The White Mans Burden Historical Origins Of Racism In The United States:

The White Man's Burden Winthrop D. Jordan, 1974 An abridgement of the prize winning *White Over Black* The Rise and Fall of the White Republic Alexander Saxton, 2003 Saxton asks why white racism remained an ideological force in America long after the need to justify slavery and Western conquest had disappeared *Afro-American Life, History and Culture*, 1985 *Racial Classification and History* E. Nathaniel Gates, 1997 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Also available individually by volume 1 The Concept of Race in Natural and Social Science 0 8153 2600 9 288 pages 2 Cultural and Literary Critiques of the Concepts of Race 0 8153 2601 7 3 Racial Classification and History 0 8153 2602 5 4 The Judicial Isolation of the Racially Oppressed 0 8153 2599 1 Taming Cannibals Patrick Brantlinger, 2011-09-16 In *Taming Cannibals* Patrick Brantlinger unravels contradictions embedded in the racist and imperialist ideology of the British Empire For many Victorians the idea of taming cannibals or civilizing savages was oxymoronic civilization was a goal that the nonwhite peoples of the world could not attain or at best could only approximate yet the civilizing mission was viewed as the ultimate justification for imperialism Similarly the supposedly unshakeable certainty of Anglo Saxon racial

superiority was routinely undercut by widespread fears about racial degeneration through contact with lesser races or concerns that Anglo Saxons might be superseded by something superior an even fitter or higher race or species Brantlinger traces the development of those fears through close readings of a wide range of texts including Robinson Crusoe by Daniel Defoe Fiji and the Fijians by Thomas Williams Daily Life and Origin of the Tasmanians by James Bonwick The Descent of Man by Charles Darwin Heart of Darkness by Joseph Conrad Culture and Anarchy by Matthew Arnold She by H Rider Haggard and The War of the Worlds by H G Wells Throughout the wide ranging capacious and rich Taming Cannibals Brantlinger combines the study of literature with sociopolitical history and postcolonial theory in novel ways The Unsteady March Philip A. Klinkner, Rogers M. Smith, 1999-11 With its insights into contemporary racial politics The Unsteady March offers a penetrating and controversial analysis of American race relations across two centuries Latin America in Caricature John J. Johnson, 2013-12-06 Not many readers will thank the author as he deserves for he has told us more about ourselves than we perhaps wish to know predicted Latin America in Books of Latin America in Caricature an exploration of more than one hundred years of hemispheric relations through political cartoons collected from leading U S periodicals from the 1860s through 1980 The cartoons are grouped according to recurring themes in diplomacy and complementing visual imagery Each one is accompanied by a lengthy explanation of the incident portrayed relating the drawing to public opinion of the day Johnson s thoughtful introduction and the comments that precede the individual chapters provide essential background for understanding U S attitudes and policies toward Latin America **Encyclopedia of African American History**
