WITH SPEED AND VIOLENCE

WHY SCIENTISTS FEAR TIPPING POINTS IN CLIMATE CHANGE

WITH A NEW PREFACE

"In the face of massive disinformation about climate change, what is a citizen to do? Read *With Speed and Violence* . . . A gripping, highly readable book—perhaps the best discussion of climate change for lay readers."

—Kristin Shrader-Frechette, *America Magazine*

With Speed And Violence Why Scientists Fear Tipping Points In Climate Change:

With Speed and Violence Fred Pearce, 2007-03-15 Nature is fragile environmentalists often tell us But the lesson of this book is that it is not so The truth is far more worrying Nature is strong and packs a serious counterpunch Global warming will very probably unleash unstoppable planetary forces And they will not be gradual The history of our planet s climate shows that it does not do gradual change Under pressure whether from sunspots or orbital wobbles or the depredations of humans it lurches virtually overnight from the Introduction Fred Pearce has been writing about climate change for eighteen years and the more he learns the worse things look Where once scientists were concerned about gradual climate change now more and more of them fear we will soon be dealing with abrupt change resulting from triggering hidden tipping points Even President Bush s top climate modeler Jim Hansen warned in 2005 that we are on the precipice of climate system tipping points beyond which there is no redemption As Pearce began working on this book normally cautious scientists beat a path to his door to tell him about their fears and their latest findings *With Speed and Violence* tells the stories of these scientists and their work from the implications of melting permafrost in Siberia and the huge river systems of meltwater beneath the icecaps of Greenland and Antarctica to the effects of the ocean conveyor and a rare molecule that runs virtually the entire cleanup system for the planet Above all the scientists told him what they re now learning about the speed and violence of past natural climate change and what it portends for our future *With Speed and Violence* is the most up to date and readable book yet about the growing evidence for global warming and the large climatic effects it may unleash *Climate Change and Society* John Urry, 2011-06-20 This is the first book to develop a proper sociology of climate change and will be an excellent companion to Tony Giddens *The Politics of Climate Change* *Koenig and Schultz's Disaster Medicine* Kristi L. Koenig, Carl H. Schultz, 2016-02-16 As societies become more complex and interconnected the global risk for catastrophic disasters is increasing Demand for expertise to mitigate the human suffering and damage these events cause is also high A new field of disaster medicine is emerging offering innovative approaches to optimize disaster management Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources This definitive work brings together a coherent and comprehensive collection of scientific observations and evidence based recommendations with expert contributors from around the globe This book identifies essential subject matter clarifies nomenclature and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises It also describes in depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical biological and radiological agents *Natural Resources and Social Conflict* M. Schnurr, L. Swatuk, 2012-03-02 This volume brings together international scholars reflecting on the theory and practice of international security human security natural resources and environmental change It contributes by centring the margins and privileging alternative conceptions and understandings of environmental in security **Climate Change** David

Downie, Kate Brash, Catherine Vaughan, 2009-03-03 An accessible introduction to climate change that outlines key scientific economic and political issues reviews how the global community has addressed the issue to date and discusses the options being explored for further action Climate Change A Reference Handbook offers readers a way to separate science from politics on this crucial and often contentious issue It provides a comprehensive introduction to the science and public policy of climate change including discussion of historical developments today's key concepts and the future of climate science and policy Climate Change begins by explaining the science behind global climate change including the growing consensus that human activity is a major contributing factor It then takes an objective look at the key conflicts in climate science and policy describes those that have been resolved and offers a balanced review of proposals for those that have not A separate chapter focuses on the scientific economic and political aspects of climate change as they are playing out specifically in the United States

After the Car Kingsley Dennis, John Urry, 2013-05-20 It is difficult to imagine a world without the car and yet that is exactly what Dennis and Urry set out to do in this provocative new book They argue that the days of the car are numbered powerful forces around the world are undermining the car system and will usher in a new transport system sometime in the next few decades Specifically the book examines how several major processes are shaping the future of how we travel including Global warming and its many global consequences Peaking of oil supplies Increased digitisation of many aspects of economic and social life Massive global population increases The authors look at changes in technology policy economy and society and

make a convincing argument for a future where by necessity the present car system will be re designed and re engineered Yet the book also suggests that there are some hugely bleak dilemmas facing the twenty first century The authors lay out what they consider to be possible post car future scenarios These they describe as local sustainability regional warlordism and digital networks of control After The Car will be of great interest to planners policy makers social scientists futurologists those working in industry as well as general readers Some have described the 20th Century as the century of the car Now that century has come to a close and things are about to change Mobile Lives Anthony Elliott, John Urry, 2010-06-10 This book sets out with remarkable clarity and insight the contradictions of mobile societies and of mobile lives Such mobilities are full of dilemmas for individuals for corporations for states and in a way for the globe itself Mobile Lives is an up to date provocatively written book which examines social processes that are on the edge **Climate Change as a Crisis in World Civilization** Joseph Wayne Smith, David J. C. Shearman, Sandro Positano, 2007 This study examines the scientific evidence relating to abrupt or dangerous climate change and explores the social political legal and philosophical significance of this evidence The authors locate the climate crisis within the context of a wider crisis of civilization consisting of a series of converging threats to human survival **Journal of Environmental Law and Litigation** , 2010 The Theory of Evolutionary Relativity Ezra Niesen, 2008 **Green Business Basics: 24 Lessons for Meeting the Challenges of Global Warming** Nick Dallas, 2009 In this new era manufacturers industrialists and regular businesspeople need to better understand how customer demand combined with a dwindling access to resources and a higher cost of materials affects their business At the same time the new trend towards greener goods opens up a new market that every business can benefit from Green Business Basics provides a broad overview of the subject matter for the businessperson and concerned citizen who wants to acquire a fundamental understanding of the issues and challenges BOOK JACKET **God, Creation, and Climate Change** Richard W. Miller (II.), 2010 Leading theologians and ethicists reflect on the most serious crisis of our time offering insights from theology history and ethics to aid in the transformation required to meet it The magnitude of the problem of environmental degradation and climate change requires a complete rethinking and reorientation of our way of being in the world Responding to this crisis requires not only a conversion of the will but even more fundamentally a transformation of the imagination that is the capacity to think of other ways of being thinking and acting in the world These original essays by a distinguished group of Catholic scholars assess the gravity of the situation and offer resources from biblical and theological traditions for the necessary mobilization of will and the conversion of our imaginations Book jacket Capitalism and Christianity, American Style William E. Connolly, 2008-04-09 A leading political theorist's impassioned call for the democratic left to counter the conservative stranglehold over American religious and economic culture **Encyclopedia of Global Warming** Steven I. Dutch, 2010 Designed to provide students at the high school and undergraduate levels with a convenient source of information on the fundamental science and sociopolitical issues including the debates and controversies

surrounding climate change The study of climate change involves not only scientists but also politicians policy makers businesses government and nongovernment agencies and the general public A student attempting to understand both the environmental science and social issues and controversies will encounter not just scientific terms and concepts but political organizations geographic areas social concepts persons countries organizations and laws as well The essays in the set fall into one or more of the following broad categories animals Arctic and Antarctic astronomy chemistry and geochemistry climatic events and epochs conferences and meetings cryology and glaciology diseases and health effects economics industries and products energy environmentalism conservation and ecosystems ethics human rights and social justice fossil fuels geology and geography laws treaties and protocols meteorology and atmospheric sciences nations and peoples oceanography organizations and agencies physics and geophysics plants and vegetation pollution and waste popular culture and society science and technology transportation and water resources Publisher Nature, Society and Environmental Crisis Bob Carter,Nickie Charles,2010-04-05 Many of the chapters in the present volume were first presented at the 2008 BSA Annual Conference of Social Worlds Natural Worlds held at the University of Warwick Acknowledgements
