John Gower and the Limits of the Law Conrad van Dijk, 2013 An examination of the ways in which Gower's poetry engages with contemporary law and legal questions It has long been thought that John Gower was probably a lawyer before turning to poetry and this study reveals his active engagement with contemporary legal debates they include constitutional questions jurisdictional issues private vengeance jurisprudential concepts such as equity and the rigor iuris and aspects of criminal law

The author argues that the *Confessio Amantis* in particular demonstrates Gower's uncertainty about how to reconcile the ideal of a just law with alternative modes of justice such as self help royal discretion and divine will The book also examines the parallel development of the exemplum and casus in medieval literature Exempla frequently create a sense of narrative closure by means of some form of punishment or as Gower would put it vengeance How then do we set Gower's reputation as a sympathetic writer alongside his frequent desire for closure and punishment What are the limits of exemplarity and law These questions are answered by reading Gower in relation to the volatile politics of the Ricardian period and in comparison with the poetic concerns of contemporary writers such as Chaucer and Langland In so doing the book provides a searching introduction to the intersection between literature and law in the late fourteenth century Dr Conrad van Dijk is Assistant Professor of English at Concordia University College of Alberta Edmonton Canada

The Signifier and the Signified F. Noske, 2012-12-06 The studies collected in this volume deal with the interpretation of opera In most cases the results are based on structural analysis a concept which may require some clarification in this context During the past decade structure and structural have become particularly fashionable terms lacking exact denotation and used for the most divergent purposes As employed here structural analysis is concerned with such concepts as relationship coherence and continuity more or less in contrast to formal analysis which deals with measurable material In other words I have analysed the structure of an opera by seeking and examining factors in the musico dramatic process whereas analysts of form are generally preoccupied with the study of elements contained in the musical object Though admittedly artificial the dichotomy of form and structure may elucidate the present situation with regard to the study of opera Today nearly one hundred years after the death of Wagner the proclaimed anti thesis of Oper und Drama is generally taken for what it really was a means to propagate the philosophy of its inventor The conception of opera whether continuous or composed of numbers as a special form of drama is no longer contested Nevertheless musical scholarship has failed to draw the consequences from this view and few scholars realize the need to study general theory of drama and more specifically the dramatic experience

Magic Songs of the Finns (Folklore History Series) John Abercromby, 2024-05-30 A collection of magic songs spells and charms in one of the largest published volumes of traditional Finnish folk music First collected and published by Elias Lönnrot in 1880 and later translated into English by John Abercromby and republished in 1896 Magic Songs of the Finns is a beautiful volume of

forgotten wonder Over 600 spells and charms from rural Finland are collected in this book to assist its reader in capturing the sound and passion of a very special culture These songs were traditionally sung to ask for help from the spirits that the Finnish believed possessed all objects *A Minicourse on Stochastic Partial Differential Equations* Robert C. Dalang, 2009 This title contains lectures that offer an introduction to modern topics in stochastic partial differential equations and bring together experts whose research is centered on the interface between Gaussian analysis stochastic analysis and stochastic PDEs *Consciousness* Rodrick Wallace, 2005-12-06 This book is not an intellectual history or popular summary of recent work on consciousness in humans Bernard Baars 1988 Edelman and Tononi 2000 and many others have written such and done it well indeed This book rather brings the powerful analytic machinery of communication theory to bear on the Global Neuronal Workspace GNW model of consciousness which Baars introduced and does so in a formal mathematical manner It is not the first such attempt The philosopher Fred Dretske 1981 independent of Baars long ago outlined how information theory might illuminate the understanding of mind Adapting his approach on the necessary conditions for mental process we apply a previously developed information theory analysis of interacting cognitive biological and social modules to Baars GNW which has become the principal candidate for a standard model of consciousness Invoking an obvious canonical homology with statistical physics the method when iterated in the spirit of the Hierarchical Linear Model of regression theory generates a fluctuating dynamic threshold for consciousness which is similar to a tunable phase transition in a physical system The phenomenon is however constrained to a manifold atlas structure analogous to a retina an adaptable Rate Distortion manifold whose topology in a large sense reflects the hierarchy of embedding constraints acting on consciousness This view greatly extends what Baars has characterized as contexts *Embattled* Emily Katz Anhalt, 2021-09-14 An incisive exploration of the way Greek myths empower us to defeat tyranny As tyrannical passions increasingly plague twenty first century politics tales told in ancient Greek epics and tragedies provide a vital antidote Democracy as a concept did not exist until the Greeks coined the term and tried the experiment but the idea can be traced to stories that the ancient Greeks told and retold From the eighth through the fifth centuries BCE Homeric epics and Athenian tragedies exposed the tyrannical potential of individuals and groups large and small These stories identified abuses of power as self defeating They initiated and fostered a movement away from despotism and toward broader forms of political participation Following her highly praised book *Enraged Why Violent Times Need Ancient Greek Myths* the classicist Emily Katz Anhalt retells tales from key ancient Greek texts and proceeds to interpret the important message they hold for us today As she reveals Homer's *Iliad* and *Odyssey* Aeschylus's *Oresteia* and Sophocles's *Antigone* encourage us as they encouraged the ancient Greeks to take responsibility for our own choices and their consequences These stories emphasize the responsibilities that come with power any power whether derived from birth wealth personal talents or numerical advantage reminding us that the powerful and the powerless alike have obligations to each other They assist us in restraining destructive passions and balancing tribal

allegiances with civic responsibilities They empower us to resist the tyrannical impulses not only of others but also in ourselves In an era of political polarization Embattled demonstrates that if we seek to eradicate tyranny in all its toxic forms ancient Greek epics and tragedies can point the way **A Long Way from Tipperary** John Dominic Crossan, 2020-04-03

From his boyhood in Tipperary Kildare and Donegal to the pinnacle of biblical scholarship John Dominic Crossan's adventurous spirit has led him to seek out the truth no matter where it leads In this delightful memoir the former monk and controversial biblical scholar tells how his work as a pioneering historical Jesus expert has led him from the traditional Catholicism of his youth to a more complex sophisticated faith With characteristic wit and candor he describes the joys and challenges of growing up in Ireland and reveals how his life experiences from Ireland to America Rome and Israel from monastery to university from priesthood to marriage have shaped his understanding of God Jesus the Church and what it means to be a true Christian **Folklore** ,1890
