The Unconquered Scott Wallace, 2012-07-24 NEW YORK TIMES BESTSELLER The extraordinary true story of a journey into the deepest recesses of the Amazon to track one of the planet s last uncontacted indigenous tribes Even today there remain tribes in the far reaches of the Amazon rainforest that have avoided contact with modern civilization Deliberately hiding from the outside world they are the last survivors of an ancient culture that predates the arrival of Columbus in the New World In this gripping first person account of adventure and survival author Scott Wallace chronicles an expedition into the Amazon s uncharted depths discovering the rainforest s secrets while moving ever closer to a possible encounter with one such tribe the mysterious flecheiros or People of the Arrow seldom glimpsed warriors known to repulse all intruders with showers of deadly arrows On assignment for National Geographic Wallace joins Brazilian explorer Sydney Possuelo at the head of a thirty four man team that ventures deep into the unknown in search of the tribe Possuelo s mission is to protect the Arrow People But the information he needs to do so can only be gleaned by entering a world of permanent twilight beneath the forest canopy Danger lurks at every step as the expedition seeks out the Arrow People even while trying to avoid them Along the way Wallace uncovers clues as to who the Arrow People might be how they have managed to endure as one of the last unconquered tribes and why so much about them must remain shrouded in mystery if they are to survive Laced with lessons from anthropology and the Amazon s own convulsed history and boasting a Conradian cast of unforgettable characters all driven by a passion to preserve the wild but also wracked by fear suspicion and the desperate need to make it home alive The Unconquered reveals this critical battleground in the fight to save the planet as it has rarely been seen wrapped in a page turning tale of adventure

Roberts,2019-01-03 In popular discourse tropical forests are synonymous with nature and wilderness battlegrounds between apparently pristine floral faunal and human communities and the unrelenting industrial and urban powers of the modern world It is rarely publicly understood that the extent of human adaptation to and alteration of tropical forest environments extends across archaeological historical and anthropological timescales This book is the first attempt to bring together evidence for the nature of human interactions with tropical forests on a global scale from the emergence of hominins in the tropical forests of Africa to modern conservation issues Following a review of the natural history and variability of tropical forest ecosystems this book takes a tour of human and human ancestor occupation and use of tropical forest environments through time Far from being pristine primordial ecosystems this book illustrates how our species has inhabited and modified tropical forests from the earliest stages of its evolution While agricultural strategies and vast urban networks emerged in tropical forests long prior to the arrival of European colonial powers and later industrialization this should not be taken as justification for the massive deforestation and biodiversity threats imposed on tropical forest ecosystems in the 21st century Rather such a long term perspective highlights the ongoing challenges of sustainability faced by forager agricultural and urban societies in these environments setting the stage for more integrated approaches to conservation and policy making and the protection of millennia of ecological and cultural heritage bound up in these habitats Pushing Past the Human in Latin American Cinema Carolyn Fornoff,Gisela Heffes,2021-06-01 Pushing Past the Human in Latin American Cinema brings together fourteen scholars to analyze Latin American cinema in dialogue with recent theories of posthumanism and ecocriticism Together they grapple with how Latin American filmmakers have attempted to push past the human and

destabilize the myth of anthropocentric exceptionalism that has historically been privileged by cinema and has led to the current climate crisis While some chapters question the very nature of this enterprise whether cinema should or even could actualize such a maneuver beyond the human others signal the ways in which the category of the human itself is interrogated by Latin American cinema revealed to be a fiction that excludes more than it unifies This volume explores how the moving image reinforces or contests the division between human and nonhuman and troubles the settler epistemic partition of culture and nature that is at the core of the climate crisis As the first volume to specifically address how such questions are staged by Latin American cinema this book brings together analysis of films that respond to environmental degradation as well as those that articulate a posthumanist ethos that blurs the line between species
