The Visual Turn The Visual Turn:

The Visual Turn Angela Dalle Vacche, 2003 This collection of essays demonstrates the usefulness of looking at cinema with the analytical methods provided by art theory The Visual Turn is a dialogue between art historians and film theorists from the silent period to the aftermath of World War II **The Visual Turn** Sandria Freitag, 2017-10-02 The Visual Turn South Asia Across the Disciplines explores new perspectives made possible by the evidence drawn from visual culture This evidence is utilized by historians literary analysts anthropologists and in a new way art historians Focusing on built environments within their urban contexts the interactions of buildings roads and bodies the meaning making achieved through consumption of images on their own or in concert with literary texts all contribute to a much broader and deeper understanding of change in South Asia Juxtaposed these case studies not only approach their topics in a multi disciplinary manner but also make clear just what scholars from various disciplines can learn from each other to add nuance and depth to their own analyses In the process the authors demonstrate how the application of different methods and theorizing when coupled with a fascinating range of types of evidence contribute to a significant broadening of our abilities to interpret the past and the present In particular these essays bring new ways of thinking about cities as well as the multiple ways that visual culture contributes to individual and collective forms of identity narratives that are negotiated at key moments of change in South Asia Readers will see their own materials and historicized contexts with new eyes This book was published as a special issue of South Asia Journal of South Asian Studies *The Visual Turn and the Transformation of the Textbook* James A. LaSpina, 2014-04-04 A study and analysis of how the computer is transforming the textbook and our modes of literacy from print based to visual forms **The Visual Culture Reader** Nicholas Mirzoeff, 2002 The diverse essays collected here constitute an exploration of the emerging interdisciplinary field of visual culture and examine why modern and postmodern culture place such a premium on rendering experience in visual form Visual Culture: What is visual culture studies? Joanne Morra, Marquard Smith, 2006 These texts represent both the formation of visual culture and the ways in which it has transformed and continues to transform our understanding and experience of the world as a visual domain

Tomorrow on Cassette Benjamin Duester, 2025-05-15 Growing sales numbers for cassette tapes in the Global North since the early 2010s have led mass media outlets to repeatedly proclaim a tape revival Yet the grassroots projects of devotees in niche punk noise and hip hop DIY music scenes have continuously upheld the unique material benefits of cassettes while wider society considered them a relic of bygone times Contrasting the popular notion of current cassette use being a mere side effect of the blazing interest in the vinyl record this book argues that the lasting embrace of tapes is based on complex cultural economic and material factors that shape cassettes as hybrid artefacts of music in the new media age Drawing on interviews with 85 experts active in DIY music cultures as independent record shop operators musicians event promoters fans and collectors across Japan Australia and the United States Tomorrow on Cassette presents a seminal exploration of how the cassette tape's significance as a tool for material expression creativity and sociality perseveres in the 21st century *A text book of physiology* Sir Michael Foster, 1900 **The Pictorial Turn** Neal Curtis, 2013-09-13 In 1992 W J T Mitchell argued for a pictorial turn in the humanities registering a renewed interest in and prevalence of pictures and images in what had been understood as an age of simulation or an increasingly extensive and diverse visual culture However in what is often characterized as a society of the spectacle we still do not know exactly what pictures or images are what their relation to language is how they operate on observers and the world how their history is to be understood and what is to be done with or about them In this seminal collection of essays the first to be devoted to the pictorial turn theorists from across the humanities and social sciences representing the disciplines of art history philosophy geography media studies visual studies and anthropology are brought together with a paleontologist and practising artists to consider amongst other things the relation between pictures and images the power of landscape the nature of political images the status of images in the

natural sciences the life of images and the pictorial uncanny With these topics in mind picture theory and iconology exceed in scope the objects of visual culture conventionally understood This book was published as a special issue of *Culture Theory and Critique* Wissenschaftliche Abhandlungen Hermann von Helmholtz,1895 A Text Book of Physiology: comprising the remainder of bk. 3. The senses and some special muscular mechanisms, and bk. 4.
