Student Learning and Academic Understanding Noel Entwistle, 2018-06-13 The research described in Student Learning and Academic Understanding had its origins in the pioneering work of Ausubel Bruner and McKeachie and followed two complementary lines of development The first line extended the ideas of Marton on approaches to learning through an inventory designed to assess these approaches among large samples of students and using in depth interviews with students about their experiences of academic understanding The second line drew on a range of studies to explore the influences of university teaching and the whole teaching learning environment on the quality of student learning Taking the research as a whole shows the value of complementary research approaches to describing student learning while the findings brought together in the final chapter suggest ways of supporting deep approaches and the development of personal academic understanding among students Student Learning and Academic Understanding covers a wide range of concepts that have emerged from interviews in which students use their own experiences to describe how they study and what they find most useful in developing an academic understanding of their own These concepts differ from the traditional psychological concepts by being focused on the specific contexts of university and college although they are also relevant to the later stages of school education Explains the origins meanings and relevance of deep and surface approaches to learning Introduces an array of concepts derived from the specific contexts of university education Illustrates how in depth interviewing can be used to explore students ways of thinking Provides a series of heuristic models to guide thinking about the influences on student learning Includes an inventory on approaches to studying and experiences of teaching for use by teachers

Register of Educational Research in the United Kingdom, 1995 **Handbook of Educational Ideas and Practices (Routledge Revivals)** Noel Entwistle, 2015-08-11 First published in 1990 the Handbook of Educational Ideas and Practices was written for

practitioners and students in the field of education and its related services and was designed to appeal to educationists no matter what their nationality Focusing mainly on compulsory schooling it provides summaries of the thinking research findings and innovatory practices current at the time However the book is also careful to present a complete picture of education and therefore includes a separate section for education beyond school which covers pre school level post secondary level and adult and continuing education There are also other chapters dealing with aspects of organization curriculum and teaching in various forms of tertiary education Indeed each topic has been discussed by an acknowledged expert writing in sufficient detail in order to resist trivialization
