United Mind Workers Unions And Teaching In The Knowledge Society:

United Mind Workers Charles Taylor Kerchner, Julia E. Koppich, Joseph G. Weeres, 1997-05-12 This new model of teacher unions is organized around issues of quality teaching and professional development as well as economic fairness The authors propose strategies for expanding the influence of unions by involving them in the setting of educational standards evaluating teacher performance and promoting career security The authors have established United Mind Workers web pages that contain portions of the book research reports and work in progress as well as links to other labor and teacher reform web pages and links to the authors electronic mail boxes For the web pages go to www.cgu.edu Click on FACULTY then Kerchner

School Choice and Social Controversy Stephen D. Sugarman, Frank R. Kemerer, 2011-12-01 In this important new volume distinguished legal and public policy scholars address issues that are critical to the successful drafting and implementation of school choice programs yet are usually overlooked in the choice debate They explore whether school choice is a threat or an opportunity to the many children who are largely deprived of choice today and they offer a variety of perspectives with some authors enthusiastic others more skeptical The book begins with a discussion of the types and extent of school choice what is known about its consequences and how politics has influenced its development It then focuses on three important public policy issues how school choice can revolutionize the way schools are financed what policy interventions are necessary to increase the supply of choice schools and how choice programs can be held accountable to parents and the state without undermining institutional autonomy The book addresses legal issues including whether public and private choice schools will be required to observe student and teacher rights generally recognized in traditional public schools how the religion and speech clauses of the First Amendment may affect the participation of religious schools in school choice programs whether school choice will enhance or aggravate opportunities for racial justice what the implications of school choice are for teacher unions and collective bargaining and whether children with disabilities will be accommodated in school choice programs under federal disability law Throughout the book the authors offer recommendations for public policy development The contributors are Jeffrey Henig Robert Bulman and David L Kirp Paul T Hill Robert M O Neil Jesse H Choper Betsy Levin William G Buss and Laura F Rothstein Stephen D Sugarman is Agnes Roddy Robb Professor of Law at the University of California Berkeley Frank R Kemerer is Regents Professor and director of the Center for

Special Interest Terry M. Moe, 2011-04-01 Why are America's public schools falling so short of the mark in educating the nation's children Why are they organized in ineffective ways that fly in the face of common sense to the point that it is virtually impossible to get even the worst teachers out of the classroom And why after more than a quarter century of costly education reform have the schools proven so resistant to change and so difficult to improve In this path breaking book Terry M Moe demonstrates that the answers to these questions have a great deal to do with teachers unions which are by far the most powerful forces in American education and use their power to promote their own special interests at the

expense of what is best for kids Despite their importance the teachers unions have barely been studied Special Interest fills that gap with an extraordinary analysis that is at once brilliant and kaleidoscopic shedding new light on their historical rise to power the organizational foundations of that power the ways it is exercised in collective bargaining and politics and its vast consequences for American education The bottom line is simple but devastating as long as the teachers unions remain powerful the nation s schools will never be organized to provide kids with the most effective education possible Moe sees light at the end of the tunnel however due to two major transformations One is political the other technological and the combination is destined to weaken the unions considerably in the coming years loosening their special interest grip and opening up a new era in which America s schools can finally be organized in the best interests of children **New Rules for a New Economy** Stephen A. Herzenberg, John A. Alic, Howard Wial, 2018-08-06 Three quarters of the American workforce is now employed in services a substantial portion in low paying dead end jobs Can the service economy do as well by the American worker as the old manufacturing economy Can the widely shared prosperity that accompanied steady increases in productivity and performance in manufacturing be replicated in the services They can and they will the authors of this timely book contend but only if outmoded policies and practices are brought into line with the new economy New Rules for a New Economy explains why this must be accomplished and how we can start The authors call for new decentralized institutions suited to a dynamic economy in which change is constant and rapid In particular they see a need for job ladders and worker associations that cut across firm boundaries These institutions would foster individual and collective learning mark out career paths and facilitate coordination among both individuals and organizations in a networked economy The authors propose new rules to reshape labor market institutions and policy improving economic performance and opportunities for workers Unusual in providing a comprehensive theoretical perspective that is grounded in detailed case research this book points the way to a better future not just for elite knowledge workers but for everyone *Resources in Education* ,1998-10

Democracy and Reform in Public Schools Saul Rubinstein, Charles Heckscher, John McCarthy, 2023-11-30 A Choice Outstanding Academic Title of the Year A thought provoking examination of how public education systems can be strengthened through strategic relationships both within schools and with outside partners In Democracy and Reform in Public Schools Saul Rubinstein Charles Heckscher and John McCarthy apply their expertise in labor relations to public school reform They envision a model of K 12 education that shifts away from the tenets of neoliberalism and centers on productive collaboration among school boards school administrators teacher unions and other education stakeholders Providing evidence of the links between collaborative partnerships and improved student outcomes Rubinstein Heckscher and McCarthy build on a rich body of research on interorganizational cooperation They highlight case studies such as that of the New Jersey Public School Labor Management Collaborative as leading examples of how better student performance more intra district learning and innovation and reduced teacher turnover can be traced to greater educator collaboration Citing

examples not only from the K 12 educational sector but also from successful union management partnerships in the automobile steel and telecommunications industries they then identify proven strategies to foster collaborative partnerships at district state and national levels They discuss techniques for forging new partnerships sustaining collaborative efforts and expanding the collaborative partnership model to larger scales This work expertly demonstrates how employment relations practices are antecedents to whole system reform in schools *Collective Bargaining in Education* Jane Hannaway, Andrew J. Rotherham, 2006 Examines the impact of collective bargaining by teachers on public education **America's Teachers** Joseph W. Newman, 2004-12 This edition offers prospective teachers a realistic look at teaching The writing is clear and accessible The research base and documentation are the strongest on the market America's Teachers is organized around four parts Part One Teaching as an Occupation goes into depth on motives for teaching the job market teacher salaries and evaluation trends in teacher education teacher organizations and legal issues Part Two Schools and Society offers full chapters on the history philosophy sociology and politics of education emphasizing the effects of increasing cultural diversity Part Three Issues for the Twenty First Century explores the ongoing competition between public schools and private schools and analyzes trends in the curriculum particularly the drive to state standards and high stakes testing *United Mine Workers Journal* United Mine Workers of America, 1916 *Educational Reform* Jordan T. Ville, 2001 This book brings together the literature in a field which may define the 21st century Can economic and technological progress continue with educational systems which seem to answer to no one but themselves and which output graduates who can barely read and write and who have only the faintest clue how to use a map This bibliography provides access via Title Author and Subject Indexes Contents Educational Accountability Educational Change Educational Equalisation Educational Leadership Educational Planning Educational Indicators **The United Mine Workers Journal**, 1917 *Teacher Unionism and Professionalism* Philip Patrick Kelly, 1998 *Annual Meeting Program* American Educational Research Association, 1997 **An Analysis of Peer Evaluation and Supervision Programs** Robert Lewis Unckless, 1999 Annual Meeting Program - American Educational Research Association American Educational Research Association, 1997 **The Political Dynamics of American Education** Frederick M.
