The Web Of Belief 2nd Edition:

The Web of Belief Willard Van Orman Quine, J. S. Ullian, 1978 The Web of Belief provides a philosophical base for the study and practice of the art of argumentation Stressing the importance of language in understanding and expressing ideas the authors explore such questions as What concepts do we believe to be true and why And how can we convince others to accept our own beliefs Drawing on everyday problems of communication creative exercises give the student practice in formulating and testing his own arguments as well as those of others God at the Crossroads of Worldviews Paul Seungoh Chung, 2016-10-22 Debates about the existence of God persist but remain at an impasse between opposing answers God at the Crossroads of Worldviews reframes the debate from a new perspective characterizing the way these positions have been defined and defended not as wrong per se but rather as odd or awkward Paul Chung begins with a general survey of the philosophical debate regarding the existence of God particularly as the first cause and how this involves a bewildering array of often incommensurable positions that differ on the meaning of key concepts criteria of justification and even on where to start the discussion According to Chung these positions are in fact arguments both for and against larger more comprehensive intellectual positions which in turn comprise a set of rival worldviews Moreover there is no neutral rationality completely independent of these worldviews and capable of resolving complex intellectual questions such as that of the existence of God Building from Alasdair MacIntyre's writings on rival intellectual traditions Chung proposes that to argue about God we must first stand at the crossroads of the different intellectual journeys of the particular rival worldviews in the debate and that the discovery of such a crossroad itself constitutes an argument about the existence of God Chung argues that this is what Thomas Aquinas accomplished in his Five Ways which are often misunderstood as simple proofs From such crossroads the debate may proceed toward a more fruitful exploration of the question of God's existence Chung sketches out one such crossroad by suggesting ways in which Christianity and scientific naturalism can begin a mutual dialogue from a different direction God at the Crossroads of Worldviews will be read by philosophers of religion advanced undergraduate and graduate students and theologians and general readers interested in the new atheism debates **A Primer in Positive Psychology** Christopher Peterson, 2006-07-27 Positive psychology is the scientific study of what goes right in life from birth to death and at all stops in between It is a newly christened approach within psychology that takes seriously the examination of that which makes life most worth living Everyone's life has peaks and valleys and positive psychology does not deny the valleys Its signature premise is more nuanced but nonetheless important what is good about life is as genuine as what is bad and therefore deserves equal attention from psychologists Positive psychology as an explicit perspective has existed only since 1998 but enough relevant theory and research now exist to fill a textbook suitable for a semester long college course A Primer in Positive Psychology is thoroughly grounded in scientific research and covers major topics of concern to the field positive experiences such as pleasure and flow positive traits such as character strengths values and talents and the social

institutions that enable these subjects as well as what recent research might contribute to this knowledge Every chapter contains exercises that illustrate positive psychology a glossary suggestions of articles and books for further reading and lists of films websites and popular songs that embody chapter themes A comprehensive overview of positive psychology by one of the acknowledged leaders in the field this textbook provides students with a thorough introduction to an important area of psychology

Evidentialism and Epistemic Justification Kevin McCain,2014-05-09 Evidentialism is a popular theory of epistemic justification yet as early proponents of the theory Earl Conee and Richard Feldman admit there are many elements that must be developed before Evidentialism can provide a full account of epistemic justification or well founded belief It is the aim of this book to provide the details that are lacking here McCain moves past Evidentialism as a mere schema by putting forward and defending a full fledged theory of epistemic justification In this book McCain offers novel approaches to several elements of well founded belief Key among these are an original account of what it takes to have information as evidence an account of epistemic support in terms of explanation and a causal account of the basing relation the relation that one's belief must bear to her evidence in order to be justified that is far superior to previous accounts The result is a fully developed Evidentialist account of well founded belief

Mindful Inquiry in Social Research Valerie Malhotra Bentz,Jeremy J. Shapiro,1998-06-24 This innovative introduction to research in the social sciences guides students and new researchers through the maze of research traditions cultures of inquiry and epistemological frameworks It introduces the underlying logic of ten cultures of inquiry ethnography quantitative behavioral science phenomenology action research hermeneutics evaluation research feminist research critical social science historical comparative research and theoretical research It clarifies conceptual and intellectual traditions in research and puts researchers firmly in the investigative saddle able to choose justify and explain the intellectual framework and personal rationale of their research

Introducing Philosophy: Knowledge and Reality Jack S. Crumley II,2016-08-15 This book introduces the central issues of metaphysics and epistemology from skepticism justification and perception to universals personal identity and free will Though topically organized the book integrates positions and examples from the history of philosophy Plato Descartes and Leibniz are discussed alongside Quine Kripke and Haslanger Peripheral ideas and related historical asides are offered in boxes interspersed within the text providing further depth without disrupting the author's lucid explanations of central themes and arguments Original illustrations by Gillian Wilson are included throughout giving interesting and clear visual representations of many of the book's examples and thought experiments

A New, Objective, Pro-objectivity Normative Theory Frederick Farrand,2011 A New Objective Pro Objectivity Normative Theory tries to solve fundamental normative moral social political educational legal etc problems It defends a uniquely evidence based objective theory The theory argues it has one objective primary end and plural a objective secondary ends irrelevant to that end The theory's basis permits great liberty as well as cultural sexual artistic lifestyle and much other diversity regarding secondary ends The primary end is a general principle

implying non sexism non racism types of happiness freedom education sympathy peace democracy altruism flourishing fairness and much more Emotions and various other subjective experiences are considered important Part II discusses such specific practical applications at length Part I mainly explains and defends the theory s foundation and general guidelines One guideline prescribes applying the theory s rationally critical approach to the theory stressing that fallibilism and skepticism may be appropriate regarding some suggested specifics but that future research can increasingly avoid problems here epticism may be appropriate regarding some suggested specifics but that future research can increasingly avoid problems here epticism may be appropriate regarding some suggested specifics but that future research can increasingly avoid problems here epticism may be appropriate regarding some suggested specifics but that future research can increasingly avoid problems here

Karl Jaspers' Theory of Irrationality Daniel Adsett,2024-12-16 Defending the view that Karl Jaspers concept of irrationality *Widervernunft* is better able to account for pathological patterns of individual and collective thinking Karl Jaspers Theory of Irrationality From Delusions to Worldviews argues that irrationality is incorrigibility a blockage of reason as the will to communication Highlighting the importance of freedom and creativity at the heart of reason Vernunft Daniel Adsett analyzes examples of delusional thought through a Jaspersian lens He shows that irrationality arises when we hold to certain attitudes with an incorrigible conviction and refuse to genuinely consider the possibility that we might need to revise or change our beliefs In presenting these arguments Adsett offers a novel contribution to contemporary debates about the character of reason while rehabilitating an often neglected aspect of Jaspers thought

A Philosophical Critique of Empirical Arguments for Postmortem Survival Michael Sudduth,2016-01-26 Sudduth provides a critical exploration of classical empirical arguments for survival arguments that purport to show that data collected from ostensibly paranormal phenomena constitute good evidence for the survival of the self after death Utilizing the conceptual tools of formal epistemology he argues that classical arguments are unsuccessful

The Process of Argument Michael Boylan,2020-04-23 *The Process of Argument* An Introduction is a necessary companion for anyone seeking to engage in successful persuasion To organize construct and communicate arguments It is both comprehensive and accessible An authoritative guide to logical thinking and effective communication The book begins with techniques to improve reading comprehension including guides on navigating through fake news and internet trolls Then readers are taught how to reconstruct deductive inductive and abductive presentations so that the logical structure is explicit And finally there is a step by step guide for responding to these texts via the argumentative essay Along the way are current examples from social media and elsewhere on the internet along with guides for assessing truth claims in an ever complicated community worldview Throughout are carefully selected reading questions and exercises that will pace readers in order to ensure that the text is securely grasped and successfully applied Key Features Offers guidance on how to read a text through self analysis and social criticism Provides a step by step procedure for allowing the student to move from reading to

reconstruction to being prepared to write an effective argumentative essay Presents truth theory and shows readers how they can helpfully acquaint themselves with a version of realistic foundational epistemology Offers guidelines and helpful tools on how best to structure an argumentative pro or con essay Includes expansive coverage of inductive logic through the use and assessment of statistics Covers abductive logic as it applies to the analysis of narrative in argumentative writing Has up to date examples from the media including from blogs social media and television Includes a helpful glossary of all important terms in the book

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy action theory which concerns the nature of motivation for human action and praxiology the study of human action By bringing different perspectives together the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action The volume consists of three main parts The first part Reasons for Action bridges the gap between reasons for action theories and praxiology The second part of the volume titled Theories of Action explores philosophical approaches to action Finally in the third part Applications the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment solving action incompleteness and knowledge management The ultimate goal of this volume is to broaden the scientific view of action to establish a perspective on action that is permeated by moral theories on the one hand and accounts focused on efficiency and economy of action on the other hand This work is the newest volume in Transaction s Praxiology series

Nietzsche and the Problem of Subjectivity João Constâncio, Maria João Mayer Branco, Bartholomew Ryan, 2015-10-16 Nietzsche s critique of the modern subject is often presented as a radical break with modern philosophy and associated with the so called death of the subject in 20th century philosophy But Nietzsche claimed to be a psychologist who was trying to open up the path for new versions and sophistications of the soul hypothesis Although there is no doubt that Nietzsche gave expression to a fundamental crisis of the modern conception of subjectivity both from a theoretical and from a practical existential perspective it is open to debate whether he wanted to abandon the very idea of subjectivity or only to pose the problem of subjectivity in new terms The volume includes 26 articles by top Nietzsche scholars The chapters in Part I Tradition and Context deal with the relationship between Nietzsche s views on subjectivity and modern philosophy as well as with the late 19th century context in which his thought emerged Part II The Crisis of the Subject examines the impact of Nietzsche s critique of the subject on 20th century philosophy from Freud to Heidegger to Dennett but also in such authors as Deleuze Foucault Derrida or Luhmann Part III Current Debates From Embodiment and Consciousness to Agency shows that the way in which Nietzsche engaged with such themes as the self agency consciousness embodiment and self knowledge makes his thought highly relevant for philosophy today especially for philosophy of mind and ethics

Theism and Explanation Gregory W. Dawes, 2012-09-10 In this timely study Dawes defends the methodological naturalism of the sciences Though religions offer what appear to be explanations of various facts about the world the scientist as scientist will not take such

proposed explanations seriously Even if no natural explanation were available she will assume that one exists Is this merely a sign of atheistic prejudice as some critics suggest Or are there good reasons to exclude from science explanations that invoke a supernatural agent On the one hand Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the conditions under which this would be true are unlikely ever to be fulfilled On the other hand he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue The Longing for Total Revolution Reconsidered Jeffrey

Friedman,2022-11-10 In *The Longing for Total Revolution* Philosophic Sources of Discontent from Rousseau to Marx and Nietzsche 1986 the eminent intellectual historian and political theorist Bernard Yack offered a sweeping reinterpretation of modern thought Yack argued that Rousseau prompted a line of philosophy that continued through Kant Hegel Marx and Nietzsche which viewed the essential spirit of modernity as dehumanizing and therefore implied in a matter that became increasingly clear over time that a total revolution against modernity is necessary In this volume seven political theorists and historians including Yack himself reconsider the book s substantive and methodological innovations its limitations and its current relevance Contributors to the volume discuss inter alia left Kantianism in historical context the theological origins of the longing for total revolution the question of whether the tradition identified by Yack is connected to twentieth century totalitarianism and the unique form of critical genealogy pioneered by Yack s book The volume concludes with Yack s response to the other contributors chapters This book was originally published as a special issue of the *Critical Review*

Learning, Design, and Technology J. Michael Spector,Barbara B. Lockee,Marcus D. Childress,2023-10-14 The multiple related fields encompassed by this Major Reference Work represent a convergence of issues and topics germane to the rapidly changing segments of knowledge and practice in educational communications and technology at all levels and around the globe There is no other comparable work that is designed not only to gather vital current and evolving information and understandings in these knowledge segments but also to be updated on a continuing basis in order to keep pace with the rapid changes taking place in the relevant fields The Handbook is composed of substantive 5 000 to 15 000 words peer reviewed entries that examine and explicate seminal facets of learning theory research and practice It provides a broad range of relevant topics including significant developments as well as innovative uses of technology that promote learning performance and instruction This work is aimed at researchers designers developers instructors and other professional practitioners *The Concept of Unbelief* Albert Mitchell Ph.D,2013-08-08 The Concept of Unbelief is examined according to

the ethical teachings of Immanuel Kant Kants notion of the idea of God as a moral postulate is used as a foil to the agnostic position to further clarify Kants concept of unbelief This stance by Kant is contrasted with the concept of unbelief in Johann Fichtes Attempt at a Critique of All Revelation **Getting to Know the World Scientifically** Paul Needham,2020-03-20

This undergraduate textbook introduces some fundamental issues in philosophy of science for students of philosophy and

science students The book is divided into two parts Part 1 deals with knowledge and values Chap 1 presents the classical conception of knowledge as initiated by the ancient Greeks and elaborated during the development of science introducing the central concepts of truth belief and justification Aspects of the quest for objectivity are taken up in the following two chapters Moral issues are broached in Chap 4 which discusses some aspects of the use and abuse of science taking up the responsibilities of scientists in properly conducting their business and decision makers in their concerns with the import of science for society Part 2 contrasts the view of scientific progress as the rejecting of old hypotheses and theories and replacing them with new ones represented by Karl Popper with the conception of progress as accumulating knowledge saving as much as possible from older theories represented by Pierre Duhem A concluding chapter defends the natural attitude of taking the theories of modern science to be literally true i e realism in the face of arguments drawn partly from the history of scientific progress in criticism of this stance

The Abraham Dilemma George Graham,2015-08-27 What is a religious or spiritual delusion What does religious delusion reveal about the difference between good and bad spirituality What is the connection between religious delusion and moral failure Or between religious delusion and religious terrorism Or religious delusion and despair The Abraham Dilemma A Divine Delusion is the first book written by a philosopher on the topic of religious delusion on the disorder s causes contents consequences diagnosis and treatment The book argues that we cannot understand a religious delusion without appreciating three facts One is that religiosity or spirituality is a part of human nature whether it takes theistic or non theistic forms Another is that religious delusion is something to which we are all vulnerable The third is that the delusion is not best understood by reducing it to brain chemistry or by insisting that it is empirically false It is best understood by examining its harmful personal and moral consequences consequences that nearly unfolded when the biblical patriarch Abraham prepared to sacrifice his son Isaac in response to a command he thought from God The book presents a fascinating and profound exploration of a phenomenon as old as mankind itself
