Unweaving The Rainbow Science Delusion And The Appetite For Wonder:

Unweaving the Rainbow Richard Dawkins, 2018-10-09 From the New York Times bestselling author of *Science in the Soul* If any recent writing about science is poetic it is this The Wall Street Journal Did Sir Isaac Newton unweave the rainbow by reducing it to its prismatic colors as John Keats contended Did he in other words diminish beauty Far from it says acclaimed scientist Richard Dawkins Newton's unweaving is the key too much of modern astronomy and to the breathtaking poetry of modern cosmology Mysteries don't lose their poetry because they are solved the solution often is more beautiful than the puzzle uncovering deeper mysteries With the wit insight and spellbinding prose that have made him a bestselling author Dawkins takes up the most important and compelling topics in modern science from astronomy and genetics to language and virtual reality combining them in a landmark statement of the human appetite for wonder This is the book Dawkins was meant to write A brilliant assessment of what science is and isn't a tribute to science not because it is useful but because it is uplifting A love letter to science an attempt to counter the perception that science is cold and devoid of aesthetic sensibility Rich with metaphor passionate arguments wry humor colorful examples and unexpected connections Dawkins prose can be mesmerizing San Francisco Chronicle Brilliance and wit The New Yorker **Gaither's Dictionary of Scientific**

Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-04 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind's scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither's Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories Consecrating Science Lisa H. Sideris, 2017-08-15 Debunking myths behind what is

known collectively as the new cosmology a grand overlapping set of narratives that claim to bring science and spirituality together Lisa H Sideris offers a searing critique of the movement's anthropocentric vision of the world In *Consecrating Science* Sideris argues that instead of cultivating an ethic of respect for nature the new cosmology encourages human arrogance uncritical reverence for science and indifference to nonhuman life Exploring moral sensibilities rooted in experience of the natural world Sideris shows how a sense of wonder can foster environmental attitudes that will protect our planet from ecological collapse for years to come Encyclopedia of Science and Technology Communication Susanna Hornig Priest, 2010-07-14 In the academic world the term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization Much of this

research is aimed at improving our understanding of the best ways to communicate complex information especially to people who are not scientists Science communication specialists are concerned with giving people useful information about health environment and technology as well as science itself In order to do this we also need to improve our understanding of how people think form opinions and process information Additionally professional practitioners in science communication are engaged in strategic and ethical decisions every day such as How should reporters cover the issue of climate change Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do in order to give a balanced story or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community The Encyclopedia of Science and Technology Communication provides information on the entire range of interrelated issues in this interdisciplinary field in one place along with clear suggestions on where to begin the search for more Geared towards undergraduate and graduate students in journalism communication mass communication and media studies as well as towards working journalists public information officers and public relations specialists this encyclopedia introduces this vast fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries Key Themes Associations and Organizations Audiences Opinions and Effects Challenges Issues and Controversies Changing Awareness Opinion And Behavior Critical Influences and Events Global and International Aspects Government Agencies US History Philosophy and Sociology of Science Important Figures Journal Publications Key Cases and Current Trends Law Policy Ethics and Beliefs Major Infrastructural Initiatives Practices Strategies and Tools Professional Roles and Careers Public Engagement Approaches Theory and Research Venues and Channels

The Skeptical Inquirer ,1999 A Scientific Theology: Reality Alister E. McGrath,2001 A Scientific Theology is a ground breaking work of systematic theology in three volumes Nature Reality and Theory Written by one of the world s best known theologians these volumes together represent the most extended and systematic exploration of the relation between Christian theology and the natural sciences yet produced Thoroughly ecumenical in approach A Scientific Theology is a significant work for Catholic Orthodox Protestant and evangelical readers Each volume is marked throughout by a sustained and critical engagement with the history and philosophy of the natural sciences and by a passionate commitment to the legitimacy of theology as an academic discipline The three volumes together attempt to present an essentially linear argument from nature to theory so that questions of how reality is represented will be dealt with entirely in the final volume though preliminary discussions of aspects of reality are naturally included in this present volume The second volume in the series thus provides a detailed and thorough examination and defense of theological realism Its themes are set against the backdrop of radical changes in Western philosophy and theology resulting from the collapse of the Enlightenment project and the consequent fragmentation of intellectual discourse Engaging critically with writers such as George Lindbeck and John Milbank McGrath offers a sparkling and sophisticated affirmation of

theological realism against its modern and postmodern critics His refutation of the claim that the rise of philosophical nonfoundationalism entails the abandoning of any form of realism is of particular importance as is his application of the highly influential form of critical realism developed by Roy Bhaskar Viewed as a whole Reality represents a sustained engagement with natural theology as the basis of a broader dialogue between the Christian tradition and other religious traditions Book jacket

Literature, Science, and a New Humanities Jonathan Gottschall, 2008-09-15 Literature Science and a New Humanities challenges dominant modes of literary analysis and sketches outlines of a new paradigm theory method and ethos inspired by scientific models *Fifty Readings Plus* Donald C. Abel, 2005

God, Humanity and the Cosmos Christopher Southgate, 1999 A highly accessible and comprehensive outline of the conversations and controversies between science and religion yesterday and today Includes figures exercises a note for teachers references bibliography and an index

Women and Miracle Stories Anne-Marie Korte, 2001 This book contains a multidisciplinary collection of studies on women in miracle stories found in texts ranging from religious classics to contemporary literary fiction Miracle stories are a genre of great importance for the study of women's religious inheritance and for the historical and cultural understanding of women as makers of faith Miracle stories are very generally speaking more open to popular religion and culture than for instance doctrinal and official ecclesiastical texts and as such they can be of special interest to the study of women's lives and religious aspirations Remarkably up till now this genre has not been looked at from this point of view This book aims to open this field for further research by presenting case studies from diverse angles and disciplines Some of the questions this book tries to answer are What do miracle stories specifically tell us about women Are there some types of miracles that are in particular related to certain groups of women What do these stories tell us about women as performers and or subjects of miracles What can be said about the social function and religious meaning of miracles by specifically looking at the way certain groups of women are practising and experiencing miracles By including research on miracle stories in contemporary fiction written by women this book also wants to acknowledge and research the disputed status of miracles as well of women in our present society which is moving from modernity to post modernity

Chemical Heritage, 2000

Harmonious Universe Keith J. Laidler, 2004-07 From quarks to quasars this stimulating survey of the main branches of science will entertain educate and inspire lay readers with a broad scientific understanding of our fascinating universe

From Nature to Experience Roger Lundin, 2005 Roger Lundin traces how pragmatism and its reliance on experience eclipsed nature and religion as the ultimate moral authority He explores why Americans prize experience as highly as they do what they build out of it in works of culture and their daily lives how they manage to make sense of it and where people might turn when they reach the limits of experience

The Return of Science David Gary Shaw, Philip Pomper, 1999

The Open Secret Alister E. McGrath, 2008-04-28 Natural Theology explores the knowledge of God as it is observed through nature This book sets forth a new approach to the study of natural theology reestablishing its legitimacy as a distinct aspect of Christian

theology Written by internationally regarded theologian and author of numerous bestselling books Alister McGrath Treats natural theology as a cultural phenomenon broader than Christianity itself yet always possessing a distinctively Christian embodiment Explores topics including beauty goodness truth and the theological imagination how investigating nature gives rise to both theological and scientific theories the idea of a distinctively Christian approach to nature and how natural theology can function as a bridge between Christianity and other faiths **The Publishers Weekly** ,2000 Quest Charles Pasternak,2003-07-18 Publisher Description **The Enquiring University** Stephen Rowland,2006 Annotation *Tales of the Rational* Massimo Pigliucci,2000 *Fifty Readings in Philosophy* Donald C. Abel,2003 This is a collection of classic and contemporary primary sources in philosophy The readings cover all the main topics of Western Philosophy and each one is carefully edited to be long enough to present an argument Back cover
