The Syntax Of Mauritian Creole Bloomsbury Studies In Theoretical Lingui:

The Syntax of Mauritian Creole Anand Syea, 2013

The Acquisition of Mauritian Creole Dany Adone, 1994-04-22

This work is based on an investigation of language acquisition process particularly in regard to syntax among Mauritian children learning to speak Mauritian Creole as their first language. As such it is the first major study of the development of child grammar in a Creole context. Mauritian Creole, in common with many Creole languages, emerged under extreme conditions and as an isolating language. Mauritian Creole is typologically different from languages where syntax is predominantly tied to morphology. There is thus an opportunity to broaden perspectives on language acquisition since until now most work has focused on languages such as English, French, German, Italian. The analysis proceeds within the GB framework of generative grammar and discussion emanates from psycholinguistic, sociolinguistic and theoretical linguistic viewpoints. The data also provide a means for evaluating Bickerton's theory, especially his conclusion that the acquisition of radical Creoles takes place with fewer errors than is the case for other languages, given that Creole languages are in harmony with the Bioprogram.

Kriyol Syntax Alain Kihm, 1994. Part of a series which presents descriptive and theoretical

studies of pidgin and creole languages, this volume focuses on the history and syntax of Kriyol. *The Morphosyntax of Reiteration in Creole and Non-Creole Languages* Enoch O. Aboh, Norval Smith, Anne Zribi-Hertz, 2012-06-27. This is a new contribution to a theory of reiteration in natural languages with a special focus on creoles. Reiteration is meant to denote any situation where the same form occurs at least twice within the boundaries of some linguistic domain. By including two case studies bearing on Hebrew and Breton alongside five chapters on creole languages (Surinam creole, Haitian, Mauritian, S o Tom and Pichi), this volume brings counter evidence to the claim that reiteration phenomena are particularly typical of creoles. And by exploring the syntax of reiteration alongside its morphology, the authors are led to challenge the iconic theory of reduplication proposed in several other studies of similar phenomena. This volume will be relevant for creole studies but also for readers more generally interested in language universals and the architecture of grammars.

Development and Structures of Creole Languages Francis Byrne, Thom Huebner, 1991. This collection of original essays is intended to both celebrate Derek Bickerton's sixty-fifth birthday and honor his long and eminent career. Each author included in the volume is a noted scholar who has distinguished him/herself in some area of linguistics and has professionally or personally interacted with Bickerton and been influenced by his work. While the papers make independent thematic contributions, they also discuss, augment, present alternatives to, or are inspired in some way by Bickerton's seminal ideas or penetrating analyses. The book is organized into 5 sections, each a reflection of a major research period in Bickerton's career: Section 1: Identifying Creoles; Section 2: Language Variation; Section 3: Creole Processes; Section 4: Creole Syntax and Semantics; Section 5: Serial Verbs.

Noun Phrases in Creole Languages Marlyse Baptista, Jacqueline Guéron, 2007-11-14. This volume offers a thorough examination of the syntactic, semantic, pragmatic and discourse properties of noun phrases in a wide variety of creole and non

creole languages including Cape Verdean Creole Santome Papiamentu Guinea Bissau Creole Mindanao Chabacano R unionnais Creole Lesser Antillean Haitian Creole Mauritian Creole Seychellois Sranan Jamaican Creole Berbice Dutch Creole and African American English Comparative studies also consider the determiner systems of Middle and Modern French European Portuguese Brazilian Portuguese Spanish Ewe Fon and Gun This compilation of 16 chapters brings together descriptive theoretical diachronic and synchronic studies that focus on the structure and interpretation of bare nouns in creoles The contributions demonstrate the variety and complex nature of determiner systems in creoles and their widespread use of bare nouns in comparison to their source languages This volume is evidence of the relevance of creole languages to theories of language creation language change and linguistic theory in general

Dual Aspectual Forms and Event Structure in Caribbean English Creoles Marsha Forbes-Barnett, 2019 This book tackles the divisive question of the Stative Non stative distinction by going straight to the root of the lexical items that have been at the heart of this discussion It provides an analysis of property items Dual Aspectual Forms couched in the syntax semantics interface eliminating the false dichotomy at the base of the controversy in the field and the suggestion that a lexical item needs be unambiguously Stative or Non stative What we see in this work is theoretical grounding for a flexible group of lexical items comprising both verbs and adjectives underlyingly with allowances made for derivation into either category The result is a work that is conceptually and theoretically appealing and one that brings consensus
