Diagnosis boxes and tables classify and precisely describe each disorder, disease, while Consider Consultation boxes show the primary care physician when to refer. Diagnosis boxes highlight consistent and variable features to help produce the greatest diagnostic clarity. With a focus on helping the reader discriminate between one type of disorder and another, they promote clearer understanding and are superior to a criterion based model. Pearls and Perils boxes feature important advice, insights gained through the author's experiences, and cautions about potential problems in diagnosis and treatment.
