The Water Cycle At Work Water In Our World:

Water Cycle at Work Rebecca Olien, 2016-01-01 Explains the stages of the water cycle and how the water cycle impacts the earth's water supply

The Water Cycle Kristina Lyn Heitkamp, 2017-12-15 Water covers almost 75 percent of Earth's surface. People, plants, and animals all need water to live. Through accessible language and engaging images, readers will follow the flow of water through the water cycle. Using real-life examples, readers will identify water cycle steps such as evaporation from puddles and condensation found in clouds or fog. The text also shares opportunities to observe the powerful movement of water. Sidebars offer further information such as questions that invite readers to consider water use in everyday life and the many human-related activities that affect the water cycle.

How Long Is the Water Cycle? Emily Hudd, 2019-08 Examines the processes of the water cycle

Thirsty Planet Constance Elizabeth Hunt, 2013-07-18 By the year 2025, nearly 2 billion people will live in regions experiencing absolute water scarcity. In the face of this emerging crisis, how should the planet's water be used and managed? Current international policy sees nature competing with human uses of water. Hunt takes issue with this perspective. She suggests that nature is the source of water and only by making the conservation of nature an absolute priority will we have the water we need for human use in the future. It is essential, therefore, to manage water in ways that maintain the water cycle and the ecosystems that support it. This book looks at the complexity of the problem. It provides a wide array of ideas, information, case studies, and ecological knowledge, often from remote corners of the developing world that could provide an alternative vision for water use and management at this critical time. Essential and compelling reading for students on courses related to water resource management and development, water managers, and decision makers, and non-specialists with an interest in global water issues.
