Corporate Strategy in the Age of Responsibility Peter McManners,2016-05-13 As the era of ever expanding markets and ample resources ends governments and business will have to behave differently The world is facing weak economic growth limits to affordable resources and increasing concerns about environmental consequences During the boom times governments championed de regulation and business responded by adopting an anything goes attitude In these straitened times strategic analysis has to engage with the challenges that society faces to create resilient corporations fit for the 21st century In *Corporate Strategy in the Age of Responsibility* Peter McManners who has for nine years run strategy workshops on the Henley MBA focusing on the global business environment sets about providing a strategic framework for navigating the new economic environment Chief Sustainability Officers CSOs now exist but they struggle to find the strategic rationale for the improvements they champion The author argues that their good intentions often lack traction partly because others in

management don't get it but also because they are not ambitious enough. The book is not about preaching semi-charitable behaviour or how to enhance the reputation of the corporation; instead, it is about surviving and thriving in a challenging and changing environment. A corporate audience familiar with strategy books will relate to this book but will find it steers them towards radically new strategic thinking suitable for a turbulent period of transition. **Innovation Strategy for**

Market entry strategy for

management consulting companies into the Brazilian market with focus on the LEAN consulting business Kristina Erikson, 2009-06-11. Inhaltsangabe Introduction: Brazil is rich in natural resources, rich in fertile soil, and rich in people. Although the country still shows deficits in different areas, the Brazilian market has attracted large investors and companies, especially in the past decade. The country's potential has been the focus of many analysts and researchers by renowned economic institutes. After years of high inflation and slow growth, especially in the eighties and early nineties, Brazil was able to recover and get back into game with the other global players. From a historic perspective, it is to say that the country has gone through large transition periods in the last century. Emerging from being a major coffee exporter until the early 20th century, Brazil now belongs to one of the most industrialized countries in Latin America. Although it is the largest country in the region in terms of population figures and geographical size, its GDP share in Latin America or annual growth rate offer a different conclusion. Nevertheless, the consulting market in Brazil has been growing in particular during the last ten years. Many European and North American consulting companies have invested into the country, built branch offices, and bought local firms. Although the market is still very young, its future potential has clearly been discovered. When thinking of Brazil, the words that tend to enter people's minds are positive-sounding ones such as Samba, Carnival, and beautiful beaches which radiate joy and energy. On the other side, issues like criminality, poverty, and high social inequality are often associated with

Brazil as well Either way it is almost certain that one will have heard of Brazil The country manifested itself in the mind of people and has made front page news more than once Objective relevance and research questions The objective of the thesis is neither to conduct a market evaluation nor to point out the importance and future relevance of Brazil in the world economy In fact this work is an empirical study on a market entry strategy which can serve as a reference for management consulting companies that want to enter the Brazilian consulting market Furthermore the work attempts to deliver a comprehensive picture of this market with the intention of elaborating on whether it is wise to invest in Brazil or whether there may be another more suitable Latin American country Yet the focus lies on the framework for strategy formulation
