Wise Up The Challenge Of Lifelong Learning:

Wise Up Guy Claxton,1999-09-18 A new science of learning is emerging and Guy Claxton is at the forefront It was recently thought that one's learning was a matter of intelligence or of how hard one tried and that the differences in achievement were due to ability or effort Widespread attitudes to learning currently disable rather than enable because they concentrate almost exclusively on conscious reason This new science of learning tells us that everyone's learning power can be enormously increased Good learners need to know when to mull and drift as well as when to be analytical and focussed The methods that Claxton advocates allows the individual to be comfortable with uncertainty teaching the individual to rely on resourcefulness resilience and reflection qualities we have need for learning and growing into the future **Wise Up** Guy Claxton,1999 Readings for Reflective Teaching Andrew Pollard,2002-01-01 This unique book provides the reader with a mini library of over one hundred readings containing both classic and contemporary readings international contributors material drawn from books and journals An essential reference resource in its own right Readings for Reflective Teaching also contains numerous cross references to Andrew Pollard's Reflective Teaching **Wise Up!** Christian Jerusalem,2025-09-15 Part One presents the challenge of the Silver Tsunami providing evidence of the disruptive nature of this unprecedented demographic shift It shows why ignoring the challenges of an aging workforce negatively affects innovation and competitiveness You will learn why a well implemented Wise Organization strategy leverages the strengths of each generation ensuring long term success and driving innovation in today's rapidly evolving business landscape Part Two shares insights for what you need to consider when taking action These chapters go into debunking myths about older workers and what it looks like when age management goes wrong This section also examines the critical role of the People and Culture function and reframes Inclusion in the context of an aging workplace The chapter closes with an outline for how to navigate the Wise Management agenda as a strategic priority Part Three provides a clear step by step guide on how to build a Wise Organization that unleashes the full potential of your mature workforce while optimizing inter generational synergies You will learn how building a Wise Organization gives your company a distinct competitive advantage allowing you to achieve your corporate goals more effectively Part Four focuses on the future As demographic change becomes an unstoppable force organizations will have to get ready for the longevity economy Learn how visionary leaders will continue to transform their workplaces to thrive amid shifting age dynamics ensuring their organizations remain resilient and relevant for generations of employees yet to come *The Intelligent School* Barbara MacGilchrist,Jane Reed,Kate Myers,2004-02-28 In writing *The Intelligent School* the authors offer a practical resource to schools to help them maximize their improvement efforts The aim is to help schools to be intelligent organizations to be the type of school that can synthesize different kinds of knowledge experience and ideas in order to be confident about current achievements and be able to decide what to do next The Other 90% Robert K. Cooper,2002-10-22 For centuries it has been assumed that there are vast limits to human

capacity Now although a host of scientific discoveries prove this wrong a mindset of limits persists blocking us from our greatest possibilities and leaving us feeling bombarded by stress change and uncertainty No matter how hard we work no matter how much we give we re still not getting what we hoped for There is another way Dr Robert Cooper a neuroscience pioneer and leadership advisor urges us to take a radically different view of human capacity We are mostly unused potential he says employing less than 10 percent of our brilliance or hidden talents In easy to follow steps he explains how to develop and apply the art and science of your hidden capacity The art is the motivation and inspiration coming from the wonderful stories that are the heart of The Other 90% Dr Cooper draws on his wide ranging insights and experiences to show how it s possible to make a difference in yourself and others However inspiration without a way to turn vision into reality is an empty vessel Combining art with science Dr Cooper provides extraordinary help in the form of specific little known practical ways to use the latest research in neuroscience performance psychology and work physiology for excelling in a pressure filled world He shows you how to Increase energy at work and have more energy for personal and family life Activate the brain s alertness switches to defeat pressure and stress Use not only the brain in your head but the ones in your heart and gut Motivate exceptional ingenuity and performance in yourself and others The most exciting breakthroughs will not come from advances in technology but from a deeper realization of what it means to be most human and alive Many of the choices that can dramatically change our lives are simple and practical yet few people know what these choices are or how to apply them in work and life The Other 90% is your guide to new territory and new challenges
