Too Much to Know Ann M. Blair, 2010-11-02 The flood of information brought to us by advancing technology is often accompanied by a distressing sense of information overload yet this experience is not unique to modern times In fact says Ann M Blair in this intriguing book the invention of the printing press and the ensuing abundance of books provoked sixteenth and seventeenth century European scholars to register complaints very similar to our own Blair examines methods of information management in ancient and medieval Europe as well as the Islamic world and China then focuses particular attention on the organization composition and reception of Latin reference books in print in early modern Europe She explores in detail the sophisticated and sometimes idiosyncratic techniques that scholars and readers developed in an era of new technology and exploding information

Too Much to Know Ann M Blair, 2023-11-07 ENG The internet and digital technologies have generated a flood of texts and widespread worries about information overload But this phenomenon is not unique to our age Already centuries ago scholars complained about an overabundance of books especially in the wake of the invention of printing in mid 15th century Europe Blair studies the remedies that the learned devised to cope with that explosion of texts notably by making summaries and excerpts which could be sorted and accessed in reference books First she traces methods of information management back to antiquity and the middle ages and across cultures with long textual traditions such the Islamic and Chinese worlds Then she focuses on the tools and practices in use in early modern Europe such as note taking alphabetical indexing thematic diagramming and large scale compiling The result combines intellectual history with book history to emphasize long continuities between past and present

RUS XV k *Memory and Commemoration in Medieval Culture* Elma Brenner, Meredith Cohen, Mary Franklin-Brown, 2016-04-22 In medieval society and culture memory occupied a unique position It was central to intellectual life and the medieval understanding of the human mind Commemoration of the dead was also a fundamental Christian activity Above all the past and the memory of it occupied a central position in medieval thinking from ideas concerning the family unit to those shaping political institutions Focusing on France but incorporating studies from further afield this collection of essays marks an important new contribution to the study of medieval memory and commemoration Arranged thematically each part highlights how memory cannot be studied in isolation but instead intersects with many other areas of medieval scholarship including art history historiography intellectual history and the study of religious culture Key themes in the study of memory are explored such as collective memory the links between memory and identity the fallibility of memory and the linking of memory to the future as an anticipation of what is to come

Information, Territory, and Networks Hilde De Weerdt, 2020-05-11 The occupation of the northern half of the Chinese territories in the 1120s brought about a transformation in political communication in the south that had lasting implications for imperial Chinese history By the late eleventh century the Song court no longer dominated the production of information about itself and its territories Song literati gradually consolidated their position as

producers users and discussants of court gazettes official records archival compilations dynastic histories military geographies and maps This development altered the relationship between court and literati in political communication for the remainder of the imperial period Based on a close reading of reader responses to official records and derivatives and on a mapping of literati networks the author further proposes that the twelfth century geopolitical crisis resulted in a lasting literati preference for imperial restoration and unified rule Hilde De Weerd makes an important intervention in cultural and intellectual history by examining censorship and publicity together In addition she reorients the debate about the social transformation and local turn of imperial Chinese elites by treating the formation of localist strategies and empire focused political identities as parallel rather than opposite trends
