[Towards Rethinking Politics, Policy and Polity in the Anthropocene](#) Hans Günter Brauch, 2025-02-24 Humankind faces two anthropogenic threats to its survival that are closely linked The first is the end of the Holocene and the start of the Anthropocene which was marked by the test of a nuclear bomb on 16 July 1945 In the prevailing peace and security narrative nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind s survival In the Anthropocene narrative we are the threat through our way of life and the burning of fossil fuels The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions Three stages of this order are distinguished the Cold War bipolarity the post Cold War era unipolarity and the end of the rule based global liberal order multipolarity on 24 February 2022 In this book ten multidisciplinary perspectives discuss complexity Anthropocene geopolitics peace and security discourses and the debate on

Now Is Not the Time Brett Bowden,2024-11-26 Human beings have an overwhelming tendency to overemphasize the significance of the present without considering context or historical perspective For many here and now is as good as it gets we have steadily progressed from a savage past and all we have to look forward to is the great unknown But if our literature and cinema are anything to go by many are convinced that the future will indeed be dystopian At the same time arguments abound that living in the moment is a key to happiness and success However to privilege the present over the past or future Brett Bowden argues is to engage in tempocentrism More than a mere preoccupation with the present tempocentrism involves comparing and judging the past in relation to the present with the tendency to assume that the present isn't only materially and qualitatively different from the past but also superior to it often morally so Yet tempocentrism a mistaken belief in the unprecedented nature of events going on around us brings with it a skewed perspective loaded with bias and prejudice Requiring just as much ignorance and arrogance as Eurocentrism tempocentrism implies that the present is somehow superior to the past because we live in it now The point however is not to suggest that there is not something special about the present there might well be but now is not the time to decide whether it is more significant than previous moments or those still to come Depending on the issue or event in question the time for that is later possibly hundreds or thousands of years later
