Deals and Development Lant Pritchett, Kunal Sen, Eric Werker, 2017-11-10 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations When are developing countries able to initiate periods of rapid growth and why have so few of these countries been able to sustain growth over decades Deals and Development The Political Dynamics of Growth Episodes seeks to answer these questions and many more through a novel conceptual framework built from a political economy of business government relations Economic growth for most developing countries is not a linear process Growth instead proceeds in booms and busts yet most frameworks for thinking about economic growth are built on the faulty assumption that a country's

economic performance is largely stable Deals and Development explains how growth episodes emerge and when growth once ignited is maintained for a sustained period It applies its new framework to examine the growth of countries across a range of institutional and political contexts in Africa and Asia using the examples of Bangladesh Cambodia India Malaysia Thailand Ghana Liberia Malawi Rwanda and Uganda Through these country analyses it demonstrates the explanatory power of its framework and the importance of feedback cycles in which economic trends interact with political behaviour to either sustain or terminate a growth episode Offering a lens through which to analyse complex scenarios and unwieldy amounts of information this book provides actionable levers of intervention to bring around reform and improve a country's chance at achieving transformative economic growth *Language as Statecraft* Kate Spowage, 2024-07-18 This book examines the rise of English in Rwanda offering critical insights into the links between language colonialism and capitalism with implications for our understanding of global English Spowage takes an interdisciplinary approach drawing on political theory cultural materialism and critical sociolinguistics She positions language policy as an instrument for social reproduction and exploitation but also a site of struggle and contest Unravelling the complex history of language politics and policy in Rwanda Spowage elaborates a theory of language as statecraft This approach draws attention to the endurance of a colonial capitalist link between language and social class while illuminating the specific power of English in legitimising neoliberal political power and class hierarchies On this basis Spowage argues for a theoretical reimagining of the spread of English through the global English n buleuse a model which aims to capture the complex mechanisms that reinforce the dominance of English and to identify points where those mechanisms are fragile This innovative volume will be of interest to scholars in sociolinguistics global Englishes language and politics and African studies **Industries Without Smokestacks** Richard S. Rwanda Results show that during the six week lockdown that began in March Rwanda's GDP fell 39.1 percent RWF 435 billion USD 484 million when compared to a no COVID situation in the same period Results further show that Rwanda's GDP in 2020 will be between 12 and 16 percent lower than a predicted no COVID GDP depending on the pace of the recovery The losses in annual GDP are between RWF 1.0 and 1.5 trillion USD 1.1 to 1.6 billion While GDP for the industrial and services sectors were estimated to have fallen during the lockdown period by 57 and 48 percent respectively exemptions of COVID-19 restrictions for the agricultural sector limited the decline in agricultural GDP to 7 percent compared to a noCOVID situation During the lockdown period the national poverty rate is estimated to have increased by 10.9 percentage points as 1.3 million people mostly in rural areas fell into temporary poverty Poverty rates are expected to stabilize by the end of 2020 increasing only by between 0.4 and 1.1 percentage points While these figures may be encouraging they mask the impacts on poor households of the sharp poverty spike during the lockdown and the inherent complexity of poverty dynamics post lockdown Looking forward the speed and success of Rwanda's recovery will depend critically on the expansion of Rwanda's social protection programs boosting enterprises of all sizes support to the agri food system and restoration of international trade

Return on investment analysis of private sector facilitation funds for Rwandan agribusinesses Karis McGill, Eleanor Turner, 2020-08-13 This study analyzes the return on investment for an agribusiness facilitation fund implemented in Rwanda Combining project monitoring data with supplementary surveys and interviews of recipient agribusinesses we find a positive return on investment in terms of farmer income generated per dollar spent by the US government To determine the commercial viability of the investments we estimate the payback period and find the median time it will take a firm to recoup the entire investment through profits is 3.7 years We estimate the net present value of the entire fund portfolio to be 12.5 million These estimates rely on conservative assumptions and likely underrepresent the profitability of the investments Given the positive returns and commercial viability of the agribusinesses we examine the fund's role as a first step to graduate firms toward investment readiness Although three firms did access equity investment we find that the majority of the businesses in the portfolio do not meet investor requirements for deal size and management capacity and are more appropriately financed by commercial lenders We conclude with recommendations for the implementation and measurement of similar funds
