Topical Themes in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2012-05-05 Topical Themes in Argumentation Theory brings together twenty exploratory studies on important subjects of research in contemporary argumentation theory The essays are based on papers that were presented at the 7th Conference of the International Society for the Study of Argumentation ISSA in Amsterdam in June 2010 They give an impression of the nature and the variety of the kind of research that has recently been carried out in the study of argumentation The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse The volume starts with three essays that provide stimulating theoretical perspectives on argumentation Subsequently some views are explained on the intriguing topics of dissensus and deep disagreement After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited The new research area of visual argumentation is explored in the next part The volume concludes with three reports of experimental studies concerning argumentative discourse

Contextualizing Pragma-Dialectics Frans H. van Eemeren, Wu Peng, 2017-12-12 Contextualizing Pragma Dialectics contains a selection of 18 article reporting on research conducted in the past decade in which the institutional context in which argumentative discourse takes place is systematically taken into account Some articles provide relevant theoretical backgrounds other articles make clear how the extended pragma dialectical theory can be used to analyse and evaluate argumentative discourse in specific institutional contexts Next to argumentative discourse in the legal domain and the medical context of health communication a great deal of attention is paid to various argumentative practices in the political domain or dealing with specific social issues A contribution on multimodal argumentation is also included All contributing authors are actively engaged in the International Learned Institute for Argumentation Studies ILIAS

Argumentation across Communities of Practice Cornelia Ilie, Giuliana Garzone, 2017-11-15 Featuring multidisciplinary and transcultural investigations this volume showcases state of the art scholarship about the impact of argumentation based discourses and field specific argumentation practices in a wide range of communities of practice belonging to the media

social legal and political spheres The investigations make use of integrative wide ranging theoretical perspectives and empirical research methodologies with a focus on argumentation strategies in real life environments both private and public and in constantly growing virtual environments This book brings together linguists argumentation scholars philosophers and communication specialists who convincingly show how interpersonal and or intergroup interactions shape challenge or change the argumentative practices of users what argumentation skills and strategies become critical and consequential how argumentative discourse contexts may stimulate or prevent critical reflection and debate and what are the wider implications at personal institutional and societal levels Reaching beyond the boundaries of linguistics and argumentation sciences this book should be a valuable resource for researchers as well as practitioners in the fields of pragmatic linguistics argumentation studies rhetoric discourse analysis political sciences and media studies *Empirical Multimodality Research* Jana Pflaeging, Janina Wildfeuer, John A. Bateman, 2021-11-08 This volume advances the data based study of multimodal artefacts and performances by showcasing methods and results from the latest endeavors in empirical multimodal research representing a vibrant international and interdisciplinary research community The collated chapters identify and seek to inspire novel mixed method approaches to investigate meaning making mechanisms in current communicative artifacts designs and contexts while attending to their immersive aesthetic and ideological dimensions Each contribution details innovative aspects of empirical multimodality research offering insights into challenges evolving from quantitative approaches particular corpus work results from eye tracking and psychological experiments and analyses of dynamic interactive experiences The approaches and results presented foreground the inherent multidisciplinary nature and implications of multimodality renegotiating concepts across linguistics media studies social semiotics game studies and design With this the volume will inform both current and future developments in theory methods and transdisciplinary contexts and become a landmark reference for anyone interested in the empirical study of multimodality *Systematic Approaches to Argument by Analogy* Henrique Jales Ribeiro, 2014-07-09 The present volume assembles a relevant set of studies of argument by analogy which address this topic in a systematic fashion either from an essentially theoretical perspective or from the perspective of it being applied to different fields like politics linguistics literature law medicine science in general and philosophy All result from original research conducted by their authors for this publication Thus broadly speaking this is an exception which we find worthy of occupying a special place in the sphere of the bibliography on the argument by analogy In effect most of the contexts of the publications on this topic focus on specific areas for example everyday discourse science or law theory while underestimating or sometimes even ignoring other interdisciplinary scopes as is the case of literature medicine or philosophy The idiosyncrasy of this volume is that the reader and the researcher may follow the development of different theoretical outlooks on argument by analogy while measuring the scope of its greater or lesser application to the aforementioned areas as a whole Scrutinizing Argumentation in Practice Frans H. van

Classical Rhetoric and Contemporary Law Kirsten K. Davis, Brian N. Larson, Francis J. Mootz, Kristen K. Tiscione, 2024-04-30 From the twin birth of western rhetoric and law in the Greek speaking world in the first millennium BCE law and rhetoric were deeply connected in the ancient world In the modern era of legal practice the clear connections between law and classical rhetoric have largely been lost to both those trained in the law and those who study rhetoric This interdisciplinary reader reestablishes those lost connections by pairing primary source materials in classical rhetoric and contemporary law The chapters in this volume show that ancient rhetorical texts can deepen or disrupt contemporary notions about principles that lie at the root of western legal traditions and return to us our past making it possible for scholars across several disciplines to build on work accomplished centuries before Broken into four parts this volume first covers the historical development of rhetoric In Part Two volume editor Mootz and scholar David A Frank look at rhetorical theorists at bookends of an era when classical rhetoric was de valued as a mode of thought Mootz discusses the hegemonic wave of Enlightenment epistemology that separated law from rhetoric and Frank shows that where Cartesian rationality fails in the modern era the humanistic tradition of rhetoric allows law to respond to the needs of justice Part Three consists of ten chapters that each 1 introduce a classical rhetorical theorist to the reader 2 provide an excerpt from a text by that theorist and then 3 demonstrate the relevance of that work to a contemporary court case Moving from the Sophists through Aristotle and Plato and their Greek contemporaries to the Roman rhetoricians Cicero and Quintilian and finally to the early medieval rhetorician St Augustine these reprinted classical texts are contextualized by leading scholars in law classics and rhetoric each with probing discussion questions for readers to engage and interact with the materials rhetorically This vital resource of primary texts demonstrates how rhetoric illuminates the operation of the legal system and reconnects law to its rhetorical roots Structured for use by scholars in critical inquiry and well suited for use in graduate or law school courses *Classical Rhetoric and Contemporary Law* will be of interest to law rhetoric English and communication scholars and as an interactive catalyst to examine the ways in which ancient rhetorical theory informs our understanding of law practice today

Controversies and Interdisciplinarity Jens Allwood, Olga Pombo, Clara Renna, Giovanni Scarafile, 2020-10-15 Nowadays the forms assumed by knowledge indicate an unhinging of traditional structures conceived

on the model of discipline Consequently what was once strictly disciplinary becomes interdisciplinary what was homogeneous becomes heterogeneous and what was hierarchical becomes heterarchical When we look for a matrix of interdisciplinarity that is to say a primary basis or an essential dimension of all the complex phenomena we are surrounded by we see the need to break with the disciplinary self restraint in which often completely inadvertently many of us lock ourselves up remaining anchored to our own competences ignoring what goes beyond our own sphere of reference However interdisciplinarity is still a vague concept and a much demanding practice It presupposes the continuous search for convergent theoretical perspectives and methodologies and the definition of common spaces and languages as well as a true dialogical and open mind of several scholars From ethics to science from communication to medicine from climate change to human evolution the volume *Controversies and Interdisciplinarity* offers a series of original insights beyond disciplinary fragmentation for a new knowledge model
