

MANUAL TRANSMISSION

Gearshift Lever

Start engine with gearshift lever in Neutral, clutch pedal depressed.

Always depress the clutch pedal fully when changing gears. Do not hold the vehicle on a steep hill with the clutch pedal partially depressed. This may cause premature clutch wear or damage.

Resting your hand on the shift lever knob while driving will cause premature wear in the transmission.

The five forward gears and the reverse gear are arranged as illustrated. For maximum shifting speeds in each gear see page 54.

Drive in 5th gear for optimum fuel economy when cruising. However, if more acceleration is required (when passing, for example), shift down.

To engage 5th gear, move shift lever to the right beyond the spring pressure point and push forward.

WARNING

To downshift from 5th gear to 4th gear, do not move shift lever to the left to avoid shifting accidentally into 2nd gear, which will suddenly increase engine speed and may cause engine damage and loss of vehicle control.

Reverse

Shift into Reverse only when the vehicle is not moving.

To engage Reverse, move lever to left, press down, move further to left and push forward. Especially after some driving, depress the clutch pedal fully and rest the shift lever in Neutral for a few seconds before shifting into Reverse.

Back-up lights go on when you engage Reverse gear with ignition on.
