The Sociology and Psychology of Terrorism Federal Research Division, 2015-04-10 The purpose of this study is to focus attention on the types of individuals and groups that are prone to terrorism see Glossary in an effort to help improve U S counter terrorist methods and policies The emergence of amorphous and largely unknown terrorist individuals and groups operating independently freelancers and the new recruitment patterns of some groups such as recruiting suicide commandos female and child terrorists and scientists capable of developing weapons of mass destruction provide a measure of urgency to increasing our understanding of the psychological and sociological dynamics of terrorist groups and individuals The approach used in this study is twofold First the study examines the relevant literature and assesses the current knowledge of the subject Second the study seeks to develop psychological and sociological profiles of foreign terrorist individuals and selected groups to use as case studies in assessing trends motivations likely behavior and actions that might deter such behavior as well as reveal vulnerabilities that would aid in combating terrorist groups and individuals Because this survey is concerned not only with assessing the extensive literature on socio psychological aspects of terrorism but also providing case studies of about a dozen terrorist groups it is limited by time constraints and data availability in the amount of attention that it can give to the individual groups let alone individual leaders or other members Thus analysis of the groups and leaders will necessarily be incomplete A longer study for example would allow for the collection and study of the literature produced by each group in the form of autobiographies of former members group communiques and manifestos news media interviews and other resources Much information about the

terrorist mindset see Glossary and decision making process can be gleaned from such sources Moreover there is a language barrier to an examination of the untranslated literature of most of the groups included as case studies herein Terrorism databases that profile groups and leaders quickly become outdated and this report is no exception to that rule In order to remain current a terrorism database ideally should be updated periodically New groups or terrorist leaders may suddenly emerge and if an established group perpetrates a major terrorist incident new information on the group is likely to be reported in news media Even if a group appears to be quiescent new information may become available about the group from scholarly publications There are many variations in the transliteration for both Arabic and Persian The academic versions tend to be more complex than the popular forms used in the news media and by the Foreign Broadcast Information Service FBIS Thus the latter usages are used in this study For example although Ussamah bin Ladin is the proper transliteration the more commonly used Osama bin Laden is used in this study

The Sociology and Psychology of Terrorism Rex A. Hudson, 1999 Understanding Political Terrorism Kurt L. Mielke, 1984 Terrorism and Social Exclusion David P. Wright-Neville, Anna Halafoff, 2010 Recent thinking on globalization places risk at the centre of contemporary life Yet what if our perception of risk is misplaced What if

the greatest risk is not terrorism itself but the conditions that allow terrorism to flourish This fascinating book illustrates that elevated perceptions of terrorism related risks are having a deleterious impact on many societies exacerbating feelings of exclusion among individuals and groups Via their exploration of various societies the expert contributors show that as a causal factor of terrorism social exclusion can be remedied by inclusive participatory and deliberative measures They argue that it would be beneficial to recalibrate counter terrorism policies to unite rather than divide multi ethnic religiously diverse and multicultural societies stressing the importance of understanding and addressing underlying causes of social tensions They also assess how global and domestic forces have impacted on the prospects for longer term social cohesion in the countries under review presenting studies from Western and non Western societies such as Algeria Australia Russia and the United Kingdom to demonstrate that the differences between these societies are not as stark as is often assumed This path breaking book questions the validity of attacks on multiculturalism As such it will appeal to a wide ranging audience including academics students and researchers in the fields of counter terrorism peace building and the sociology of religion It will also provide valuable insights to policy makers in the areas of immigration security and community building
