Undoing The Demos Neoliberalisms Stealth Revolution Zone Near Futures:

Undoing the Demos Wendy Brown, 2015-02-06 This is a book for the age of resistance for the occupiers of the squares for the generation of Occupy Wall Street The premier radical political philosopher of our time offers a devastating critique of the way neoliberalism has hollowed out democracy

Undoing the Demos Wendy Brown, 2015-03-20 Neoliberal rationality ubiquitous today in statecraft and the workplace in jurisprudence education and culture remakes everything and everyone in the image of homo oeconomicus What happens when this rationality transposes the constituent elements of democracy into an economic register In vivid detail Wendy Brown explains how democracy itself is imperiled The demos disintegrates into bits of human capital concerns with justice cede to the mandates of growth rates credit ratings and investment climates liberty submits to the imperative of human capital appreciation equality dissolves into market competition and popular sovereignty grows incoherent Liberal democratic practices may not survive these transformations Radical democratic dreams may not either In an original and compelling theoretical argument Brown explains how and why neoliberal reason undoes the political form and political imaginary it falsely promises to secure and reinvigorate Through meticulous analyses of neoliberalized law political practices governance and education she charts the new common sense Undoing the Demos makes clear that far from being the lodestar of the twenty first century a future for democracy depends upon it becoming an object of struggle and rethinking

Soccer's Neoliberal Pitch John M. Sloop, 2023-05-23 American sports agnostics might raise an eyebrow at the idea that soccer represents a staging ground for progressive cultural social and political possibility within the United States It is just another game after all in a society where mass audience spectator sport largely avoids any political stance in other than a generic corporate friendly patriotism But John Sloop picks up on the work of Laurent Dubois and others to see in American soccer a sport that has achieved immense participation and popularity even as it struggles to establish major league status a game that permits surprisingly diverse modes of thinking about national identity because of its marginality As a rhetorician who engages with both critical theory and culture John Sloop seeks to read soccer as the game intersects with gender race sexuality class and the logic of neoliberal values The result of this engagement is a sense of both enormous possibility and real constraint If American soccer offers more possibility because of its marginality looking at how these cultural social and political possibilities are closed off or constrained can provide valuable insights into American culture and values In Soccer's Neoliberal Pitch Sloop analyzes a host of soccer adjacent case studies the equal pay dispute between the US women's national team and the US Soccer Federation the significance of hooligan literature the introduction of English soccer to American TV audiences the strange invisibility of the Mexican soccer league despite its consistent high TV ratings and the reading of US national teams as underdogs despite the nation's quasi imperial dominance of the Western hemisphere While there is a growing bookshelf of titles on soccer and a growing number on American soccer Soccer's Neoliberal Pitch is the first and only book length analysis of soccer through a rhetorical lens This book is a model for critical

cultural work with sports with appeal to not only sports studies but cultural studies communication and even gender studies classrooms It is independent of its bona fides an engaging and enjoyable read for the soccer fan and the soccer curious

Austerity, Community Action, and the Future of Citizenship in Europe Shana Cohen,Christina Fuhr,Jan-Jonathan Bock,2018-10-17 The politics of austerity has seen governments across Europe cut back on welfare provision As the State retreats this edited collection explores secular and faith based grassroots social action in Germany and the United Kingdom that has evolved in response to changing economic policy and expanding needs from basic items such as food to more complex means to move out of poverty Bringing together scholars from different disciplines and practitioners in several areas of social intervention the book explores how the conceptualization and constitutive practices of citizenship and community are changing because of the retreat of the State and the challenge of meeting social and material needs creating new opportunities for local activism The book provides new ways of thinking about social and political belonging and about the relations between individual collective and State responsibility

Planet on Fire Mathew Lawrence,Laurie Laybourn-Langton,2021-04-20 A radical manifesto for how to deal with environmental breakdown In the age of environmental breakdown breakdown the political status quo has no answer to the devastating and inequitably distributed consequences of the climate emergency We urgently need an alternative to bring about the rapid transformation of our social and economic systems As we rebuild our lives in the wake of Covid 19 and face the challenges of ecological disaster how can the left win a world fit for life Planet on Fire is an urgent manifesto for a fundamental reimagining of the global economy It offers a clear and practical road map for a future that is democratic and sustainable by design Laurie Laybourn Langton and Mathew Lawrence argue that it is not enough merely to spend our way out of the crisis we must also rapidly reshape the economy to create a new way of life that can foster a healthy and flourishing environment for all Planet on Fire offers a detailed and achievable manifesto for a new politics capable of tackling environmental breakdown

Thinking Sex with the Great Whore Luis Menéndez-Antuña,2018-04-17 Many scholars in Biblical and Revelation studies have written at length about the imperial and patriarchal implications of the figure of the Whore of Babylon However much of the focus has been on the links to the Roman Empire and ancient attitudes towards gender This book adds another layer to the conversation around this evocative figure by pursuing an ideological critique of the Great Whore that takes into account contemporary understandings of sexuality and in so doing advances a de moralization of apparent sexual deviancy both in the present and in the past Offering an emancipatory reading of Revelation 17 18 using Foucauldian postcolonial and queer historiographies this study sets out alternative paths for identity construction in Biblical texts By using these alternative critical lenses the author argues that the common neglect of the ethical and political impact of Biblical texts in the present can be overcome This in turn allows for fresh reflection on the study of the Bible and its implications for progressive politics Situated at the intersection of Revelation Studies Biblical Studies and Hermeneutics as well as Contextual Liberationist Theologies and

Queer and Postcolonial Criticism this is a cutting edge study that will be of keen interest to scholars of Theology and Religious Studies

Advocacy NGOs and the Neoliberal Pacification of the Demands of the Street Juan Francisco Palma Carvajal, 2021-08-04 This book critically explores the role of two advocacy NGOs actively involved in processes of education policymaking during the recent education reforms carried out in Chile the country known as the first laboratory of neoliberalism around the world Based on Foucault's theoretical work on governmentality the book argues that neoliberalism as a form of governmentality has permeated in Chilean policymaking generating new forms of domination through freedom by situating NGOs as active and responsible subjects of government In this way this volume contests the supposed benefits of NGOs as a force to enhance democracy and foment social participation arguing instead that NGOs image as representatives of civil society can be used to pacify social movements demands for radical change and build a political consensus that serves to legitimate government interests in policymaking

Education Policy, Digital Disruption and the Future of Work Shane B. Duggan, 2019-11-09 This book examines the possibilities practices and consequences of digital disruption and networked economies in education policy As traditional notions of learning and labour are abstracted by networked technologies young people are exposed to new forms of governance and intervention Tracing key education policy shifts from the turn of the millennium to the present day this book explores notions of value aspiration and equity in the context of the rise of the networked economies and the end of work It argues that a policy focus on preparing young people for the future a future that will be dominated by networked technologies informs both what counts as success and reorganises young people's orientation in the present in new commodified forms In an era where the costs of higher education are rapidly increasing despite their relative decline in value this book will resonate with scholars in youth and educational studies as well as those with an interest in emerging forms of labour and work

A Future for Planning Michael Harris, 2019-04-25 As well as being spatial planning is necessarily also about the future and yet time has been relatively neglected in the academic practice and policy literature on planning Time in

particular the need for longer term thinking is critical to responding effectively to a range of pressing societal challenges from climate change to an ageing population poor urban health to sustainable economic development This makes the relative neglect of time not only a matter of theoretical importance but also increasing practical and political significance A Future for Planning is an accessible wide ranging book that considers how planning practice and policy have been constrained by short termism as well as by a familiar lack of spatial thinking in policy in response to major social economic and environmental challenges It suggests that failures in planning often represent failures to anticipate and shape the future which go well beyond planning systems and practices rather our failure to plan for the longer term relates to wider issues in policy making and governance This book traces the rise and fall of long term planning over the past 80 years or so but also sets out how planning can take responsibility for twenty first century challenges It provides examples of successes and failures of longer term planning from around the world In short the book argues that we need to put time back into planning and develop forms of planning which serve to promote the sustainability and wellbeing of future generations

Learning to Save the Future Alexander Means, 2018-04-09 Mainstream economists and Silicon Valley entrepreneurs claim that unfettered capitalism and digital technology can unlock a future of unbounded prosperity create endless high paying jobs and solve the world's vast social and ecological problems Realizing this future of abundance purportedly rests in the transformation of human potential into innovative human capital through new 21st century forms of education In this new book Alex Means challenges this view Stagnating economic growth and runaway inequality have emerged as the normal condition of advanced capitalism Simultaneously there has been a worldwide educational expansion and a growing surplus of college educated workers relative to their demand in the world economy This surplus is complicated by an emerging digital revolution driven by artificial intelligence and machine learning that generates worker displacing innovations and immaterial forms of labor and valorization Learning to Save the Future argues that rather than fostering mass intellectuality educational development is being constrained by a value structure subordinated to 21st century capitalism and technology Human capabilities from creativity design engineering to communication are conceived narrowly as human capital valued in terms of economic productivity and growth Similarly global problems such as the erosion of employment and climate change are conceived as educational problems to be addressed through business solutions and the digitalization of education This thought provoking account provides a cognitive map of this condition offering alternatives through critical analyses of education and political economy technology and labor creativity and value power and ecology

The Future of Difference Sabine Hark, Paula-Irene Villa, 2020-06-23 How feminism is used to attack immigration in Europe In recent years opponents of political correctness have surged to prominence from both left and right shaping a discourse in which perpetrators are defiantly imagined as Muslim refugees i.e. outsiders others while victims are identified as our women This poisonous and regressive situation grounds Hark and Villa's theorisation of contemporary regimes of power as engaged primarily in the

violent production of difference In this moment they argue the logic of differentiate and rule thoroughly permeates the social our entire way of life is premised on endless subtle hierarchical distinctions which determine whole populations attitudes feelings and actions How can learn to value difference sabotaging all attempts to enlist difference in the service of domination Hark and Villa make a compelling case for the urgent necessity for a detoxification of feminism as a matter of urgency and for an ethical mode of living with the world that is living with alterity *Rated Agency Michel*

Feher,2021-09-14 The hegemony of finance compels a new orientation for everyone and everything companies care more about the moods of their shareholders than about longstanding commercial success governments subordinate citizen welfare to appeasing creditors and individuals are concerned less with immediate income from labor than appreciation of their capital goods skills connections and reputations That firms states and people depend more on their ratings than on the product of their activities also changes how capitalism is resisted For activists the focus of grievances shifts from the extraction of profit to the conditions under which financial institutions allocate credit While the exploitation of employees by their employers has hardly been curbed the power of investors to select investees to decide who and what is deemed creditworthy has become a new site of social struggle In clear and compelling prose Michel Feher explains the extraordinary shift in conduct and orientation generated by financialization Above all he articulates the new political resistances and aspirations that investees draw from their rated agency **Republicanism and the Future of Democracy** Yiftah

Elazar,Geneviève Rousselière,2019-04-25 Democracies are in crisis Can republican theory contribute to reforming our political norms and institutions The neo republican turn has seen scholars using the classical republican tradition in reconstructing and developing a vision of public life as an alternative to liberalism This volume offers new perspectives from leading scholars on how republicanism can help transform democratic theory and respond to some of its most pressing challenges Drawing on this recent revival of republican political thought its chapters reflect on such issues as the republican definition of freedom as nondomination and its relation to democracy and populism the ideal of the common good domination in the workplace and in the family republicanism in a globalized world and radical republican politics It will appeal to researchers and students in political theory political philosophy and the history of ideas and anyone interested in gaining greater insight into the prospects and challenges of republican democracy in today s world **Theology Reforming**

Society Stephen Spencer ,2017-10-30 Theology Reforming Society tells the story of Anglican social theology from its roots in the writings and work of F D Maurice and the Christian Socialists Charles Kingsley and John Ludlow and on to the work of William Temple This is an important and comprehensive account for all those interested in Anglican theology and Christian ethics The Future of University Education Michał Izak,Monika Kostera,Michał Zawadzki,2017-04-26 This collected

volume of essays offers glimpses of the future of university education While universities consider the spirit of theoretical exchange and intellectual pursuit to be a defining trait of their identity this book argues that this heritage is disappearing

under the influence of the short term demands of societies and markets Universities used to be sites of dissent civil courage and societal conscience but have now instead become little more than pseudo businesses rendering them incapable of remaining critical or independent However with more people going to university every year there is a strong resistance to the notion that the university as a collegial and critical institution is dead among academics as well as the broader public With contributions from scholars across the world this edited collection explores the ramifications of marketization on universities and provides glimpses of what higher education will look like in the future It will be of great interest to teachers and students in higher education as well as policy makers and those interested in the current and future state of higher education

Art Activism for an Anticolonial Future Carlos Garrido Castellano, 2021-10-01 Analyzing the confluence between coloniality and activist art Art Activism for an Anticolonial Future argues that there is much to gain from approaching contemporary politically committed art practices from the angle of anticolonial postcolonial and decolonial struggles These struggles inspired a vast yet underexplored set of ideas about art and cultural practices and did so decades before the acceptance of radical artistic practices by mainstream art institutions Carlos Garrido Castellano argues that art activism has been confined to a limited spatial and temporal framework that of Western culture and the modernist avant garde Assumptions about the individual creator and the belated arrival of derivative avant garde aesthetics to the periphery have generated a narrow view of political art at the expense of our capacity to perceive a truly global alternative praxis Garrido Castellano then illuminates such a praxis focusing attention on socially engaged art from the Global South challenging the supposed universality of Western artistic norms and demonstrating the role of art in promoting and configuring a collective critical consciousness in postcolonial public spheres This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7166>

Markets in the Making Michel Callon, 2021-12-07 Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of how everyday market activity gets produced If you're convinced you know what a market is think again In his long awaited study French sociologist and engineer Michel Callon takes us to the heart of markets to the unsung processes that allow innovations to become robust products and services Markets in the Making begins with the observation that stable commercial transactions are more enigmatic more elusive and more involved than previously described by economic theory Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of market activity that emphasizes what people designing products or launching startups soon discover the inherent difficulties of connecting individuals to things Callon's model is founded upon the notion of singularization the premise that goods and services must adapt and be

adapted to the local milieu of every individual whose life they enter Person by person thing by thing Callon demonstrates that for ordinary economic transactions to emerge en masse singular connections must be made Pushing us to see markets as more than abstract interfaces where pools of anonymous buyers and sellers meet Callon draws our attention to the exhaustively creative practices that market professionals continuously devise to entangle people and things Markets in the Making exemplifies how prototypes fragile curiosities that have only just been imagined are gradually honed into predictable objects and practices Once these are active enough to create a desired effect yet passive enough to be transferred from one place to another without disruption they will have successfully achieved the status of goods or services The output of this more ample process of innovation as redefined by Callon is what we recognize as the market commercial activity at scale The capstone of an influential research career at the forefront of science and technology studies Markets in the Making coherently integrates the empirical perspective of product engineering with the values of the social sciences After masterfully redescribing how markets are made Callon culminates with a strong empirical argument for why markets can and should be harnessed to enact social change His is a theory of markets that serves social critique

Market Civilizations Quinn Slobodian, Dieter Plehwe, Esra Elif Nartok, Aditya Balasubramanian, Tobias Rupprecht, Isabella M. Weber, Antina von Schnitzler, Jeremy Walker, Paulo Chamon, Karin Fischer, Mila Jonjic, Nenad Pantelic, Lars Mjøset, Reto Hofmann, Jimmy Casas Klausen, 2022-05-24 A deep investigation of neoliberalism's proselytizers in Eastern Europe and the Global South Where does free market ideology come from Recent work on the neoliberal intellectual movement around the Mont Pelerin Society has allowed for closer study of the relationship between ideas interests and institutions Yet even as this literature brought neoliberalism down to earth it tended to reproduce a European and American perspective on the world With the notable exception of Augusto Pinochet's Chile long seen as a laboratory of neoliberalism the new literature followed a story of diffusion as ideas migrated outward from the Global North Even in the most innovative work the cast of characters remains surprisingly limited clustering around famous intellectuals like Milton Friedman and Friedrich Hayek Market Civilizations redresses this absence by introducing a range of characters and voices active in the transnational neoliberal movement from the Global South and Eastern Europe This includes B R Shenoy an early member of the Mont Pelerin Society from India who has been canonized in some circles since the Singh reforms Manuel Ayau another MPS president and founder of the Marroqu n University an underappreciated Latin American node in the neoliberal network Chinese intellectuals who read Hayek and Mises through local circumstances and many others Seeing neoliberalism from beyond the industrial core helps us understand what made radical capitalism attractive to diverse populations and how often disruptive policy ideas went local
