of prosperity combined with social justice and both criticize postmodernism and religious conservatism The aspiration of this book is to serve as a model for future dialogue between holders of Western and Islamic worldviews in mutual pursuit of modernity's best case scenario *How to Write Conceptual Papers in the Social Sciences* Jon-Arild Johannessen,Bjørn Olsen,2023-12-22 This book is a practical guide on how to write conceptual papers and use conceptual generalization as a research methodology Divided into two parts the book first focuses on the scientific foundation for conceptual generalization to identify what is a conceptual model and how conceptual models can be developed Part two focuses on how to write a winning conceptual thesis covering conceptual generalisation and empirical generalisation and discusses research problems and questions and how to analyse them The authors cover different conceptual and analytical models to offer students a multitude of tools to visualize interpret and uncover relationships and patterns For example they explore the thought experiment analytical models empirical causal models analytical forms and data mining models and outline a strategy for developing conceptual models to assist with students who wish to design their

own conceptual paper Students gain a clear understanding of the driving forces in the research process how to define a research problem how to analysis the problem and develop research strategies Moving from concepts to hypotheses the book also covers the main types of errors that may be encountered as students learn about understanding the development of models and how to develop a theory Also including a checklist for students and a list of definitions and concepts this is the ideal resource for advanced undergraduate and postgraduate students and researchers in the social sciences Critical Rationalism and Educational Discourse ,2023-09-20 Critical Rationalism has become an influential philosophy in many areas including a great number of scientific disciplines Yet only few studies have been devoted to the role of the philosophy of Sir Karl Popper in the vast field of education This volume undertakes to fill this gap Leading scholars in the educational science and in the philosophy of education have critically written for this volume in an attempt to elaborate Popper s methodological and socio political views and confront them with a globally relevant spectrum of scientific objectives and cultural values Among the topics discussed are moral values education for freedom and its consequences for the student and the critical attitude in political education Attention is also paid to the historiography of this significant philosophical movement Regarding pedagogical research the empirical paradigm the falsificatory approach to educational research the complex relationship between educational theory and practice as well as the problem of value neutrality in educational science are objects of critical analysis
