Transition to Common Work Joe Mancini, Stephanie Mancini, 2015-04-07 The Working Centre in the downtown core of Kitchener Ontario is a widely recognized and successful model for community development Begun from scratch in 1982 it is now a vast network of practical supports for the unemployed the underemployed the temporarily employed and the homeless populations that collectively constitute up to 30 percent of the labour market both locally and across North America *Transition to Common Work* is the essential text about The Working Centre its beginnings thirty years ago the lessons learned and the myriad ways in which its strategies and innovations can be adapted by those who share its goals The Working Centre focuses on creating access to tools projects rather than administrative layers of bureaucracy This book highlights the core philosophy behind the centre's decentralized but integrated structure which has contributed to the creation of affordable services Underlying this approach are common sense innovations such as thinking

about virtues rather than values developing community tools with a social enterprise approach and implementing a radically equal salary policy For social workers activists bureaucrats and engaged citizens in third sector organizations NGOs charities not for profits co operatives this practical and inspiring book provides a method for moving beyond the doldrums of poverty relief into the exciting world of community building **Marketing in a Digital World** Aric Rindfleisch, Alan J.

Cayley, 2021-02-08 In the eighteen years since Ivan Illich's death David Cayley has been reflecting on the meaning of his friend and teacher's life and work Now in Ivan Illich An Intellectual Journey he presents Illich's body of thought locating it in its own time and retrieving its relevance for ours Ivan Illich 1926 2002 was a revolutionary figure in the Roman Catholic Church and in the wider field of cultural criticism that began to take shape in the 1960s His advocacy of a new de clericalized church and his opposition to American missionary programs in Latin America which he saw as reactionary and imperialist brought him into conflict with the Vatican and led him to withdraw from direct service to the church in 1969 His institutional critiques of the 1970s from Deschooling Society to Medical Nemesis promoted what he called institutional or cultural revolution The last twenty years of his life were occupied with developing his theory of modernity as an extension of church history Ranging over every phase of Illich's career and meditating on each of his books Cayley finds Illich to be as relevant today as ever and more likely to be understood now that the many convergent crises he foresaw are in full public view and the church that rejected him is paralyzed in its folkloric shell Not a conventional biography though attentive to how Illich lived Cayley's book is continuing a conversation with Illich that will engage anyone who is interested in theology philosophy history and the Catholic Church **Denver Aquarius** Alan W. Lehmann, 2019-03-07 As America's psychedelic sixties bled

into the self absorbed seventies traditional churches old psychological theories and political dogmas slid into disrepute Natural cures self help books and Eastern religions vied energetically to replace them all to a rich soundtrack of memorable popular music Unlike those who sought out a monastery in India or extensive world travel to find themselves Danny Kohl picked Denver Colorado where he embarked on a personal renaissance with the help of many unique new friends and acquaintances There he discovered that life does not lose its humor in times of fear and trauma any more than it becomes frivolous when we laugh **Utopia in the Factory** Rhiannon Firth, John Preston, 2025-07-31 This book is open access The

idea that automation Artificial Intelligence AI and Robotics might lead to a utopian future for humanity is a powerful one both in mainstream and radical discourse The paradigm of Industry 4.0 where digital manufacturing enables the seamless production of goods and services and lights out factories where machines and robots effortlessly produce for our future needs and wants are powerful drivers of a capitalist free market cybertopia For some radicals technology and automation

produce the conditions for a Fully Automated Luxury Communism drawing on an interpretation of Marx where human work would be replaced by a life of leisure and abundance for all For others an earlier discourse cybernetics and the use of AI and social media in communication and co ordination enable forms of radical organization through anarchist cybernetics This book questions that technological optimism particularly cybernetics automation and AI through a critique of these technologies and organizational forms Cybernetics and corresponding technologies and forms particularly Industry 4 0 can never capture human forms of creativity and working practices Furthermore there are similar problems with the cybernetic paradigm as a radical form of organization or social movement in terms of human autonomy creativity desire and social prefiguration As counterpoint the book shows through empirical evidence and drawing on interviews with workers or activists in a variety of organizational forms that tacit knowledge and autonomous and spontaneous human projects what the authors define as hobbying are critical in the physical act of making and co operating

Unstaging War, Confronting Conflict and Peace Tony Fry, 2019-07-24 This book presents the concept of unstaging war as a strategic response to the failure of the discourse and institutions of peace This failure is explained by exploring the changing character of conflict in current and emergent global circumstances such as asymmetrical conflicts insurgencies and

terrorism Fry argues that this pluralisation of war has broken the binary relation between war and peace conflict is no longer self evident and consequentially the changes in the conditions nature systems philosophies and technologies of war must be addressed Through a deep understanding of contemporary war Fry explains why peace fails as both idea and process before presenting Unstaging War as a concept and nascent practice that acknowledges conflict as structurally present and so is not able to be dealt with by attempts to create peace Against a backdrop of increasingly tense relations between global power blocs the beginnings of a new nuclear arms race and the ever increasing human and environmental impacts of climate change a more viable alternative to war is urgently needed Unstaging War is not claimed as a solution but rather as an exploration of critical problems and an opening into the means of engaging with them *Technology and the Character of Contemporary Life* Albert Borgmann,2024-05-31 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right Multi-disciplinary Trends in Artificial Intelligence Chattrakul Sombattheera,Arun Agarwal,Siba K Udgata,Kittichai Lavangnananda,2011-12-10 This volume constitutes the refereed proceedings of the 5th Multi disciplinary International Workshop On Artificial Intelligence MIWAI 2011 held in Hyderabad India in December 2011 The 38 revised full papers presented were carefully reviewed and selected from 71 submissions The papers cover the multifarious nature of the Artificial Intelligence research domain ranging from theoretical to real world applications and address topics such as agent based simulation agent oriented software engineering agents and Web services agent based electronic commerce auctions and markets AI in video games computer vision constraint satisfaction data mining decision theory distributed AI e commerce and AI game theory internet www intelligence industrial applications of AI intelligent tutoring knowledge representation and reasoning machine learning multi agent planning and learning multi agent systems and their applications multi agent systems and evolving intelligence natural language processing neural networks planning and scheduling robotics uncertainty in AI and Web services *International Handbook of Ecumenical Diakonia* Godwin Ampony,Martin Büscher,Beate Hofmann,2021-08-10 This book was developed to join key resources on biblical theological foundations regional and confessional expressions new themes trends educational approaches and curriculum models for diakonia and Christian social services which can enrich current training courses and widen the horizon by inter contextual and inter cultural perspectives **Speaking Across Borders** Sjur Bergan,Hilligje van't Land,Council of

Europe,2010-01-01 Our ability to relate to and interact with those whose cultural backgrounds differ from our own will be among the determining factors For The future of our societies For most people regardless of whether they aim for international careers or life in their local communities intercultural dialogue will become a fact of life rather than an option Education will need to play a key role in developing the ability to conduct intercultural dialogue which is an integral part of developing democratic culture This book edited jointly by the Council of Europe And The International Association of Universities IAU explores the role of higher education in developing intercultural dialogue in society at large it complements Intercultural dialogue on Campus Higher Education series No 11 And The issue of the IAU journal Higher Education Policy on the same topic and includes contributions by prominent authors from Europe The Middle East Africa Asia and North America The book sets out the political context for intercultural dialogue and explores how universities can move from dialogue on campus to dialogue in society and hence to become actors of intercultural dialogue it also offers examples of good practice from various parts of the world
