Constructivist Strategies for Teaching English Language Learners Sharon Adelman Reyes, Trina Lynn Vallone, 2007-12-13 The authors embrace the constructivist paradigm as a natural teaching and learning response to the specific needs of ELLs. A unique and remarkable contribution to the theoretical and research-based literature, Karen C. Evans, Principal, David Walker Elementary School, Evanston, IL, Reyes and Vallone invite readers on an exciting journey inside classrooms where knowledgeable, caring, advocacy-oriented teachers effectively engage English Language Learners through culturally and linguistically responsive pedagogy. Carlos J. Ovando, Professor, Arizona State University, combines constructivist methods and culturally responsive instruction to improve educational equity. As the population of English Language Learners (ELLs) grows, educators need new strategies to effectively promote second language acquisition and literacy development in all content areas. By linking constructivist pedagogies to ELL instruction, *Constructivist Strategies for Teaching English Language Learners* provides a culturally responsive approach that builds on students' experiences and strengths. Sharon Adelman Reyes and Trina Lynn Vallone supply in-depth classroom examples and grade-level connections to help readers apply constructivist methods in teaching ELLs. Designed for inclusive classrooms with diverse student backgrounds and abilities, this hands-on guide examines perspectives on second language acquisition and learning, program models for ELLs, instructional practices informed by critical pedagogy, examples of constructivist classroom programs, mainstream and bilingual teachers, ESL specialists, principals, and teacher leaders. Will find the conceptual foundation and practical methods needed to promote academic success for ELLs.

YC Young Children, 2008 **Boletín Internacional de Bibliografía Sobre Educación**, 2003 **American Book Publishing Record**, 2003 Everyday Activities to Promote Visual Efficiency Ellen Trief, Rona Shaw, 2009 Early intervention services are essential for infants and toddlers who are visually impaired and have some functional vision that they will be able to use for everyday activities, not only to ensure their early development but also to help them learn to use their vision with maximum effectiveness right from the start. *Everyday Activities to Promote Visual Efficiency* offers guiding principles for early intervention with very young children who are visually impaired and who may also have additional disabilities. This important new resource provides simple activities that can be incorporated easily by families and service providers into the everyday routines of a baby or child to facilitate early visual development and use of functional vision.

Contemporary Issues in Early Childhood Education in Germany Wilfried Smidt, 2018-07-26 The importance of early childhood education has been emphasized by a large body of research that has demonstrated that children's cognitive and socio-emotional development is significantly

influenced by the quality of the education and care received from their families and in preschool. Consequently, it is important to investigate factors that pertain to the provision of a high quality education and high quality care for young children. This book addresses several important issues that are currently under discussion with respect to this topic. In particular, the book focuses on three topics presently under debate: the professionalization of pedagogues working in the field of early childhood education, the quality of education and care provided by families and preschools, and the promotion of children from socio-economically disadvantaged families. Providing an excellent overview of current research in Germany, this book will be useful to readers who are interested in international perspectives on early childhood education and who want to gain insight into relevant topics discussed in other countries. This book was originally published as a special issue of *Early Child Development and Care*. **Overview and Directory**, 1985 **Starting With Their Strengths** Deborah C. Lickey, Denise J.

Powers, 2015-04-17 This book provides a comprehensive and practical guide to using the project approach when teaching young children with special needs. While focusing on children's individual strengths, which include their interests, intelligences, and unique styles of learning, this resource demonstrates teaching strategies that address multiple areas of development. Using scenarios from their own practice, the authors examine the process of accessing children's strengths to facilitate social, emotional, cognitive, and motor development, including concepts and skills. The authors provide tools to determine, organize, and plan with children's strengths and demonstrate the use of documentation as an authentic assessment of children's skills and goals. Teachers will use this book to create learning environments that enrich learning for all children.

Research in Early Childhood Education for Sustainability Julie Davis, Sue Elliott, 2014-06-20 Sustainability is a global issue that urgently needs addressing and for which the most serious consequences are for children and future generations. This insightful research text tackles one of the most significant contemporary issues of our times: the nexus between society and environment and how early childhood education can contribute to sustainable living. By offering international and multidisciplinary research perspectives on Early Childhood Education for Sustainability, each chapter explores and investigates the complex topic of sustainability and its relationship to early childhood education. A particular emphasis that runs through this text is young children as empowered citizens capable of both contributing to and creating change for sustainability. The chapter authors work from or are aligned with a transformative education paradigm that suggests the socio-constructivist frameworks currently underpinning Early Childhood Education require reframing in light of the social transformations necessary to address humanity's unsustainable, unjust, and unhealthy living patterns. This research text is designed to be provocative and challenging; in so doing, it seeks to encourage exploration of current understandings about Early Childhood Education for Sustainability, offers new dimensions for more deeply informed practice, and proposes avenues for further research in this field. *Bulletin*, 1957 **Building a Language-focused Curriculum for the Preschool Classroom: A planning guide**, 1995 **Bulletin** United States.
