The Squam Lake Report Kenneth R. French, Martin N. Baily, John Y. Campbell, John H. Cochrane, Douglas W. Diamond, Darrell Duffie, Anil K. Kashyap, Frederic S. Mishkin, Raghuram G. Rajan, David S. Scharfstein, Robert J. Shiller, Hyun Song Shin, Matthew J. Slaughter, Jeremy C. Stein, René M. Stulz, 2010-06-18 A nonpartisan plan of action for fixing the global economy from fifteen of the world's leading economists In the fall of 2008 fifteen of the world's leading economists representing the broadest spectrum of economic opinion gathered at New Hampshire's Squam Lake Their goal the mapping of a long term plan for financial regulation reform The Squam Lake Report distills the wealth of insights from the ongoing collaboration that began at these meetings and provides a revelatory unified and coherent voice for fixing our troubled and damaged financial markets As an alternative to the patchwork solutions and ideologically charged proposals that have dominated other discussions the Squam Lake group sets forth a clear nonpartisan plan of action to transform the regulation of financial markets not just for the current climate but for generations to come Arguing that there has been a conflict between financial institutions and society these diverse experts present sound and transparent prescriptions to reduce this divide They look at the critical holes in the existing regulatory framework for handling complex financial institutions retirement savings and credit default swaps They offer ideas for new financial instruments designed to recapitalize banks without burdening taxpayers To lower the risk that large banks will fail the authors call for higher capital requirements as well as a systemic regulator who is part of the central bank They collectively analyze where the financial system has failed and how these weak points should be overhauled Combining an immense depth of academic private sector and public policy experience The Squam Lake Report contains urgent recommendations that will positively influence everyone's financial well being all who care about the world's economic health need to pay attention , *A Flow-of-Funds Perspective on the Financial Crisis Volume I* B. investors and regulators Using the latest research in psychology and behavioral economics they present a new theory of belief formation that explains why the financial crisis came as such a shock to so many people and how financial and economic instability persist A must read for anyone seeking insights into financial markets A Crisis of Beliefs shows how even the smartest market participants and regulators did not fully appreciate the extent of economic risk and offers a new framework for understanding today's unpredictable financial waters
