Understanding Childrens Drawings The Path To Manhood:

Understanding Children's Drawings Michaela Strauss, Wolfgang Schad, 1978-01-01 Based on the notes of Hanns Strauss and his collection of 6 000 drawings by 2 to 7 year olds this book describes the stages of development of children s drawings by using the framework of Rudolf Steiner s anthroposophical science In the introduction the early development of children s drawing is compared with works of art left by early civilizations Three phases of children s drawing are described 1 Up to 3 years the process of creation arises in a dreamy way and the child lives in the movements involved 2 from 3 to 5 years the child lets the arising picture take hold of his imagination and 3 from 5 to 7 years the child creates a clear interpretation of a theme chosen before beginning to draw Chapter 1 describes the development of the use of line while chapter 2 describes the development of the use of color Chapter 3 describes the increasing role of the imagination and the transition from the use of symbolic representations to narrative illustrative representations The last part of chapter 3 Notes on the Study of Man by Wolfgang Schad explains Rudolf Steiner s ideas about concurrent spiritual and physiological development Numerous color and black and white drawings illustrate the developmental concepts CB *Understanding children's drawings: the path to manhood.
