

WALTHER

Auto Pistol Model P 38 Cal. 9 mm Parabellum

1958

CARL WALTHER - WORKS FOR SPORTS- AND HUNTING WEAPONS - ULM DONAU - GERMANY

Graphic Description

Illustration 3

The pistol is loaded and uncocked. The safety lever is 'off'. The pistol is thus ready for instant use (Double-Action). **Automatic Safety**

The pistol, though uncocked and loaded, may thus be fired. The safety lever (19) is in the 'Fire' position. The weapon is, as shown in Illustration 3, entirely free from tension.

The firing pin (11) is blocked by the firing pin arrester (12). The live round in the chamber cannot be discharged if the pistol should accidentally be dropped and fall hammer first on the floor. The signal pin (8) can both be felt and seen, and indicates that there is a cartridge in the chamber (Illustration 3).

Illustration 4

The pistol is loaded, safety lever 'off', and cocked by 'pulling through' (Double-Action trigger motion, shown here in the moment in which the tumbler is about to be released by the sear).

Operating the Trigger

The trigger (43) has been pulled back until the tumbler edge (40) of the hammer (29) barely rests on the rear edge of the tensioning piece (26), as shown in Illustration 4. Until then, the firing pin (11) is blocked by the firing pin arrester (12).

If the trigger (43) is now pulled back a little further, the sear (40) of the hammer slides off the edge of the cocking piece (26), the firing pin arrester (12) releases the firing pin (11), and the hammer (29) strikes the rear end of the firing pin (11).
